"I'll speak to your mother about it." The child's wistful expression was turned into disappointment. "Surely mama will know it's necessary," said the father. "Yes," replied the child, demurely, I suppose so; but when you speak to her, do it gently, papa, or she might wear one herself."

The poet Tennyson is said to be keeping wonderfully well. He is too energetic to be idle, and he reads his daily paper and preserves full freshness of interest in the events of his time.
Mr. Gladstone agrees with Wilkie Collins in thinking Scott the first novelist of the century. The "Bride of Lammermoor" is Gladstone's favorite, and he reads it every three or four years.
The wife of John Boyle O'Reilly, the Boston poet, is an invalid, and seldom appears in society. She has a graceful presence and is a brilliant talker. Mr. O'Reilly says of her that she is his best comfort.

Berry Wall, the young man of New York, who has acquired notoriety on account of his many pairs of trousers, says that the recently published statement to the effect that he was going to open a tailor's shop is "an infamously lie."

Congressman Washington, of Tennessee, has recently shaved his face clean, and he looks so young that when a few days ago he clasped his hands for a page of the boys laughed at him. They thought one of their number was playing a joke on them. Mr. Washington was obliged to forcibly undeceive them.

Here is Oscar Wilde's latest. He chanced to call on a lady who had just purchased a number of Japanese ceramics, which were standing in artistic disorder in her drawing room. "You have come just in time, Mr. Wilde," she said, "and can arrange my screens for me. But Oscar replied: "Oh, don't arrange them; let them come."
A clever fellow is Capt. Wiseman, the German explorer, who is going to Africa to look after Stanley and Emin. Experiments are now being made with sending live fish in specially constructed cars from Denmark to Switzerland and Italy.

Hearing an Unseen Foe.
"This was something a paradox," as Hamlet says. "Once, however, the people of America and other lands have been enabled to pit Hostetter's Stomach Bitters against that unseen foe, malaria, it is no longer a paradox, but an easy possibility. Whenever malaria evolves its misty venom to poison the air, and decaying vegetable vegetation impregnates the water, there, in the very stronghold of miasma, is the auxiliary potent to destroy the foe and assure efficient protection. Fever and ague, bilious remittent, dumb ague and acute cases, no matter how tenaciously they have fastened their clutch on the system, are first forced to relax their grasp and eventually to abandon it altogether. But it is its preventive force that should child-recommender the Bitters to persons dwelling in malaria-cursed localities, for it is a certain bulwark of defence against which the enemy is powerless. Chills, likewise, dyspepsia, nervousness, kidney and bilious ailments."
