curately set down. This is the time to begin this work. The crop year has begun. Let every farmer keep an accurate register of his agricultural opeartions during the next twelve months-the acreage of his various crops; the product of each; the amount of butter, eggs, poultry, live stock, and other farm products sold. This will greatly simplify the work of the census takers and give us an accurate census, and it will be far more satisfactory to all concerned. The superintendent of the census, Robert P. Porter, has issued a circular in which he argues these facts upon the farmers of the United States.

Next year, during the month of June, the eleventh census of the United States will be taken. The most important feature in a census is its correct statement of facts. This can be done more mearly and more easily if every manufacturer and farmer at once begins to prepare himself to answer the questions that will be asked of him one year bence. An exchange says: Expecially does this advice apply to farm.

THE BARBER'S OPINION.

"Some people think 'tis only made For cleansing goods of heavy grade, For washing down the walls or stairs, The bureau, tables and the chairs; But folks do well to change their mind; 'Tis not to things like these confined, And not alone the kitchen maid And laundress prize its friendly aid:

I find it just the nicest thing For toilet use and barbering. The slightest touches will suffice To make a foamy lather rise, That holds the beard till smoothly laid, However dull may be the blade. In short, the tale is ever new That tells what Ivory Soar will do.'

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'lvory';" they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.
