FRAME DWELLING Honse,

'MAT is meant by 'free alkali,' Doctor? I see it mentloned in the advertisements of Ivory SOAP."

"'Free Alkali,' Madam, is the alkali which is not combined with the fats or oils of which the soap is made, due to the ignorance or carelessness of the soap maker. Soaps in which 'free alkali' is present are decidedly injurious to both the clothing and the skin when habitually used. I have seen reports of analysis made of the IVORY SOAP by men eminent in our profession, and all pronounce it to contain no 'free alkali,' to be made with great care and of materials of the best quality, carefully selected, so I unhesitatingly recommend it for every purpose about the house for which good soap is required."

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'Ivory';" they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask & "Ivory" Soap and insist upon getting it. Copyright 1886, by Procter & Gamble
