"A new theory has been started with regard to the use of soap on the face. Women who for years have been careful of their complexions would never, under any circumstances, wash the face in soap, as it was said to roughen and coarsen the skin. Now, that Ivory Soap has been invented, this idea is exploded, and a wellknown physician in the metropolitan profession recommends his women patients to use it freely every day, lathering the skin well. He states that none but the most beneficial results will be effected by this method of improving the skin.

He holds-with considerable plausibility-that the pores of the face become as much clogged by grease and dirt as the hands or any other portion of the body. And if soap is considered a necessary purifier in the bath, its needs must be felt equally on the face. By an abundant and regular lathering the facial pores, he claims, are kept open, clean, free from the clogging matter that produces unsightly blackheads, acne, pimples, and a pure, healthy, fresh and brighter complexion is the resultant. Not mincing matters, he says that the trouble with most women who have sallow, pasty skins is, that from year's end to year's end they never have a really clean face."

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'Ivory';" they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it Copyright 1896, by Procter & Gamble.
