The Listener was told the other day about a curious old custom which a good many citizens may recall. In the old days in Boston, it appears, there were tailors who made a practice of clothing customers by the year for a fixed price taking back the old suits as fast as new ones were supplied. That is to say, the tailor agreed for (say) the sum of year to furnish the customer with three suits of clothes annually. Upon the arrival of the second new suit the custom sent back the first, and upon the receipt of the third he sent back the second and in each case the tailor furbished up the suit and sold it through his back door, so to speak, to some dealer in second hand clothing, or to some one

who wanted a cheap suit: Probably the tailor made a good deal more money through this arrangement than he would if he had sold the goods outright, and the customer, with a very moderate expenditure, not only had the reputation of being a very well dressed man, but enjoyed the luxury of wearing his best clothes all the time. Out of this custom, it is supposed, arose the business of the manufacture of misfits, which has since grown to such immense proportions. Probably these second hand suits of clothes, not badly worn and neatly refurbished, came to be known as misfits and also to be much sought after on ac count of their comparative cheapness And the next step in the profesion was Transcript.
