NOT QUITE satisfied with the Disability Pension Act of last June the Grand Army man, weighing 110 nounce and knowing in session at Boston, last week voted in nothing whatever or puginsm, has occafavor of more liberal pensions. The interence is that some people will never be satisfied. The pension system of the United States government is the most judiciou and expensive of any other nation in the world to-day, and the rate is increasing, under the new act, at the rate of 8,000 to 10,000 per day. The query is, where will It place us eventually?

POSSIBLITIES OF ELECTRICITY.

A Portable Battery for Personal Protection and Warfare Now in Use. The careers of the swaggering bully the ferocious dog, the footpad and others of like ilk are fast drawing to a close. No longer will the small, weak man go out at night with the fear of beh robbed by a footpad or getting the stuff-ing knocked out of him in an argument with a larger man. A check is put upon the ravages of the bulldog, and the most timid and refined lady will be able to go anywhere at any hour of the night with out fear of being insulted. To the won-derful inventive talent of George A. Buckel, the electrician, is this great scheme of physical equalization due. No mercenary motive actuates him is

the matter, for he gives it without price to the public. Like the chivalrous knights of olden time he labors only to efforts sunk into obscurity.
