ndigestion

S not only a distressing complaint, of itself, but, by enough the blood to come deprayed and the system ennecome deprayed and the system en-feebled, is the parent of innimevable maladies. That Ayer's Sarsaparifla is the best enre for indigestion, even when complicated with Liver Complaint, is proved by the following testimony from Mrs. Joseph Lake, of Brockway Centre, Mich:—

from Mrs. Joseph Lake, of Brockway Centre, Mich.:—

"Liver complaint and indigestion make my life a burden and came near ending my life a burden and hardy had strength to drag myself about \$\mathbb{O}\$ All kinds of food distressed me, and only the most delicate could be digested at all. Within the time mentioned several physicians treated me without giving relief. Nothing that I took seemed to do any permanent good until I commenced the use of Ayer's Sursuparilla, which has produced wonderful results. So nothing the most distressed in my condition. My appetite began to return and with it came the ability to digest all the food taken, my strength introved each slay, and after a few months of faithful attention to your directions. I found myself a well woman, able to attend to all lausehold dulies. The medicine has given me a new least of the food taken.

Higher of all in Leavening Power .- U. S. Gov't Report, Aug. 17, 1889.

A Winged Linard.

One of the strangest of the many strange creatures that inhabit the wilds Millionaire Lehman's Luxurious Apara of southern Asia and India is the "flying flowers," a small, brilliant hued lizard of the order bracovolans. On the wing bracovolans resembles a richly tinted insect; when at rest it compares favorably occupied by the insane Chicago million-with others of the lizard tribe, with the sire E. J. Lehman. Mr. Lehman was exception that it has an extraordinary protuberance on both sides of the body. retail dry goods store in Chicago. These are the wings, which are formed Mr. Lehman is sufferingering. by a cutaneous flap, winglike in shape, supported by a series of false ribs. In color these flying lizards are blue and of his recovery. He lives like a king to

the ferecions aspect of the little rainbow alone he pays \$150 a week. Then he has colored brute. The wings are not true three special attendants who keep with wings, strictly so called, but are used him night and day. These cost \$12 a merely as parachutes. When the lizard week additional. leaps from the limb of a tree into the air the upper current brings them out, and fides out once a day. One of the attendenables the possessor to soar away at an auts does the driving, while the other angle to a greater or lesser distance, ac- two sit on either side of him. For the cording to the height of the starting many other luxuries he enjoys Mr. Leh-

that they had the power of moving the winglike appendages, which would, in that case, be true flight. Soaring is, however, the limit of their power, the watching him. He has smashed thou height of the starting point regulating sands of dollars worth of furniture since the distance traveled in the searing his incarceration. He is a tall, athletic flight, which is quite frequently several ally built man, and is possessed of enornundred gards, an aerial exhibition which strikes terror to the heart of a stranger wandering for the first time in | trained athletes they have great difficulty the jungles of the antipodean wilds. St. Louis Republic.

Cactus and Camel,

The cactuses are very peculiar plants as peculiar structurally as they are bizarre and grotesque in outer appear ance. They have spared no pains and shrunk from no sacrifice in accommodating themselves to their niche in nature In the first place, they have no true leaves. What look like leaves in certain joined cactuses are really flattened and extended stems. If this seems at first hearing a hard saying the analogy of above the top of the door and breaking the common stonecrops, where stem and through. To guard against a repetition leaf are hardly distinguishable, will help of this the glass has been removed and o make it a little less incredible. In | wooden boards have been nailed in its other ways, too, the stonecrops (or se- place. dums, as the gardeners call them) throw much light upon the nature of the car-

All these rock baunting or desert plant naturally get very little water except at long intervals after occasional showers. Hence only those can survive which form themselves, as it were, into living reservoirs to retain all the moisture they one desorb. As soon as the rail falls in their arid haunts the roots and rootlets eage: y drink it up in a great harry and sto t away in the soft and spongy cellula issue of which the main part of th plant is wholly formed. For this put pose, both in stonecrops and cactusethe stems have become fleshy and succ lent, and being also green and leaflike they closely resemble true leaves. Bu they are covered externally with a thic skin, which resists evaporation and keep the moisture, once collected, at the In short, the cactus does as a plant juwhat a camol does as an animal. - Gray Allen in North American Reviews

Emerson tells us that there is no pas ticular virtue in consistency. How stu-pid a man must be, he says in effect who is not wiser today than yesterday and who does not accordingly have t change some of his opinions.

'A man will never change his min who has no mind to change," says Arch bishop Whately, and Faraday express the same blea when he charges us to renember that, "In knowledge that man only is to be despised who is not in a state of transition. There is a medium between what
