BATURDAY, MAY 16, 1801.

Home institutions promise no man a fortune in return for small original Wilness: "I spects our side'll win de case, sai, " investments, but the money that is put that them is more easily found when wanted than if invested in the brilliant bubbles that bid so loudly for the Mo., but, so far as heard from, nobody patronage of the credulous and greedy Will some of our people paste this in their hats and think seriously over

SENATOR PRUME struck the "bulls eyo" when he said that it would not make the slightest difference to this country if Italy severed all diplomatic relations with the United States and never again renew them. in We second the motion!

Am men who love justice should labor to promote a better understanding between capitalists and the men who do the world's work, says the Altoona Tribune. No laborer should be treated as a beast of burden nor should every employer be regarded as a cold-blooded tyrant. Fair treatment of each by the other would allay ill feeling and pave the way for arbitration. a method that is much less expensive and much more in accordance with civilized sentiment that strikes and lockouts

ADVOCATE EXPRESSIONS It does not look any way enter prising for an enterprising town to write out special ordinance noticeand tack them on telephone post-They should be printed in the town paper so the people could read them Our council wants to take a tumble don't you agree with us?

"Lilt seems to be the opinion of everybody that a hose and market house should be built in this town That's about right-every well regulate town has such buildings, then why should Lehighton not have?

Beaver Meadow wants to be borough. That's a very creditable ambition; Lehighton doesn't seem to want to be anything more than Lehigh Valley Railroad dependent It looks that way.

Lehighton puts foreward a can didate for Sheriff in the person o Jonathan Kistler. Jona is a rattle and will give his opponents a beautifu shaking up if they want to beat him.

Mauch Chunk does not allow bicycling on the pavements. In this town it doesn't make much difference what you do. It looks that way! The Lebigh Coul & Nav. Co., is building a foot walk to the old (dead)

trap) canal bridge at Weissport. I does not improve the bridge very much Let the people petition court to make this corporation do the right thing they have been monkeying with the people long enough.

This paper patronizes every home institution. Some of our mer chants should do likewise. Don't you think so?

Don't expect to get rich in a day: don't expect to do business without advertiseing; don't expect to be too mean to live and have people be gener ons to you; be honest with everybod and encourage home institutions.

That class of fellows who have money and refuse to invest it for the town's improvement, preferring always to predict failure and disaster are no good to a town. We have some of 'em here. They should emigrate. Don't you think so?

Photography of Colors. The recet auccess of M. G. Lippmann in solving the problem of reproducing the colors of the solar spectrum photographically is one of the most interesting and beautiful results of modern

In announcing his discovery to the Paris Academy M. Lippmann says the conditions essential to the photography of colors are-first a sensitive film show ing no grain and, second, a reflecting surface at the back of the film. Absumen collection, and ge atine films sensitized with iodide or bromide of silver and proved by microscopic examination to be free from grain are placed in a hollow dark slide floed with mercury, which forms a reflecting layer. The exposure, development, and adjusting of the film are done in the ordinary way, but when coopleted the colors of the spectrum are visible.

The explanation is very simple. The Incident light which forms the image in the camera interferes with the light resequently formed in the sensitive film a series of fringes or maxima and minima of imminosity. At the close of the experiment the maxima are seen to be marked by deposite of silver. The thickness of the flim is divided according to the deposits of silver into laminos of thicknesses equal to the intervals separating two maxima of light in the fringes; that is, buif the wave length of the inc dent ray, and it is these sammer of metallic silver which by reflection so beautifully reproduce the colors of the

Sumident light. This discovery marks a new and bril-Hant era in photography, the importance of which can not now be easily exaggerated.

Ambitious Journall There seems to be danger in these fimes that great newspapers and great newspaper buildings will be confused. New York journals have run somewhat Inordinately to bricks and morter within the last decade, and it is not surprising that Chicago's achievements in the same line a ould begin to be recorded. The Chicago Herald intends to have a news-paper building before which all other asswapaper buildings will seem remon-able and modest. Besides being the proper number of stories high, and being scened off with a 10 000 candle proper copped off with a 19,000 candle power sheetele h, ht, the Herald intends to have \$20,006 worth of oil painting done on the walls of its business office, illustrate two of the rise of the press. But its great boast will be a composing room lined with white tiles, and to be occupled by esmpositors who have agreed to wear white shirts and clean collars every day during the continuance of the Werld's Fair.

Jay Could's daughter Nollis is said to be so alralif of fortune hunters that she has decided persy to marry.

A negro who was giving avidence in a leorgia court was reminded by the

"Well, yersas, bom," said the dusky witness, "Pse skeered to tell de whole truth for fear I might tell a lie." Judge (to witnes); "Do you know the nature of an oath?"

Witness: "Sah?"
Judge: "Do you understand what you are to swear to?"

Witness: "Yes, sah; I'm to swear to Julge: "And what will happen if you do not tell it?"

there has gone crany with joy over the
