able, or perhaps supposable, for our own; and this fact seems to damage most of our arguments for others. * * * Now, if we draw the line at menial service for urselves and our relatives, why should we speak severely of those who draw the line at just that point for themselves and their own relatives? The whole difficulty of that much vexed question seems to lie precisely there.—[T. W. Higginson, in Harper's Bezar,

"The glant element From rock to rock leaps with delirious bound," but the element that strides with the strength of many Goliaths can sling tones with the strength of many Davids The Portland Oregonian says: At the office of Mayor Handbury,

United States engineer, is to be seen a "dornlet," of basalt weighing 69 pounds, which was trought from Tallamont. light by Mr. McCiure, lampist of this He reports that in a most fearful

atorm recently experienced at the rock, the dornick was thrown up by the force of the waves and fell on the roof of the lightkeeper's house 110 fost above the sea level, treaking a hole in the root.

The waves were so high that the water came down the chimney of the

The Sea Throwing Stones.

boiler house of the fog siren in forrents und poured out through the tubes of the boiler. The chimney is about 180 feet above the sea level. The sprays entered the cowl of the chimney over the lamp, which is about 150 feet above sea level, and run in streams to the bottom.

Forty feet from trough to crest has long been accepted as the extreme limit of wave height. Captain Kuldie, an experienced navigator, has encountered waves at sea which were 70 feet high, and the late Admiral Fitzroy and previously observed waves as high, Observations made at Ascension support these authorities. Score by gave 600 feet as the maximum length of sea waves, but there are many longer.

Admiration for Wealth.

The simple truth is that while the admiration for mere wealth is as old as the world, it is seen at its utmost in an aristocratis, not in a democratic community, writes T. W. Higginson in Harpor's Buzar. Hamerton has pointed out more than once how in England the two forms of social precedence interlock

and support each other.

An English merchant, long resident in New York, told me once that he was always impressed on revisiting England with the greater deference there paid to mere wealth as compared with his adopted country. He told me especially of an occasion when he rode in a carringe with two kinsmen, one of whom was very wealthy, and afterward lord mayor of London, while the other was unsuccessful and poor. It was the richer relative's carriage in which they were riding, and the other, although by far the more refined and cultivated man of the two, went uncovered in deference all the way. When my acquaintance remonstrated with him for this act of well in America, but you will find that a man must not very differently here." The anecdote sheds floods of light upon the added fericities of wealth in

Europe. Whether they are noble felicities is quite another question. A Good Religion. People over anxique to prove certain

man belonged, said: man me-very mooch!"
"Will you kindly inform me with

"Certamement-like as me fader." "And with what especial-er-persuaion of resigious people did your father "Wid de same like me grandfader."

"And what was the particular faith adopted by your venerated ancestors, and transmitted to you?" The old man stopped a moment, and replied, "Oni, oui, it is do religion of my muddah an' my fader an' my grand-muddah an' my grandfader; it ees de religion datsay, 'Our Fader een Heaben,' an' 'God so luf de wor!'. an' 'Biessed

Single Copies 5 Cents

An enumerator in a Western city wrote a confidential letter to Superin emlegt Porter telling of one experience

"Yes, said he, 'my sight is bad; it the left side once, and once in the righ combines positive economy with great medicinal power. It is the only medicinal power. It is the only medicine of which can truly be said "100 boses One Dollar," and a bottle taken according to directions will average to last a month.

ing else? He said there was nothing more he could think of then, but his wife spoke up and said he had total deprayity, and

had it bad,' and she insisted that I put it down, too."

THE STARS IN INDIA. What the Natives Think of Venus, the

Mrs. King, an English lady in India, was talking with some of the natives one evening about the stars. Venus was just rising, and they said that was Suk-kar and that he would not let any more rain fall. I reminded them, she relates that he was looking over the mountain intely, when that fearful three days' rain fell. Yes, they said, when first he comes there is heavy rain, and after that he puts a stop to it. The planet in the west is his brother, and one of them is always in attendance on the sun, not al-

ways the same, but turn and turn about They say there are 13 suns, brothers, who shine each for a month. I asked how they knew the suns were not the same, as they looked so much alike.

They said it was easy to know they were not the same. "Some are the elder prothers, and much stronger than the thers-so strong that they can kill men. But this month we have a young sun brother, and next month a still younger me, and then the two youngest, who are so weak that they can hardly even

I asked them what became of the sur brothers who were off duty. They said they supposed they were at their own nome, but did not know where that might be.

As to the fixed stars, they did not have any great opinion of them. They said their names were all written in the Brahmin's books, and some were bigger, some smaller; just like the sahibs, who were some generals, some judges, others captains, and small sahibs—and who could remember their names?

Some Clever Conundrums. Why is a crow like a lawyer? He likes to have his caws heard,

What are the many wrinkles in a merchant's forehead? Trade marks. What is the proper length of ladies crinoline? A little above two feet. Do you know the soldier's definition a kiss? A report at headquarters. Which travels fastest, heat or cold?

lent; because you can easily catch When is a man a muff? When he solds a lady's hand without squeez-

ing it. Why don't the American girl like the Why is a dead hen better than a live She will lay wherever you put

Why was Blackstone like an frish egetable? Because he was a common Why don't they charge policemen or

the horse cars? Because they can't get nickel out of a copper. What's the difference between a mouse and a young lady? One wishes to harm the cheese, the other to charm

the he's.

What is the difference between homicide and pig sticking? One is assault with intent to kill, the other a kill with ntent to salt. Why are two young ladies kissing

each other an emblem of Christianity Because they are doing unto each other Why are ladies so wicked? Because they not only bone their stays, and steel their petticoats, but they positively crib their babies, and hook each other's

"Abrams," called out the managing difor to the city editor, "You've been trying for a long time to get a suitable person to edit the society department. Here be is. " Sien of War Boomerangs. "Few people," says a naval officer, approciate the tremendous nature of

the blast caused by firing a big gun on board of a ship. An example of its effect was seen in some recent trials in firing the 67 ton gun of the battleship Trafalgar, considered one of the three or four first vessels in the British navy, The gue was pointed directly shead, and fired with a charge of 630 pounds of slow burning powder and a 1,250 pound projectile. The blast produced by the such of the powder gas and the shot was so tramendous that the plates of the forecastle were forced in and the dock beams bent out of shape, while almost every round carried away some fragment of the projecting portions of the ship, even when the training was to the tight or the laft. It is calimated that the vessel would be reduced to something very like a wreck ware 25 rounds to be fired, either directly ahead or directly astern. This interferes with, or renders impossible, firing when either in flight or chase, and has caused our naval con-atructors to medify the plans for the projected battleship, as it is not deemed distrible to have them sink from the discharge of their own gues."--{New York Continent.

ZP-If you want a paper that worse itself and isn't afected to tell the neme; that believes in public morality, and the enforcement of the lame against malefactors; that has opinions, and isn't afraid to

Topiu Tib, who is on his way to Moon said recently; "White men lave incorrect ideas of our manuers and customs. They have the efficuetry to propose to ab hish at one in other lands ristitutions which quite recently flour-shed in their own. I am told that in a ished in their own. I am told that in a big country called Russia, some years ago, nearly all the common people were slaves, and great masery has befallen them since they became flieir own masters. What is the diference between a slave and a servant? The servant is five, and may leave his master when he pleases. So may my slaves, I have no grands to keep them from deserting me. They are too well content with their lot to run away. If I were unjust to them, perhaps they might fise. But what would happen then? They would sim-ply full care more into the power of

their equals, to be sold again, to be mal-treated, to be killed, perhaps, or to tail, very lizely, twice as bard as they did before. You say it is immoral to own slaves; that slavery debases men and puts them on a level with cattle. Now, it does not debase a negro to exchange the abominable yoks of a negro tyrant for the proteeting care of an Arab mas-ter, whose religion commands him to be benevolent and just. You say the negroes are our breakiren. Well, we treat them quite fraternally, since we raise our children with theira. We are kinder to them than you are to your lackeys. I should not dare to treat a negro as I have seen white travelers treat their white servants. If we buy men it is only because they are offered to us, and we can not procure labor in any other way; and I am sure it is better for them to fall into our hands than into those of tribul enemies who kill or further degrade them. If you call it immoral to compel men to work for their bread, men who would rather steal it than win it henerably, I should like to nak on

The first eights made by the Spaniards were of tolacco loosely rolled and held together by the silken lining of corn ucks, and always with a straw running brough the center, to be withdrawn be fore smoking, so as to secure a good draught. These were first introduced into England in 17.7 by the sen of a Spa ish grandse visiting London, and This is the history of the birth of the eigar into civilization, but we must look considerably further back to find the first records, and the rean flud no origin, but only data of its being in existence. The cigar of the native Bornean living in the Indian Archipelago is a black rol three inches long, tapering to either and, the cut r leaf covered with a network of gray veins like a cobweb. These may were smoked by the old Dyaks, and the muke inhaled to intoxication; while at the weddings the brale and groom held

cigars in their hands, and after their heads were knocked together three times each placed the cigar between the lips of the other, and the ceremony was When the Patagonian smokes to really enjoy himself he gives a smolting party. All essemble in a hut, seating themselves in a circle, with a bowl of water in the center. A cigar is lighted and passed around, each one drawing into his lungs as much smokens possible and retaining it as long as he can, lying flat on his face, with his curious chan thrown over his head. As each expel the smoke be growns and greats, until a perfect label seigns. Then a fresh cigni s lit, and as it passes around quiet comes again. After the third eiger each

takes a drink at the bowl, and sliently flies cut. Religion is supposed to form the beats of this custom. Other Pospie's Daughters. It is a curious fact that there is nothing which is so wholly untilmous us the desire that other people's daughters should be cooks and chambermaids. We never think of it as a tiding desir-
