Still stranger is that section of the valley which, for want of a better name, is called salt earth. Innumerable pin nucles tapering to points as fine as cedles, and over a foot long, rice in clos array from the ground. They are as hard as stone and as daugerous as sharpened steel. Benasth and hiddan by them are pitfalls, a tumble into which means a broken leg or arm. There, too, are the rich fields of borax, which have lured nany a man to death. "Dreadful as is Death Valley, its northwestern arm, Mesquite Valley, is vorse. All of the water on its surface is spison. The wind has thrown the sand into immense mounds, one of which is three miles long and 800 fest high. It was in this valley that the immigrants tost their lives. "Professor Merriam's party is working for the Department of Agriculture, which proposes to mark off into zones all the great Western country. The idea is to nform settlers as to what will grow in ach zone, and as to what will not grow "We have found, said Professor M. that in certain zones certain flora and ables. fauna flourish. Each zone has its pocular species which will not flourish in These zones are both horizontal and vertical. The party chose the desc-ate region of Death Valley for its labors, for from it and not far distant can b traced the seven zones we have estab islued. "Death Valley,' he continued, 'notwithstanding its barren elements, has many phases of life. It has 30 or 40 species of animals and fully as many of Hughlin war shoup." vogetable growth. 'Many theories have been advanced to account for the formation of Death Valley. I think it quite probable that it was once the sink of the Mojave Eliver.<sup>10</sup> f. Took a Champagne Ball.
