What is Scrofula

lating in the giants of the beek, produces un-sightly lumpe or swellings; which causes paintal running sores on the arms, legs, or feet which developes theoris in the gyre, care, or mose, often causing bitudiess or deafness; which is the origin of pimples, cancerous growths, or many other possible features of both. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it. How can it be cured? By taking Hood's Sarmaparilla, which, by the cures it has accomplished, often when other medicines have falled, has proven itself to be a potent and peculiar medicine for this disease. For all affections of the blood Borsaparilla is unequalled, and some of the cures it has effected are really wonderful. If you nuffer from scrofula in any of its various forms, be sure to give Hood's Sarsaparilla a trial.
