THE KENTONESTATE

The Carbon Advocate

The Carbon A

previous, up to last season, and this is a sign that never fails. The weather of the past few months has been can ductive to a good yield of fruit, and it is the general belief that the crop of 1892 will be as large as that of last year, which was of phenomenally large proportions. Of course, it is early in the season yet to begin predicting about the crop, but every indication now points to there being a very large one. Numerous farmers have expressed this belief, and give good reasons for doing so.

NEXT TO THE MORAVIANS THE UNITED Presbyterians of Scotland are the missionary church. Their 570 churches with 185,000 members, contributed \$400,000 hast year, and the gain of converts was 600 during the year,—Illus.

Manual affection.

Part American class of forger; have been discovered. On stress search as vertical to be at manual affection.
