"But, Manaigh".
"Dou't Manaigh". Van did not stop to meet "pa," but bok up his hat and, with a scowl on his see and an eath in his heart, left the house. He was an ill visaged fellow. His features wore the unmistakable marks of cracity, cunning and sensuality. His face was dark naturally, but it was colored a deeper dye by the smake of his forge, for Van was the blacksmith of Chincapin Hollow. His burly black head was set upon a thick neek black head was set upon a thick neck and thus fastened to a horoulean trunk. He had all the characteristics of a cruel and ferocious being. He wended his way slowly up the Hellow, muttering

Symbols of the Thunderholt.

The different nations of the world, both ancient and medern, have employed various symbols to represent the fires that flash from the thundercloud. The Chaldeans symbolized it with a trident the tearned Babyloniana used a human arm for the same purpose. The bas-reliefs of Nimrad and Malthia, the work of later and more refined Assyrian artists, show the trideal doubled or transformed into a triffed fascicle. This triumph of the classic art secured for the student Mesopotamian symbol the advantage over all other representations of the thunderbolt.

The Greeke represented the storm fire with the features of a bird of prey. Later on, when they had begun the means of the Asiatic form of the symbol, they put it in the claws of an eagle and made it the scaper of Zeus. Gaul received the spinol from Italy, but soon altered it to the familiar two headed hammer seen on the Gallo-Roman monuments. The same symbol is seen on sampless found in Germany.
