**SAURDAY, SEPTEMBER 24, 1902.**  
Some Fide Circulation Larger than that of any Weekly Newspaper in this County.

A LEE MATHIAS.  
MARCH CHURCH, Aug. 24, 1902.

EDITOR OF THE ADVOCATE: Some of my friends have been circulating the report that I had written a pamphlet with Mr. B. J. Kuntz, Republican candidate for the Legislature, to elect him to said office. I desire to say through your columns that I am in favor, and that I am ready to support Mr. B. J. Kuntz, the Democratic nominee.

Yours truly,  
GEO. W. KESSE  
MAK LEHIGHTON proof against disease!

THE ADVOCATE is "imperfect" because it wants Biery elected. Did you ever?

SAMUEL OLBERG objects to the Carbon Advocate's reference to him. All that we can say for Samuel is that we pity him. We didn't know he was so thin skinned.

SOME DAY John O'Brien will lead off one at "Bashy" Malloy, and then "Bashy" will wish he hadn't.

CLEAN out your yards and use plenty of disinfectants. The health of the people must be preserved.

THE MARCH CHURCH Democrat has Pennsylvania in the doubtful column. That is just one too many for our Democracy. Hatch is off.

IF SAM GILMAN wants to test his popularity let him run for District Attorney. The Democratic rebels will compliment him with their votes.

LEHIGHTON, Weissport and Franklin needs more industries. We have the room for a big city here. If our people put the proper spirit into life and business.

THE ADVOCATE is a progressive paper. It's columns sparkle with the newest news of the day gleaned from a hundred and one different places. It is the people's paper—from the ranks of the common class it deserves your patronage. Let us have your name as a subscriber. \$1.00 a year.

LEHIGHTON is to be warmly congratulated on at last having a Board of Health that has all the elements of good connected with it. The gentlemen are sincere and earnest in their desires to improve the sanitary condition of this city and our citizens should cooperate heartily with them make Lehighton proof against disease.

THE LEHIGHTON Borough Council have acted wisely in the appointment of a Board of Health. This gives us the sanitary improvement necessary to prevent the breaking out and raging of an epidemic in our midst. There are back alleys, sewers and other places that will be looked after and eliminated at once. Every citizen of this town should endeavor to act in hearty earnest conjunction with the Board of Health. Place no obstructions in their way. Let the effort of one and all be to prevent disease fostering its fangs on our people. Keep clean yourself and guard your premises.

THE TRIUMPHANT election of Mr. Biery to the Legislature will be an achievement to be proud of by every Democrat of Carbon county, and this and we are confident that every one will cheerfully do his whole duty. He should have, we incline to believe from 500 to 800 majority. This is the first time, we believe, that he appears before the people of the county as a candidate for public office. He is strictly a square and intelligent business man and in no sense a mere party man for party sake, but a staunch Democrat for principle sake. No one who knows him for a moment doubts that he will make a faithful, safe and reliable representative. Hatch's Democrat.

THE EDITORS of this paper within the past two weeks has talked with men of all political shades from every district in the lower end of Carbon county and in no particular instance could we learn anything that gives Mr. B. J. Kuntz, the Republican candidate for the Legislature, a single assurance of being elected. On the contrary, however, everything pointed to the election of Mr. W. F. Biery, the Democratic candidate for the same office. This is no unbecoming, Democrats all over the county whom the friends of the Republican candidate claim have been fixed for. Our "Ben" is open and earnest in our districts. This gives us the lie to the claims that many of the leading Democrats are crooked. Biery will be elected simply because he is the poor man's friend and is not the favorite of coal barons and corporation kings. He is making a canvass of the county in a clean, gentlemanly way, making friends by his courteous demeanor and many, open manner of conversation. Kuntz may be a strong man, as was Sullivan, Corbett knocked the latter out and Biery will attend to "Ben" in the same effective manner.

THE SENATE adjournment of the Grand Army of the Republic will be held this week in the city of Washington. It promises to be one of the largest and most interesting gatherings of the veterans held since the close of the war.

The city of Washington is an appropriate spot for the meeting. No other place was the object of such intense and protracted interest during the whole period of the civil war. It was continually threatened and often in imminent peril. A large proportion of all the strategic movements of the Eastern armies had reference to the capture or defense of the national capital.

The march of the veterans through its streets this week will recall the splendid two days' march and review of the Eastern and Western armies after the close of the war, more than twenty seven years ago.

But it will be very different from that grand spectacle. The marching step will not be so steady and strong; the trappings will be less suggestive of the activities of war; there will be no comparable trains of artillery or flashing ranks of bayonets.

Year by year the ranks of the gathering veterans grow thinner. The great captains are all at rest, and a majority, we presume, of all who constituted the armies of the Union are in their graves.

### A DOGMA OF DON'TS.

Twenty-five members of the Carbon Advocate will peruse with interest, particularly at this time, the timely discussion on cholera, by Dr. E. S. Miller, of Altoona, one of our esteemed townsmen, Philip Miller, who is a successful practitioner at Altoona. We take the address from the Altoona Gazette of the 7th, as follows:

At the meeting of the Altoona Academy of Medicine yesterday afternoon in Library Hall Dr. E. S. Miller read an interesting and timely paper on Asiatic cholera.

Dr. Miller dwelt on the weight of testimony concerning the Asiatic cholera accumulated by the medical profession points to the delta of the Ganges, in Southern Asia, as the seat of the scourge. The researches of modern scholars into East Indian history and literature show that a disease similar to it has been indigenous to Hindostan from very ancient times, although no authentic record is found of its having left its native place to invade distant countries prior to 1817. Since that time it has invaded the United States in 1817, 1849, 1864, 1866 and 1885. These epidemics have been varied in severity and in locality, that of 1873 being almost confined to the valleys of the Mississippi, Missouri and Ohio rivers.

The most recent epidemic of cholera in 1885, 1886, 1887 and 1888. These epidemics have been varied in severity and in locality, that of 1873 being almost confined to the valleys of the Mississippi, Missouri and Ohio rivers.

Dr. Miller made a general review of the history of cholera from the time of its discovery to its invasion of England in 1817, and through its different courses in Europe and the United States to the present time. He said it was a migratory disease, and in the great epidemics it followed the water ways and other lines of travel. The epidemic now prevalent proves this; it being brought to this country by the large number of immigrants passing into the country.

The known predisposing causes of cholera, immoderate use of purgative medicine, the use of unripe fruit, bad and insufficient food, impure air, personal uncleanliness, overcrowding and all kinds of unfavorable hygienic surroundings, play an important part.

Dr. Miller explained that there were three stages of cholera. First, the premonitory, second the stage of collapse and third, the reaction. A patient might pass through the third stage, but the complications are so numerous and serious that it is doubtful if he will recover.

The chief symptoms of the cholera are vomiting and purging, together or alternately, severe griping and abdominal pain, which greatly affects the muscles, greatly intensifies the suffering. The body becomes cold the voice husky and the pulse weak.

When Dr. Miller had concluded his paper it was discussed generally by the members present, who strongly advised the strictest sanitary measures to be used and recommended the following code of precautions it being the same as that adopted by the New York City Board of Health:

Healthy persons "catch" cholera by taking into their system, through the mouth, as in their food or drink, or from their hands, knives, forks, plates, tumblers, clothing, etc., the germs of the disease which are always present in the discharges from the stomach, and which are so easily conveyed to the mouth.

Thorough cooking destroys the cholera germs; therefore:

Don't eat raw, uncooked articles of any kind, not even milk.

Don't eat or drink to excess. Use plain, wholesome, digestible food, as indigestion and diarrhea favor an attack of cholera.

Don't drink unboiled water.

Don't eat or drink articles unless they have been thoroughly and recently cooked and boiled, and more recent and better they are the safer.

Don't employ utensils in eating or drinking unless they have been recently put in boiling water; the more recent the safer.

Don't eat or handle food or drink with unwashed hands, or receive it from the unwashed hands of others.

Don't use the hands for any purpose when soiled with cholera discharges; thoroughly cleanse them at once.

Personal cleanliness and cleanliness of the living and sleeping rooms and their contents, and thorough ventilation, should be rigidly enforced. Pour water, closets, sinks, Croton faucets, cellars, etc., should be avoided, and when present should be referred to the Health Board at once and removed.

The successful treatment and the prevention of the spread of this disease demand that its earliest manifestations be promptly recognized and treated; therefore:

Don't permit vomit or diarrheal discharges to come in contact with food, clothing, or anything that should be used in proper vessels and kept covered until removed under competent directions. Pour boiling water on them, put a strong solution of carbolic acid on them, rub less than one part of acid to 50 of hot soap suds or water.

Don't wear, handle or use any articles of clothing or furniture that are soiled with cholera discharges. Pour boiling water on them or put them into it, and use the same solution of carbolic acid solution mentioned above, and promptly request the Health Board to remove them.

Don't be frightened, but do be cautious, and avoid excesses and unnecessary exposures of every kind.

THE STRIKE of the Buffalo switchmen showed that it is not enough for Congress to make arbitration binding at the option of either of the parties. It should go one step farther and make it binding independent of any option. If two private individuals cannot agree upon the settlement of a matter of business they must appeal first to the courts to a determination of the rights in the case, and then, if need be, to the arm of power to carry out the findings of the court. The determination of the equities of the case must come first of all. So it should be in the treatment of difficulties between organized capital. The fact that both sides in the Buffalo strike had so much to lose in the case, that neither would ask for arbitration shows something more is necessary than the privilege of arbitrating. The labor organizations would remove its original suggestion from the case, and the progress of the strike, that any shipper of interest

### BIERY, The Cheapest Place in Town

For Wall Paper, Borders and Decoration is at Owen Rehrig, Corner of Second and Iron Streets. The Biggest Assortment in the County to select from.

Now that school is open it won't be out of the way to talk for a moment about TABLETS and to bring in incidentally a word in reference to stationery of all kinds. Now, in Tablets, we haven't got the largest or best assortment in the world, but we have as nice an assortment as can be found hereabout and the prices are very low.

When school opens you will need a Tablet, then why not buy it here! Low prices, good paper, etc. In writing paper and envelopes we can sell you a good article very cheap; why not buy here! We will appreciate your patronage and treat you right. Come and see us.

BIERY, The Druggist.

What is Electrocure? And What Will it Do?

The Electrostatic has been in use for four or five years, but there are a great many out there that do not know what it is. It is a new method of generating a current, not means of treatment, but a means of treatment. It is a new method of generating a current, not means of treatment, but a means of treatment.

### AMinute Only.

Nineteenth century methods of trading allow no dry foggying or loggading. They are relics of the last decade. New ideas, original methods, push, pluck and enterprise are the exigencies of the present age.

We admit no dull season. Everything must be kept on a constant move. Trade must be stirred up with the same activity at the end of the season, as in the beginning.

We think we have struck the right chord when we started our present Low Water Mark Prices. Warm weather doesn't stop it. Old Sol's burning rays cannot clog our wheel of commerce.

Now is the time and we note the fact that we are head quarters for all kinds of School Supplies and carry fifty different styles or Tablets at fifty different prices. Fine Stationery, Books and Magazines of all kinds, Pocket-Books, French Tissue, Toys, Games and Novelties.
