THE ADSENTANDOUS WOMAN,

she is "not a drucking woman," this she is "not addicted to the use of drags," in short the she has no institute that worshi tend to impair the intellect, clies an experience that has caused her much disquietade. Briefly told and in her core language, she "went down bown and forgot to put on either hat or bonnet." This bit of mental aberration has so haunted, worried and generally uper her that she appeals for relief—something in the nature of citation of similar cases that may convines her that she is not a glaring exception to the world of smalled people and that her performance is not to be taked as an indication that and is being her normal.

It ought to be the enters thing to the world to convince the enters thing to the

and notable examples of invalid lapses her experience is rather a pleasantly distinguishing characteristic and not a terrifying malady. If she has followed the daily papers or has read the floating bits of biography she must have noted the many strainge stories of great men and women remarkable for their absentianidedness. In fact, the preoccupation of the mind has led people into many abund experiences and has made thought the subjects of many off told joes.

But nobody would think for a moment of accusing such people of a marked tendency toward invanity or of intimating that the brain was noftening. The explanation would be that the mind is so concentrated or what happens to be occupying it at the moment that all other things are subordinated. For example, people wrapped in thought will be carried beyond their railway station, will walk several blocks out of their way, will over pass their own daso.

A further interesting and consoling thought is the fact that the profounded thinkers afford the most huncous linearizations of absention of their ways of also trained to the content of their way and one of the content interesting and consoling thought is the fact that the profounded thinkers afford the most huncous linearizations of absention belong. thinkers afford the most nur. who are of a similars profession—ar noted for such epecatricities. The wis professor, with his head crammed ful of the inspiration of the study in the but of the students and the practical folk that enjoy the bewilderment int which his prescentation leads him Professor Sophocles, of Harvard univer-sity, was man of this bind. Professor sity, was a man of this kind. Profess stry, was a man of this kind. Professor Smell, of Amharst, was another. Professor Walter Houghton, the historian, is a third. It is related of Professor Houghton that in learning his room to pass down a long corridor and thence to the street his invariably raised his unbrella unconstitute of the smiles of the Coulding Hoadstead.

brella uncone ious of the smiles of the annuari specialization. Sommel T. Glover, for many years the bright ornament of the St. Louis bar, was motoriously absentinited. He would enter a reshaurant, order a lamcheon and fall into a brown study over a law case. After the luncheon had been served he would pick up the check, pay the cashier and walk out, leaving the food untouched, entirely unmindful of the fact that his stomach was still unsatisfied. Mr. Bescher has related stories in which thought preoccupation stories in which thought prescentation has played him prants, and has laughed as heartly as anybody over the misfer-

in view of the thousands of experisness that might be cited in evidence of the extent of absorbinindedness, it would appear that the lady who pranced down town bereft of her bounct has no reason to fear that she is also to be bereft of her reason. A thousand Bloomingdales could not accommodate the function in her stage of disease.—New York World. A Primitive Shelter.

While attached to a military expedition against the Sienx in Wyoming, in 1877, I saw those Indians construct at the various camps we made what I take to be the most primitive form of house built by human hands. It was simply a sheller, or tenes as they called it. a shelter, or topes as they called it, made with the green boughs out from the cottonwood trees. Without any especial preparation of the ground, they implanted the cut ends of the limbs in two parallel rown about eight feet Ion and five feet apart. The tops wer adroitly bent over the inclosed space an fastened together along the middle line thus creating a semicylindrical shelter open at both ends. These tepeos were merely intended for two or three men to sleep in, all the cooking and other arrangements being performed outside.— R. W. Shufeldt, M. D., in Popular Sci-

to make it letter to handle. Fut away in barrels until wanted. I have thut made a fertilizer that gave better results than commercial fertilizers for which I paid three dellars per lendred pentils. To dissolve house in estiphuric actal much the speedlest process, but with this great care and caution must be observed, as the acid is very correlace—Cor, Husbandman.

Microbes from Old Graves infections discusses, such as scarlet forces and diphtheria, are frentrated by the burial of infected boiles, for though the microbes themselves may die their spares, or seeds, here very great vitality. Parisur's reservines have proved that sarthworuse being up to the surface microbes from the holies of infected animals baried several feet deep. Darwin showed in one case that it fifteen years they had accompliated worm mold over three inches in depils, and in another case during eighty years had accompliated as average depth of more than a foot.

than a foot,

In a field in the Jorn, where a discussed
cow had been buried at a depth of nearly
seven feet. Post-or found that the molal
which he collected two years hales con-tained germs which on being insendired
into a guinese pig produced death from
the same discurder of which the corr disc.

In a Yorkshire village part of a dismed
graveyard was tollen into the rectory gurder adjustice. On the certification of the correction of the correction of the certification of the certifica gravayard was telem into the rectory gar-den adjusting. On the earth being dug-over earlief fever books not being dug-over to the rectory and themes spread over the village. It proved to be of the sense type as that from which, there years before, the victims alled who were larged in that particular part of the churchyard. On the opening of a small per barying ground in Quebec, 150 years old, small pox immediately broke out among the workness.—Youth's Companion.
