Now able to Bork and Sound as a COPRON STATE never gets and of report, nor does it need to be wound by the hand of man. It is a perpetual timekeeper of the most misque and original design, the running weight being kept in constant motion either through the influgion of gravitation, as when on the descending trip, or by the wind's articu on a fan attachment which causes the weight to rise to a level with the top of the framework. The winding attachment is not a windmill of the re-ulation type, but is a fan placed in a common claimney, the puddles being act-ed upon by the natural "up cast" or

As soon as this tan has raised the "running weight" to its extreme height the cord to which the weight is attached acts on a wheel which throws a brake into gear, and the more rounds of cord that are added, so much more strongly does the brake act to prevent the weight from rising any higher, the checking tendency being transmitted to the fan

wheel with every revolution.

A simple pawl arrangement prevents
the down draft from exerting any con-trary influence on the fan wheel. There is not, as one might suppose on first is not, as one might suppose on first thought, any necessity of having a fire in the stove or irreplace of the chimney to which this odd clock is attached. The natural lendency of air is to assemd through such yents, the draft thus cre-ated being always sufficient for weight winding naturous. The clock night be
