The Adjutant General recommends the estabishment of an Encampment at or near the City of Lancaster, to include the uniformed militia of the 1st, 2d, 3d, 4th. 5th, 6th and 7th Divisions ; me at or near Northumberland, to include the Sch, 9th and 10th Divisions; one at or near Williamsport, to include the 11th, 12th and 13th, Divisions; one at or near Chambersburg, to in-clude the 14th, 15th and 16th Divisions; one at or near Greensburg, to include the 17th and 18th Divisions; and one at or near Meadville, to in-clude the 19th and 20th Divisions. The time for each should be fixed by the general officers of the several Divisions, and should succeed each other regularly, so that the camp equipage may always be in readiness. The troops at encamp ant (except officers) should be paid at the rate of \$1 50 per day for each day actually on duty at camp, and be allowed 10 cents a mile for each mile actually travelled in going to or returning

hand the system works admirably. In New York the officers, non-commissioned officers, musicians and privates, of any cavalry or artillery company, receive \$1 per day, for each horse actually used by them at any annual parade or encampment.

Massachusetts the following liberal terms are allowed to every officer and member of vol-unter companies: For the May inspection, one dollar and fifty cents per day, and for each day's duly in camp two dollars and fifty cents; every field officer and general officer of line or staff, and every officer in the staff of regiment three lollars per day; the members of the Regimental or Battalion bands at the rate of three dollars per

The Adjutant General repeats the recommendation he made last year, that the Adjutant General be required to discharge the duties of Inspector General

No company should be paid, whose muster roll did not show that two thirds of the men were present under arms at the two trainings required by law, nor unless the state of disci-pline was satisfactory to the inspecting officer. The Adjutant General transmits a list of the General Field and Staff Officers of the several divisions, regiments and battalions, and a state-ment of regiments, battalions and companies, ith the number of new companies organized within the past year, which are as accurate as the imperfect returns will enable them to be made; also an inventory of the arms, &c., in of the State Arsenals, with the number

and kind of arms issued within the past year. The Superintendent of the Philadelphia Arsenal should be authorized to employ an assist-ant at the rate of \$8 per month. The salary of ant at the rate of \$8 per month. The salary of the Superintendent (\$200) is altogether inadethe duties being laborious.

The Adjutant General presses upon the Le-islature the necessity of attaching to his office clerk. His correspondence is very great, as micers of every grade are continually writing r instruction and information. By transferring the preparation and issuing of

Military Commissions and other strictly military business to the Adjutant General's office, the State Department would be relieved from a ress of affairs with which it should have no diect connection. The Adjutant General has compiled a milita-

code for the use of uniformed militia, and will report the same early in the session of the

Legislature. Several States are moving on the subject of establishing State Military Institutes. In Vir-ginia, Kentucky, Connecticut and Vermont, these Military Schools have been very success-West Point can no longer supply the vast corps of military officers, civil engineers, &c., ch the increase of our territory, population and enterprize demand. Let each State supply from among her own sons. He wishes to see the youth of Pennsylvania educated as Reicans ought to be, educated for action, both in dy and mind, and supplied with that knowldge which is called into use daily.

The severe discipline and thorough teaching (a Military Institute alone can give that price less treasure, a practical education. He speaks at some length of the advantages of an Institute the kind referred to, and respectfully calls e attention of the Executive and Legislature 'this most interesting and important subject.'

He concludes by congratulating the Gover-or "on the prosperous condition of the unirmed Militia of this State, and remarking that year has wrought a great and salutary

their relief. The rainy season has set in and has made the ground among the mines, as well as the roads thither, impassable in many places. A great number of miners are without their usual supplies and have no means of obtaining necessaries. There will be much suffering if the roads do not become better.

Freight from Stockton to the Diggings is seventy-five cents per pound.

Flour at Stockton is \$1 per pound, and other articles in the same proportion.

The quantity of gold dug still continues to increase. The yield of the river bars is great; they are as rich as ever. Companies are now being formed to work the strata of quartz, which are very rich in gold. Tests which have been made in San Francisco give from one dollar and a half to three dollars worth of gold from every pound of quartz.

The carpenters at Sacramento city made a strike for higher wages as they were only paid \$12 per day, whereupon the contractors settled the difficulty by raising their wages to \$16.

The weather here is delightful. The air is bland and balmy as an Italian summer, and the hills around the bay are already covered with a fresh crop of grass. Yours, truly, BAYARD TAYLOR.

ECONOMY .-- The amount of money deposited in the Savings Bank of Great Britain is over £21,000,000 sterling, or more than one hundred millions of dollars ! This is an enormous amount of money, and is the savings of many who have labored hard, and by pursuing a habit of strict economy they have succeeded in maintaining themselves handsomely, and laid up a compe-tency for old age. The question then arises, what is true economy? In the exercise of econ-omy it is essential to have good judgment-a cor-rect notion of matters and things. Every individual has in the course of a life time to purchase a large amount of goods, even if for his or her own support, merely. It will, in the course of years, amount to a considerable sum. Then the way to practice economy in this respect is to buy for CASH, as it is very dangerous to go in debt, particularly with the storekeepers. Buy for CASH, and buy always good goods, and at the lowest prices; and to enable the public to get goods of every grade and quality, at the lowest possible prices that they can be sold over the cost of manufacturing, C. L. JONES is conduct-ing a large establishment on the CASH SYSTEM, and his business has now grown to such an enor-mous extent that he buys nearly all his goods directly of the importers and manufacturers for cash, and sells them at the smallest considerable profits, and in this way he is enabled to sell his ods at least TWENTY PER CENT. lower than all other merchants. Let any one make a calcula-tion of the amount of goods they would probably buy in one year, and they will find that 20 per cent. or one-fifth of the amount would be a considerable item. Let this run on for some years, and they will have a sum saved in amount of no little consequence It is now admitted by all other merchants, as well as by the public generally, that C. L. Jones has the largest and best selected stock of goods

ever shown before in Lewistown, and that he can undoubtedly buy goods cheaper than any other merchant-his business being so large and purchasing in such immense quantities. Country persons visiting Lewistown to pur

chase goods for CASH will soon be convinced of the foregoing facts, by calling at the Celebrated New Cheap Cash Store of C. L. JONES, and in proportion to the population of this country Great Britain, the amount of savings might be
