COUNTY MEETING.

The Whigs of Millin county are requested to assemble at MOYER'S HOTEL, on Saturday Evening, June 8, 1850, for the purpose of appointing delegates to the State Convention to be held on the 19th of that month. A Canal Commissioner, Auditor General, and Surveyor General are to be nominated.

By order of the County Committee.

The law for the Erection of a Poor House, which appears in our columns to-day, together with other new advertisements, leaves us but little room for news. Our outside, containing a part of Mr. Calvin's speech, had been printed before the act was received, or we should have postponed its publication until our next. The speech will, however, appear in our next.

The Warm Springs in Perry county will afford a pleasant retreat for the invalid and pleasure-seeking citizen during the heat of summer. The waters are said to be equal in mineral properties to any in the United States, and Mr. Erwin, the proprietor, will unquestionably do all that an obliging host can do to render the stay of his visitors comfortable and agreeable.

Advertisers' Notices.—Our correspondents are making much complaint respecting the difficulty of collecting pay for publishing their notices. We had the same trouble some years ago, and soon remedied the matter by charging the Auditors.

Major Elbow suggests that the reason why the locusts are denouncing the Galpin claim so bitterly, is because Galpin was a Revolutionary Whig, and lost thousands by taking sides with Washington, Marion, and other patriots. They evidently hate the name.

The benificence of the late legislature having chartered banks enough to last a lifetime, and lodged in all kinds of corruption, the party organs are now crying out to nominate "the best man." This one was given by the Pennsylvania, and is a mere ruse to induce the honest portion of that party to sustain the political hacks who have for years fattened on the treasury and falsified every principle of democracy. The leaders would neither good men nor the best men; but those who can be used as self-interest may require. Will the people much longer be deceived by this "stop thief" cry?

The Auditor General and State Treasurer have given an opinion that the sum of \$25,000, appropriated towards the completion of the North Branch Canal, may be applied to said work without any increase of the State debt. This opinion is altogether based on estimates, and when the year closes may show wide of the mark.

The Holiday Standard some weeks since called our attention to a paragraph in the New Orleans Crescent stating that a sale of Coffee had been made in that market at 8 cents per lb, and then asked—

"If the Tariff of '46 raised the price of coffee, as the editor of the Gazette asserted some time since, of course the same act has caused the reduction." It is a poor rule that won't work both ways. "What say you, friend?"

Why, all we have to say is this: If the tariff of '46 raised the price of coffee some years ago (as was claimed by your party papers at the time), the same tariff no doubt raised the price of coffee, and having afterwards shamefully put down the price of wheat, it of course lowered the price of coffee also. Is that satisfactory?"

The Cuban Expedition.

This buccannering movement has already failed, and the leaders sought safety in an inglorious flight. The first news received represented that Gen. Lopez, who headed the invading party from the United States, had effected a landing with a few hundred men on the northern part of the Island, at Cardenas, about ninety miles from Havana, and about forty miles eastward of Matanzas. Cardenas is a small place, with but few inhabitants, and on that account was probably selected as the easiest point to gain a foothold upon the island. The garrison of only sixty men surrendered after a spirited resistance, a number being killed and wounded on both sides.

This news excited much anxiety to know what followed, and the public had not long to wait, for on Saturday morning last the commander was to perform such extraordinary feats, appeared in the streets of Savannah, Georgia. The steamer Creole, with the troops on board, narrowly escaped being captured by a Spanish war steamer, and finally made her way into Key West, where she has been seized by the collector for a violation of our revenue laws. Lopez was arrested at Savannah by the Marshal, but managed to be discharged. Others engaged in this movement have also been arrested for violating our treaty stipulations, and may not escape so easily.

From the tone assumed by certain members at Washington, it would seem that the scheme of this practical movement for it cannot well be called by any other name—embraced many of the restless spirits of the south who are ever dissatisfied unless engaged in some kind of war. The President has now taken the matter in hand, and it is determined that these men shall not violate our treaties and laws, as well as the laws of nations, with impunity.

FOREIGN NEWS.

The new Cunard steamer Asia with Liverpool advices to the 17th inst., arrived at Halifax at 6 o'clock on Monday morning, having made the passage in a little over eight days. The Commercial news by this arrival is of the highest importance. Cotton and Breadstuffs of all descriptions have advanced—the rise in Cotton is 1/4, in flour 1/4 to 2/4 per bush, and Corn 1/4 to 1/4 per bush.

The French and Russian governments have taken umbrage at the mode in which Lord Palmerston's agent at Athens brought the Greek difficulty to a conclusion, and have withdrawn their Ambassadors from London—There is evidently a good deal of anxiety felt upon the subject, and in both houses of Parliament, on the 16th, explanations of the difficulty were asked.

The excitement with respect to the new Electoral Law is spreading in France, and petitions against the measure are pouring in from all quarters of the country. Several alterations have been made in the Bill.

The whole vigilance of the Government of Rome seems to be exercised in stopping the English, French and Italian newspapers at the post office, which contain articles severely criticizing its policy or conduct.

From California.
The steamer Crescent City, Capt. Ludlow, from Chicago, via Kingston, Jamaica, arrived at New York on Saturday afternoon, with \$200,000 in gold dust. Col. Jack Hays, the independent candidate, has been elected, and sworn in, as Sheriff of San Francisco county. Sacramento city was again overflowed, worse than it was before, much damage being done to property.

Lumber and provisions are very low; and frame houses brought on sailing vessels, would hardly sell for cost of freight.

"Plum City" is the name of a new place on the Sacramento, but recently commenced.

The accounts from the mining regions are satisfactory. Several new diggings have been discovered, which have yielded largely, and the old mines continue to pay from one to two ounces a day.

A sad disaster occurred on an expedition to Trinidad Bay, by which John H. Peoples, Lieut. Baker, and Lieut. Browning, of the U. S. Navy, and two others, were drowned.

MARRIED.

On Thursday, the 23rd inst., by the Rev. S. P. Lilly, Mr. JOHN HENDRIX, of Union county, and Miss CATHARINE STOUT, of Decatur township.

DIED.

On Saturday evening last, in Terry township, JAMES HENRY, son of William Hutterberg, aged 1 years, 6 months, and 8 days.

Departed this life on the 25th inst., about 6 o'clock P. M., at his residence in this borough, Rev. JACOB CHURCH, of the Baltimore Annual Conference of the Methodist Episcopal Church, aged 72 years, 3 months and 22 days.

The subject of this brief notice has been long and favorably known as a laborious and faithful watchman on the walls of Zion. He entered the ministry in the Spring of 1800, and has since that time been in the vineyard of his Master with almost unparalleled zeal and industry for fifty years, without an intermission of four consecutive weeks at any one time during that whole period. His sound and vigorous constitution—which he never allowed to become impaired by any needless self-indulgence—enabled him to perform a vast amount of work, and endure great fatigue and exposure in different climates, at all seasons and in all kinds of weather. He preached on the Sabbath, and on week days, and was ever ready to perform a vast amount of work, and endure great fatigue and exposure in different climates, at all seasons and in all kinds of weather. He preached on the Sabbath, and on week days, and was ever ready to perform a vast amount of work, and endure great fatigue and exposure in different climates, at all seasons and in all kinds of weather.

Rest from the loved employ;
The battle's fought—the victory's won—
Enter your Master's joy."

This has fallen one of the oldest and most faithful members of the Gospel. The loss will be sorely felt, not only by his surviving companion and relations, but by the church of his choice and the community in general, who have been greatly benefited by his labors and liberality. Though dead, yet his name and example will live in the memory of thousands, and in the great judgment, many will rise up and call him blessed. May the God of all grace sustain, support and comfort the afflicted widow, and cheer her lonely pathway, till she shall overtake her sweet husband in the church triumphant.

WARM SPRINGS, PERRY COUNTY, PA.

THE undersigned begs leave to inform the public, that he has recently purchased the Warm Springs, in Perry county, Pa., and has improved and refurnished the buildings for the entertainment of visitors, in a style calculated to ensure comfort and convenience to all who may feel disposed to patronize the establishment.

These springs are situated on the banks of the beautiful Shenandoah river, a stream renowned for its medicinal qualities, and the early settlers of that part of Pennsylvania and the aborigines, whose hunting grounds by its margin. They are 11 miles from Carlisle, and 12 miles from the town of Valley Forge, and 10 miles from Chambersburg to Harrisburg, from which place visitors can at all times procure excellent conveyances. These also from the east, waiting to reach the springs by the route of the Pennsylvania Railroad, and by the Dananum Iron Works, (12 miles distant from the springs) where coaches are constantly in readiness to convey them thither; and those coming from the west on the same road, can at all times obtain easy conveyances to the springs, which is but a few miles distant from the springs.

The qualities of the water at these springs are most extraordinary indeed for the speedy and permanent cure of SCROFULA, PLEURISY, BRONCHITIS, AND ALL THE AFFECTIONS OF THE LUNGS, AND ALL THE
