

Agricultural, &c.

From the Germantown Telegraph.

Useful Suggestions.

The number of the Pennsylvania Farm Journal, for the past month, is a very excellent one, containing many well-written and useful articles upon the all-important subject of Agriculture. We do not know what better service we can offer to our agricultural readers, this week, than to give the spirit of the principal articles:

CHANGE OF SEED.—Dr. A. L. Elwyn, of Philadelphia, has a strong article on the subject of the frequent changing of seed, and thinks that often the failure of crops may be directly attributable to imperfect or unproductive seed.

"Seed," he says, designed for sowing or planting, should be perfectly ripe or matured, and then carefully preserved, so that it may not suffer the slightest deterioration, before being put into the ground. Imperfect or badly matured seed, unquestionably tends to disease. He thinks that were the rule always observed, of sowing and planting the best, the same as in breeding animals from the best, there would be less necessity for the frequent change of seed, which is now considered almost essential.

SMALL AND LARGE POTATOES FOR SEED.—A correspondent recommends large, over small potatoes for planting. He says:—Small potatoes are very frequently of second growth. It is well known to those who grow potatoes, that the first growth is always the most vigorous and decidedly the largest, so that the second or small potatoe growth, does not seem to possess, in as great a degree, the reproductive properties requisite to the perfection of the plant as the first. Besides, he considers that the second growth always affects the first growth, and causes them to rot. He therefore selects his potatoes for planting before the second growth takes place, and is satisfied that, by so doing, he insures himself perfectly against the rot.

WHEAT CULTURE.—The Hon. Frederick Watts, contributes a good article on this subject. He thinks that when the land intended for wheat is to be enriched by turning in clover, it should be plowed in before harvest to allow it time to ferment before the ground is again stirred previous to sowing. He thinks that any green substance turned in at a later period, would heat and sour the soil, and operate to prevent a healthful germination of the seed.—The time of sowing should always be regulated by a proper condition of the ground, it being neither too wet nor too dry, &c., &c. He continues:

"Wheat, with us, is now almost universally put in with a drill. It is sufficient to say in commendation of this mode that all the seed you use is actually planted and covered just at the depth which the exigencies of your soil and your own judgement dictate. The implement, if a good one, places this subject entirely within your own control. But there is another advantage, of which our experience enables us to speak, that of harrowing wheat in the spring as early as the condition of the ground will allow. We have practiced this for several years with decided advantage, not only because of the benefit which the growing wheat derives from it, but of the admirable condition in which it puts the ground for the reception of the clover-seed which is usually sowed at this period. If the ground be harrowed, the clover-seed be then sowed, and a roller of considerable weight passed over the whole, it will be an extraordinary and unfavorable season, if your stubble after harvest be not well set with clover."

He uses the improved double harrow for this purpose, and says there need be no fear of injuring the wheat crop. The common square harrow he condemns as a very inefficient implement, for this or any purpose.

CORN VS. WHEAT.—E. H., of Lancaster county, argues in favor of cultivating corn instead of wheat, as being more profitable. He thinks that 80 bushels of corn per acre should be raised by all farmers, and the wheat be put down at 25 or 30; the difference in the cost of cultivating the corn over wheat, he supposes would not be as great as the profit the other way; but knows nothing positively.

HEDGING—STALL PASTURING, &c.—E. L. T., gives his views about fencing, hedging and stall pasturing, or soiling. He advocates hedges for fences, but we cannot find in his experiments anything worthy of attention. Hedges, in our opinion, never will be adopted by the farmers of this country. As to stall pasturing, he says:

"Instead of turning my cattle into pasture during the summer, I keep them in my cattle yard, where sheds have been erected to protect them from the heat of the sun, and the rain, &c. Twice a day, morning and evening, a sufficient amount of grass is cut and carried into a shed, from which it is divided out to the cattle. The advantages are two fold. First, a saving of pasture, as I find that a little more than one-half will answer the purpose, while the cattle are in just as fine a condition as when permitted to run in the fields. Second, the manure is all kept together in the yard, and as I make it a point to have it collected every morning and thrown under a shed erected for the purpose, I find immense advantage in this practice."

It appears to me that this plan might be adopted, and by the means of it obviate the necessity of at least one half of the fencing now absolutely required upon our farms. The expense of cutting, carting and feeding the grass, will be repaid by the smaller amount of pasture required, and the great advantage of having the manure during the hot months under sheds, instead of being exposed to the wasting influences of sun, rain, &c."

GRAND LETTING!
PROPOSALS will be daily received at the old stand of Nushum, Brothers, in Lewistown, for any quantity of goods now ranged on the shelves and counters of the undersigned, and to meet the run of customers who will no doubt avail themselves of this new mode of obtaining Cheap Goods of every description, they have just ordered and received about as complete an assortment of
LADIES' DRESS GOODS
as was ever seen in this or any other country town, embracing every description and style of all that is
New, Neat, and Fashionable,
at prices varying from a few cents to dollars per yard. In other kinds of goods, we can show in quality and price whatever others can produce, and a considerable sprinkling that cannot be found elsewhere, especially in
Cloths, Cassimeres, Satinets, &c.,
and will venture to add in Fall and Winter Goods generally. Of
Bonnets, Shoes, Hosiery, Gloves, & Ribbons
we have an extensive stock, which, as a necessary consequence are offered for sale cheap. Since opening our establishment here, we have fully demonstrated that, as a general thing, we sell as low as the very lowest, if not a little lower. We do not profess to sell one or two nor three articles at a very low price, but we do profess to sell everything, in either the Dry Goods or Grocery line, so cheap that we are confident our friends everywhere would be the gainers by giving us a call and making their purchases.
Remember at the Old Stand of Nushum, Brothers.

Burning of Barnum's MUSEUM.

Wilder's Patent Safe again the Victor!
The Salamander Safe which I purchased a few years since, and which was in use by Messrs. C. G. Henderson & Co. at the destruction of their store in the building known as "BARNUM'S MUSEUM," on the 30th ult., has this morning been got at, and the interior wood-work, with some Stereotype plates which were in the safe during the fire (the books having been removed), are found to be UNHARMED. I have this day purchased from Mr. John Farrel another "Patent Salamander," and would confidently recommend these well known safes to all who wish security against accidental fires.

GEORGE S. APPLETON.
We fully concur in the above, and would also add that the large WALL FIRE-PROOF, near which the above Safe stood, has also been opened, and although the outside appears to be good, and the walls of the same still standing, the whole interior is charred to a cinder.

BOOT, SHOE, & BOOK STORE.
Our banner to the breeze we fling,
And of happy Boots and Shoes we sing;
Of work well done and fitted neat,
And low for cash—we can't be beat.
Pique on the nose! O, why refuse
To aid me in my rhyme?
Well, then, here goes, I'll write in prose,
If you will give me time.
The story, all told, is simply this: we have just received from the city the largest and best assortment of
BOOTS and SHOES
ever brought in this place. We have them at all prices, and of all sizes and styles, and in selection, we do not think of the Ladies' (God bless them). Variety is the spice of life,"—so says the poet, and we had an eye single to that fact when we selected our
Ladies' and Misses' Shoes.
We must say, although we do not wish to boast, that we have the best assortment in this place, and can and will sell a little lower for cash than they can be had elsewhere.

Of our home-made work we need not speak, save that we will spare no pains or expense in having work made to order, and as we will employ none but the best of workmen, we have no hesitancy in warranting our work. In a word, an examination of our stock, and of our home-made work, which is respectfully solicited, will satisfy visitors that it is not surpassed in this market for **NEATNESS, DURABILITY, and DURABLEITY.** Give us a call, one and all, and we are confident that you will go away realizing that the place to save money in buying good and fashionable work is at the new store of

Great Scientific Discoveries.

BY DR. J. W. COOPER.

FEVER AND AGUE
Completely Cured in Three Days.

By Dr. J. W. Cooper's Vegetable Compound Fever and Ague Pills.

THESE PILLS are composed entirely of Vegetable Substances, and in ninety-nine cases out of every hundred, will perform a perfect and complete cure in three days. No instance has ever been known, where more than six days have been required to perform a complete cure, even in the very worst cases, and on the strongest constitutions. We would earnestly say to all who are afflicted with this distressing disease, to get one box and try them, and in all cases, two boxes are warranted to cure, if taken according to the directions, or the money returned.

These pills not only perform a perfect cure in three days, but remove the bile and create a healthy action of the liver, and consequently fortify the system against a future attack.

ALSO,
My Vegetable Anti-Dyspepsia Bitters.

This Medicine is a certain cure for Dyspepsia in its very worst forms. Thousands of cases have been completely cured by it within the last year, which have been entirely desisted of by the regular family physicians. We do not recommend it to cure everything—we recommend it to cure Dyspepsia, and the diseases originating from it, and that it will cure in almost every case, and it is recommended for nothing else. In many instances, even the worst of cases have been completely cured by it, and it depends somewhat upon the constitution of the patient. We would say to all who are afflicted with Dyspepsia, give this medicine a fair trial, and if it fails to do good, your money will be returned.

ALSO,
My Vegetable Worm Powders.

This is the most wonderful Worm Destroyer ever known, and at the same time, so pleasant to take, that almost every child will be fond of it, and many instances have been known of children crying for more after once taking it.

This medicine is in the form of a powder, the only medicine ever used in that form, and it operates on a principle entirely different from any other medicine ever administered by any other physician. It is the only medicine which has no Worm-seed Oil or Turpentine combined with it, which is believed by all other physicians, to be the only two things which will destroy worms, and these two things combined, together with castor oil, are the active principles of all other worm medicines, which every person who has ever tasted or smelled, knows to be the most nauseous of all nauseous medicines, and on account of which, there is generally something added to destroy this nauseous taste, and in order to do this, it must be something stronger than the medicine itself, and therefore, it must necessarily destroy some of its medicinal properties. These powders are simple and so harmless, that a child may eat a whole box at once, and it will not hurt him, while at the same time, the principle upon which it acts being different from anything else ever used, it will destroy all kinds of Worms with a certainty never equaled. It will not only destroy the seat worms, or Ascarides, and long round worms, or Teres, but is the most effectual medicine for the destruction of the Tape Worm ever known, and these worms have brought as many as FIVE Tape Worms from one person.

If your children have any symptoms of worms, try these powders, and in nine cases out of ten, you will never use any other. These are also warranted.

These medicines are all separate, and one for each disease, and each for each disease. They are not recommended, as many other medicines are, to cure some fifteen or twenty diseases, and all of different natures, but they are each to cure but one disease, and that they will in ninety-nine cases out of every hundred, and where they have a fair trial and fail in all cases, the money will be returned.
