MR. EDITOR :- In looking over the July No. of the Farm Journal, I noticed an inquiry from Mr. A. Owen, of Huntingdon county, Pa., in regard to the destruction of the wheat weevil.

Although Mr. Owen is rather late in making an inquiry to save the present crop, I shall, however, give him my opinion and experience in the destruction of that anoying foe.

My barn for a number of years had been infested with weevils, and having sustained like Mr. Owen's neighbor, a considerable loss from their ravages, I determined to wage an exterminating warfare against the enemy. To accomplish this, I tried different remedies, but without effect. I finally concluded to starve Diamond, on Market street. them as the dernier resort. Accordingly, two years ago I stacked all my wheat and rye out, put nothing into the barn but hay and oats, and the cure was effectual; for since that time, there is not a weevil to be found. I would further state that before putting the hay in the barn, it should be swept clean, in order to disturb the weevils as much as possible.

There are also other remedies recommended by different writers such as strewing portly branches between the layers while mowing the grain, and white-washing the inside of barns, or mixing lime ing a trial. and salt in threshed grain, &c., but my own experience proves to me there is will find it decidedly to their advantage to pay nothing like starving them.

SAMUEL MUMMA Yours, &c., Locust Grove Farm, Dauphin Co., Pa. Willia.

This liquid is secreted in special organs of the female mammalia, for the nourishment of the young, and it necessarily contains all the ingredients required for this object. It contains insoluble matter held in mechanical suspension. It is a solution of a small quantity of different salts, with a considerable proportion of sugar of milk, and a nitrogenous substance named cheese or casein. A number of small globules of fat of different sizes suspended in it, they can only be discerned by the microscope. The salts of milk which amount to about one per cent. of the whole, are the phosphate of lime, phosphate of magnesia, phosphate of iron, chloride of potassium, chloride of sodium and soda. The soda holds the casein in solution. Pure casein is not soluble in water; its combinations with the alkalies, however, are very soluble. The addition of a small quantity of acid separates the soda from the casein, and this makes thickened milk, the curd being no longer in solution with the alkali. Casein is the most abundant substance in the milk.

After the casein is precipitated there is a sugar in the remaining liquid or whey; this is the reason it has a sweeter taste than even the pure milk. This is the only sugar generated in the process of animal life. It requires three parts of boiling water and twice as much cold water to dissolve it. The sugar of milk is easily converted into lactic acid; it is owing to this quality that the cidity of sour milk is due.

It has been found by experiment that a cow fed upon grass yields a greater quantity of milk than if fed on any other food. So far as a series of regular experiments afford any data for conclusions, that kind of food which contains the greatest quantity of nitrogen, always yields the greatest for it also contains the greatest quantity of pitals of Baltimore and Philadelphia, and his butter, and this is not a little singular, for butter contains no nitrogen. It is not a good plan to feed cows on a uniform diet, for experiments have proven that the yield of milk, by such a system of diet, gradually diminishes, it is therefore a good rule to change the food of milch cows frequently.

The milk obtained from cows in the morning is generally richer than that obtained at evening. It has been found that certain pasture grounds are much better than others for the production of rich milk. We believe that this subject, of good grazing grounds, has not received that attention which it demands. There is certainly as much difference in the grass, herbs, &c., in certain pasture lands, as there is in different kinds of food.

As acid is the cause of souring milk, and as the result of it becoming acidulous is a complete separation of the casein from the other parts, it has been suggested that the addition of some alkali, such as soda or salaeratus, might render sour milk sweet. The truth is, that the addition of an extra quantity of alkali is just about as great an evil as an excess of acid. It is the perfect solution of the fatty parts of milk with the alkali in it, which imparts that fine flavor to it when newly taken from the animal. If some pearlash be dissolved in warm water, and some pure sweet olive oil be poured into it and well stirred, the liquid will become thick, white, and milky in appearance, and will also possess a flavor much like that of sweet milk.

In some parts of our country there has been very severe droughts this summer, especially in the State of Maine. It is stated that the hay is only half a crop, and that farmers will have to sell a great deal of their stock before the winter sets in. Those of our farmers who have milch cows should use less hay for food than they now do. Cabbages, beans, linseed, barley, potatoes, and hay, should be given to every milch cow during our winter seasons at the north. These kinds of food can be varied so as to have a change every week. Every farmer should have a steaming apparatus in his barn yard; and plenty of pure air and good drinking water are as necessary as good food for the health of milch cows, and the production of a superior coastity of good milk

WM. REWALT, Agent. Lewistown, April 16, 1852.

Entered according to Act of Congress, in the year 1851, by J. S. HOUGHTON, M. D., in the Clerk's Office of the District Court for the Eastern District of Pa ANOTHER SCIENTIFIC DISCOVERY ! GREAT CURE FOR

DIGESTIVE FLUID

or, Gastric Juice. THE OX, after directions of BARON LIEBIG, the great Physiological Chemist, by J. S. HOUGHTON,

DYSPEPSIA, JAUNDICE, LIVER COMPLAINT, CONSTIPATION, and DEBILITY, Coring after Nature's own method, by Nature's own Agent, the Gas-Half a teaspoonful of Persix, infused in water, will

digest or dissolve, Five Pounds of Roast Beef in about two hours, out of the stomach.

PEPSIN is the chief element, or Great Digesting Principle of the Gastrie Juice—the Solvent of the Food, the Parifying, Preserving, and Stimulating Agent of the Stomach and Intestines. It is extracted from the Digestive Stomach of the Ox, thus forming an ARTIFICIAL DIGESTIVE FLUID, precisely like the natural Gastric uice in its Chemical powers, and furnishing a COMPLETE and PERFECT SUBSTITUTE for it. By the aft of this pre-paration, the pains and evils of INDIGESTION and DYSPEPSLA are removed, just as they would be by a healthy stomach. It is doing wonders for Dyspeptics, curing cases of DEBILITY, EMACIATION, NERVOUS

BARON LIEBIG in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid, ana-logous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs, will be softened, changed, and digested, just in the same man-ner as they would be in the human stomach." 55 Call on the Agent, and get a Descriptive Circular, gratis, giving a large amount of Scientific Evide

similar to the above, together with reports of REMARK; BLE CURES, from all parts of the United States.

As a Dyspepsia Curer, Dr. HOUGHTON'S PEPSIN has produced the most narvellous effects, in curing cases of Debility, Emaciation, Nervous Decline, and Dyspeptic Consumption.

It is impossible to give the details of the cases in the
limits of this advertisement; but authenticated certificates have been given of more than TWO HUNDRED
REMARKABLE CURES, in Philadelphia, New York
and Boston, alone. These were nearly all desperate and Boston, alone. These were nearly all desperate cases, and the cures were not only rapid and wonderful,

but permanent. It is a great NER VOUS ANTIDOTE, and particularly useful for tendency to Billious disorder, Liver Complaint, Fever and Ague, and the evil effects of Quinine, Mercury, and other Drugs upon the Digestive Organs, after a long sickness. Also, for excess in eating, and the too free use of ardent spirits. It almost reconciles Health with

Trace, Halter, Butt, Tongue, Spread,

Cow and Breast Chains, &c.

LOUGHTON'S PEPSIN is sold by nearly all the dealers in fine Drugsand Popular Medicines, throughout the United States. It is prepared in Powder and in Fluid form—and in prescription vials for the use of physicians. Dr. HOUGHTON'S PEPSIN is sold by nearly all

PRIVATE CIRCULARS for the use of physicians, may be obtained of Dr. Houghton or his Agents, de-scribing the whole process of preparation, and giving the authorities upon which the claims of this new remedy are based. As it is NOT A SECRET REMEDY, no objection can be raised against its use by physicians in respectable standing and regular practice. Price, ONE DOLLAR per bottle

DOLLAR per bottle.

DECLINE, and DYSPEPTIC CONSUMPTION, supposed to be on the verge of the grave. The Scientific Evidence upon which it is based, is in the highest degree CURIOUS and REMARKABLE.

This medicine is in the form of a powder, the only medicine ever used in that form, and it operates on a principle entirely different from any other medicine ever used in that form, and it operates on a principle entirely different from any other medicine ever administered by any other physician. It is the only a shigh has no Worm-seed Oil or Turpentine. medicine which has no Worm-seed Oil or Turpentine combined with it, which is believed by all other physicians, to be the only two things which will destro worms, and these two things combined, together with castor oil, are the active principles of all other worm medicines, which every person who has ever tasted or smelled, knows to be the most nauseous of all nauseous medicines, and on account of which, there is generally something added to destroy this nauseous taste, and in order to do this, it must be something stronger than the medicine itself, and therefore, it must necessarily destroy some of its medicinal properties. These powders are simple and so harmless, that a child may eat a whole box at once, and it will not be hurt, while at the same time, the principle upon which it acts being different from any thing else ever used, it will destroy all kinds of Worm with a certainty never equaled. It will not only destrey the seat worms, or Ascarides, and long, round worms, or Teres, but is the most effectual medicine for the destruction of the Tape Worm ever known. Ten doses have brought as many as FIVE Tape Worms from one person. If your children have any symptoms of worms, try these powders, and in nine cases out of ten, you will ne

these powers, and in the cases out of ten, you will here or use any other. These are also warranted. These medicines are all separate, and one for each dis-ease, and each for only one disease. They are not recommended, as many other medicines are, to cure some fifteen or twenty diseases, and all of different natures, but they are each to cure but one disease, and that they will do in ninety nine cases out of every hundred, and where they have a fair trial and fail in all cases, the

money will be returned. DR. J. W. COOPER'S Celebrated Vegetable Anti-Dyspepsia Pills,

A certain cure for Indigestion, Debility, Sickness or Burning in the Stomach, Pain in the Side and Stomach, Costiveness, Sensation, of Weight in the Stomach after Eating, Difficulty of Breathing, Restlessness, Want of Appetite, Patpitation of the Heart, and all other Diseases which arise from INDIGESTION;
