

Agricultural, &c.

FARM WORK.

To Set Our House in Order.—Winter will soon be upon us with its drifting snows, its driving rains, and terrible frosts. If the roof is not tight call in the carpenter and fix it the first fair day. Already the leaks have spotted the paper upon the walls, and the carpet upon the floor. This is poor economy. Stop the leaks. Last winter, possibly, the potatoes were frost bitten in the cellar, and bushels were thrown away as useless. The pump pipes perhaps were frozen and burst. Now take time by the forelock, and bank up all around the house before the ground is frozen. Better have the cellar windows darkened with straw or seaweed than to have frost doing such mischief. Now is the time for this work.

Ridge Your Gardens.—The frost will do a good work for your subsoil if you will give it an opportunity. The ridges may be made with a heavy plow or with the spade. Ground that is wanted for early crops should be manured before ridging. Make the ridges at least two feet high, and let them be as close together as is possible with that depth. The subsoil will be pulverized by the frosts, and will receive some ammonia from the snow and winter rains.

Stores for the Mind.—While you are providing for physical comfort during the winter, do not forget a good stock of reading. There are points in your husbandry that you have not yet settled. Seek light on these topics and make yourself a well read and intelligent man. Nothing pays better upon the farm than science united to practical skill. Take a good supply of agricultural and horticultural papers, that you may know what progress husbandry is making in all parts of the land. The periodical press is now pouring forth such floods of choice literature, and standard works are so cheap, that every one can supply his household.—*American Agriculturist.*

WATER IN THE STOCK YARD.

If you have none, listen to advice, and if it is possible, introduce it. Either set a ram of a windmill, or one of the selfacting wells; or lay a pipe from a spring on the hill; or throw a dam across the brook and lay a pipe from that—some how or other manage to have flowing water and plenty of it, so as not to drive your stock to the brook, or have to pump, or turn a crank a half-day to draw water for them. One has no idea of the convenience till he has tried it. Sit down and make an estimate of the time it takes in four months to draw water for forty head of stock, or to lead or drive them an eighth of a mile to water, and our word for it, the water will come in a pipe if there is any such thing. So says the 'The Homestead,' and so say we.

DOMESTIC RECIPES.

Two of our fair correspondents send us the following recipes, which we will guarantee are reliable and good:

Sponge Cake.—Take 4 eggs—the white and yolks beaten separately; 1 cup of pulverized sugar, 1 cup of flour, 1/2 teaspoonful of cream tartar, 1/2 of soda. Flavor to the taste.

Soda Cake.—3 eggs, 2 cups pulverized sugar, 1 cup of butter, 1 cup of sweet milk, 1 teaspoonful of soda, 2 of cream tartar. Flavor with lemon.

Lemon Pies.—Beat with the yolks of 4 eggs 2 tablespoonful of melted butter, 4 of white sugar, the juice and grated rind of two lemons. Put into a rich paste and bake. Then beat the whites to a froth, adding two tablespoonful of sugar.—Spread it on the pies when done, and put them in the oven again for about three minutes. The above is for two pies.

Fruit Jellies may be preserved from mouldiness by covering the surface 1/2 of an inch deep with finely pulverized loaf sugar. Thus protected they will keep 5 years.

To Cure the Quinsy.—Make a poultice of common white Lima beans, and apply it to the throat hot.

To Clean Kid Gloves.—Wash them in a mixture of equal quantities of ammonia and alcohol. Then rub them dry. The above solution will also remove stains and grease from silk and cloth.

We are decidedly down on women milking cows at any time, busy or not busy.—*Jenny and Tillie.*

Fruit Cake.—Take 4 cups of flour, 3 of sugar, 3 eggs, 1/2 lb of butter, 1 cup of milk, 1 teaspoonful of salaratus, 2 nutmegs, 2 lbs raisins, 1 lb Zante currants.—For this, baked in one cake, bake two and a half hours.

To Make Potato Yeast.—Take 2 qts. of hops, boil until the strength is out, leaving water sufficient to scald one quart bowl of grated potatoes. Strain it upon the potatoes and while cooking stir it, adding a handful of salt and two cups of molasses. When cooked sufficient it will be a thick paste. Cool it in a stone jar, and when cool enough add your yeast for rising.

HOW TO PREVENT COLDS.

Dr. William A. Alcott, the author of "House I Live In," and well known as a lecturer on the laws of health, has in press a work on Hygiene, which will probably be of great practical value. From a chapter on colds, we take the following advice, which is now quite seasonable: "Those who would avoid colds must not muffle themselves, especially their faces and throats, every time they go into the open air. I do not say that none of the vast number already diseased should be allowed to break the force of a stream of air lowered in temperature to zero, or ten or twenty degrees below it, either by a respirator or muffler. I am writing of those who as yet deem themselves healthy.

After brisk walking, or other exercise during which we have worn more than a needful amount of clothing, we must be aware of throwing off a part of it, and sitting down in a temperature which is very low, or in air which is damp, especially if we have been in a free perspiration. Better to keep on our clothing, till we see how matters are going with us. It would be safer to add clothing in such circumstances than to diminish it.

Those who would be perfect in this matter should avoid sitting with wet feet after exercise, or sleeping in damp clothing.—While a person is exercising in the open air, if not over-heated or over-fatigued, it may be safe for him to have wet feet.—Indeed some go with their feet wet all the forenoon without injury, if they keep in motion; but the philosopher Locke who recommended that children should have hosiery in their shoes, would hardly have justified the practice of sitting with wet feet.

Those who are accustomed to warm clothing should not exchange it for that which is extremely thin, when they are about to go abroad in the cold air, unless they are to walk. Thousands of young people, especially females, might trace the consumption, neuralgia, or fever, which they destroyed them, to some act of recklessness like that which is implied by the foregoing.

In general, we are quite too much afraid of the sun and rain to enjoy that hardihood which is indispensable in a climate as much exposed to colds and consumptions as that of the United States. The late Gen. Dearborn, of Massachusetts, would have no such thing as an umbrella in his family if he could help it. He thought it safer on the whole, to be occasionally a little wet, than to exclude ourselves from every drop of rain—nineteen times in twenty, with the almost entire certainty of being sometime caught without one, and of suffering severely as the consequence."

HAVE YOU SUBSCRIBED

TO THE **Cosmopolitan Art Association** FOR THE THIRD YEAR! SEE THE RARE INDIVIDUALS!—The management have the pleasure of announcing that the collection of Works of Art designed for distribution among the subscribers whose names are received previous to the 25th of January, '57, is much larger and more costly than on any previous year. Among the leading works in sculpture—executed in the finest marble—is the new and beautiful statue of the "WOOD NYMPH."

The Busts of the three great American statesmen, Clay, Webster and Calhoun; Also, the exquisite Italian Busts—Apollo and Diana, in marble, life size—executed with the following Groups and Statues in Carrara marble, of the *Struggle for the Heart's Veins and Arteries*; *Psyche*; *Magdalen*; *Child of the Sea*; *Immortal's Captive*; *Beard*; and *Leaves of Grass*; with numerous works in bronze, and a collection of several hundred engravings, by leading artists. The whole of which are to be distributed by ballot among the subscribers whose names are received previous to the 25th of January, '57.

Twenty-eighth of January, '57, when the Distribution will take place.

TERMS OF SUBSCRIPTION. Every subscriber of three dollars is entitled to a copy of the splendid steel engraving, "Saturday Night," or a copy of any of the following \$3 Magazines one year; also, a copy of the Art Journal one year, and a Ticket in the Annual Distribution of Works of Art.

Those who prefer Magazines to the Engraving "Saturday Night," can have either of the following one year: Harper's Magazine, Godey's Lady's Book, United States Magazine, Knickerbocker Magazine, Graham's Magazine, Blackwood Magazine, Southern Literary Messenger.

No person is restricted to a single subscription. Those taking five memberships, remitting \$15, are entitled to six Engravings, and to six tickets in the distribution, or any five of the Magazines one year, and six tickets.

For further particulars, see the November Art Journal, sent free on application.

For membership apply to H. J. WALTERS, Honorary Secretary, Lewistown, Pa. 46320

HIGHLY IMPORTANT TO FARMERS.

M. M. FAXON'S

Attachment of Vulcanized India Rubber Springs to the Tubes of Grain Drills.

The undersigned, having perfected an arrangement for the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the lowest rates, at the Foundry, in McVeytown, Pa. Seeders have become an almost indispensable article to the Farmer, and he will find that the attachment of the Gum Spring will enhance its value at least one-half. All the detsion and trouble caused by the breaking of wooden pins is entirely done away with by this arrangement, and the man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break, rot, or wear out, the Gum Spring is that article, and it is a hazard nothing to say that my Grain Drill is the simplest in construction, most economical in performance, and therefore the most durable ever offered to the agricultural public. The feed is so arranged that it will sow 1, 1 1/2, 2, 2 1/2, and 3 bushels per acre. Persons desiring one of the above articles are requested to send in their orders as early as possible. Direct to McVeytown, Millin county, Pa., or F. G. FRANCISCUS, Lewistown, Pa.; or E. L. FAXON, Hollidaysburg, Pa.; or ROYER & BLO, Harrisburg, Pa., who are authorized to act as agents, and from whom any further information may be had.

PRICE OF DRILLS, with the attachment, \$75. Farmers who already have drills, can have them attached, and the India Rubber Spring attached, for from \$10 to \$15. All branches of the FOUNDRY BUSINESS still carried on, for which orders are respectfully solicited. M. M. FAXON. McVeytown, June 19, 1856.

NEW GOODS.

The undersigned have just received a new and large supply of

FALL AND WINTER GOODS,

at their old stand nearly opposite the Post Office, consisting of

DRY GOODS,

GROCERIES,

BOOTS AND SHOES,

Greenware,

CLOTHING,

CARPETS, &c.,

all of which will be sold on fair terms. The public will please call and give us a share of their patronage. Also, SHINGLES always on hand. J. HAMILTON & CO. nov6

GLAD NEWS.

Full of Hope to the Afflicted and Suffering!

Many of the Thousand Portals of Death may be closed, and life made happier and more comfortable to thousands who are now in danger. Doubtless this world contains many a sufferer with its physical ills, and its mental and spiritual diseases. Among these prominent rank stands

BOWMAN'S VEGETABLE COMPOUND,

A SAFE and speedy cure for Consumption, not only in those milder forms of Throat and Lung Disease, such as Coughs, Croup, Hoarseness, Difficulty of Breathing, Bronchitis, Minors, Sore Throat, Weakness of the Chest, Asthma, Tumor Uterii, Spitting of Blood, Influenza, Croup, Whooping Cough, Pain in the Breast and Side, Hoarseness, Catarrh and Catarrhal Affections, Inflammation of the Lungs, Bleeding of the Lungs, &c. But in those more serious and fatal cases, and in the most advanced affections of the Lungs. For the truth of the above statement and the efficacy of the preparation as an antidote, we refer the public to the following testimonials. Language is scarcely strong enough to tell the great power of this wonderful discovery. The doubting may try it for one year and be sent to New York to the following bona fide certificates with confidence in their influence on the community; they are but samples of the many hundreds of testimonials in our possession:

Mr. H. M. Bowman—Dear Sir:—I feel it my duty to tell you how your compound has done for my daughter, and wish you to publish it if you can in hope that some suffering one may be induced by it to try your valuable medicine and be cured. My daughter was married in 1852, and in 1853 she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all. In the following year she was taken with a cough, and her breathing was at times very difficult. In six months after her husband died, and I sent her to come home, where in four months she was confined and caught cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different remedies for over one year and failed in all.
