From the occurrence of the terribly severe winter of last season, the "weatherwises" generally foretold a mild winter for the present. But, to judge from the way Jack Frost is now putting on the screws. we may expect to scream before balmy Spring comes along. Many of the harbors at the North are already closed by ice, which also offers serious obstructions to navigation in some of the Southern ports. In all parts of Virginia the people are busy harvesting ice, with the expectation that no supply will be needed from the North next summer. At Lynchburg, on Friday of last week, the thermometer was down to 11 degrees above zero. At Savannah it has indicated 18 above, and in Florida, 21 above-being the coldest weather ever known in that region. Ice formed two inches in thickness. In Havanna, Cuba, a severe frost did considerable injury to crops-a phenomenon almost unknown in that latitude. In all the Western rivers, steamers are frozen up. The great lakes are covered with firm ice extending many miles from shore. In the North-western States the severity of the weather is almost unprecedented; and men and animals have perished in great numbers. In Iowa the winter is unparalleled. An Iowa paper of last week relates that south of the State line a party of Government Surveyors took shelter from a snow storm in a ravine, which seamed the prairie. They pitched their tent upon three feet of snow-rigged a store whose pipe ran up through the top of the tentate and went to sleep. A difficulty of breathing aroused the party early, and it was discovered that the ravine had drifted chock full, and that the snow was three feet above the top of the tent and the top of the pipe. Out of the entire surveying company of which they were a part, two men froze to death, two waded the prairie snows in stocking feet unable to draw on their stiff boots, and all were disabled, permanently or temporarily, by the freezing of the extremities. Near the Missouri river in Iowa the thermometer has indicated from seven to thirty degrees below zero. At New York the North and East rivers and the harbor are filled with floating ice, and one vessel has been lost by being cut through.

Restoring Old Steel Pens .- J. Pimont. of Rouen, France, has obtained a patent for the following method of restoring old steel pens which have been thrown aside as worthless, by long use or bad ink.

The old and injured pens are exposed until their temperature is raised to about a red heat. They are afterwards allowed to cool, and then cleansed from the dirt SUPERIOR make of Horse Blankets, that may adhere to them. The cleansing made in Philadelphia of best materials, well finish and will be sold at mights low prices, \$2,20 to 3,50 process may be performed by shaking them | each together for some time in a close box con taining a little soap and sand.

By this simple process, it is stated, that metal pens hitherto considered to be perfeetly spoiled and useless, may be restored to their original state.

To keep Jellies from Moulding .- Fruit Jellies may be preserved from moulding by covering the surface one-tourth of an inch in depth with finely pulverized sugar. Thus protected, they will keep five years.

LEWISTOWN ACADEMY.

A. J. WARNER, Principal. Mrs. S. E. B. WARNER, Principal of the Female Department.

THE Fall and Winter Session of this Institution commenced Thursday, Oct. 16th, and is now open for the reception of students. It is the design of the present teachers to devote themopen for the reception of students. It is the design the present a devote them selves exclusively to the interests of the Academy; to establish a full and thorough course of education, practical and ornamental, both in the male and famale departments; and to render the facilities for acquiring useful knowledge desirable, not only for those in the immediate vicinity, but also for those living abroad. Particular attention will be given, in the male departments. ment, to the practical application of Geology and Chemistry to Agriculture and general Arts.

No pains will be spared to keep up a good and careful discipline, and to maintain a high moral and Christian character in the school.

The popularity of this Office with all classes of the community, both in town and country, and its consequent success, may be ascribed, in part, to the following substantial reasons:

you know what your compound has done for my daugh ter, and wish you to publish it if you can in hope that some suffering one may be induced by it to try your val mable medicine and be cured. My daughter was married in 1853, and went to Cincinnati to live, where her hu and (James Hoyt,) was engaged in business. In six conths after her husband died, and I sent for her to comiome, where in four months she was confined and caugh cold which settled on her lungs. It seemed as though we could get nothing to help her. We tried six different physicians for over one year and then sent to New York a celebrated physician there, and she took medicing om him for eight months; but he could not cure her. Her cough was fixed and stubborn and seemed as though it would tear her breast during the paroxysm of cough and her breathing was at times very difficult. Failing to get relief from physicians, we thought we would try Av er's Cherry Pectoral, and she took it regular for s eks, but it did her no permanent good. are two things about this herb that appears to me sur-prising; first that it grows in our pastures, in some pla ces quite pientiful, and yet its value has never been known until I discovered it in 1846-second, that it should ure all kinds of humor. In order to give some idea of the sudden rise and great popularity of the discovery, I will state that in April, 1853, I peddied it and sold about six bottles per day—in April, 1851, I sold over one thousand bottles per day of it. Some of the wholesale Druggists who have been in

usiness twenty and thirty years, say that nothing in the nnals of patent medicines was ever like it. There is a universal praise of it from all quarters. In my own practice I always kept it strictly for humors but since its introduction as a general family medicine, great and wonderful virtues have been found in it that I

ever suspected. several cases of epileptic fits—a disease which was Iways considered incurable, have been cured by a few ottles. O, what a mercy if it will prove effectual in all ases of that awful malady-there are few who have een more of it than I have.

I know of several cases of Dropsy, all of them aged people, cured by it. For the various diseases of the Liv-er, Sick Headache, Dyspopsia, Asthma, Fever and Ague, Pain in the Side, Diseases of the Spine, and particularly a diseases of the Kidneys, &c., the discovery has done nore good than any medicine ever known.

HIGHLY IMPORTANT TO FARMERS. M. M. FAXON'S Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills.

THE undersigned, having perfected an arrangement for the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others jaterested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the shortest notice, at his Foundry, in McVeytown, Pa. Seeders have become an almost indispensable article to the Farmer, and he will find that the attachment of the Gum Spring will enhance its value at least one-half. All the deten tion and trouble caused by the breaking of wooden pine s entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break, rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Drill is the simplest in construction, most economical in performance, and there are the proper derivative agriculture. and therefore the most durable ever offered to the agricultural public. The feed is so arranged that it will sow $1, \frac{1}{4}, \frac{1}{4}, \frac{1}{4}, \frac{1}{4}$, and 2 bushels per acre.
