They extend from North East and North West, through the middle of the State, to the extreme South, and include every variety of climate and productions found between those parallels of latitude. The Northern portion is chiefly prairie, interspersed with fine groves, and in the middle and Southern sections timber predominates, alternating with beautiful praiits and openings.

The climate is more healthy, mild and equa-

The great fertility of these lands, which are black rich mould from two to five feet deep, and gently rolling—their contiguity to this road, by which every facility is furnished for travel and transportation, to the principal markets North, South, East, West, and the economy with which they can be cultivated, render them the most valuable investment that can be found, and present the most favorable opportunity for persons of industrious habits and small means to acquire a comfortable independence in a few

Chicago is now the greatest grain market in the world, and the facility and economy with which the products of these lands can be trans-ported to that market make them much more profitable, at the prices asked, than those more remote at government rates, as the cost of transportation is a perpetual tax on the latter, which must be borne by the producer in the re-

duced price he receives for his grain, &c.

The Title is Perfect, and when the final payments are made, Deeds are executed by the Trustees appointed by the State, and in whom the title is vested, to the purchasers, which convey to them absolute titles in Fee Simple, free and clear of every incumbrance, lien or mortgage.

### 30 per cent. Saving to Farmers! Hare's Patent Concentrated

WHICH is beyond doubt the most powerful and valuable fertilizer ever offered to the public. How long will Agriculturists submit to the Guano Monopoly, whilst they have the above more potent and more valuable fertilizer, at thirty per cent. less cost? Read the annexed Certificates and then try it along side of the best Peruvian Guano, and let the result speak

Certificate of Dr. Haues.

The specifications of Dr. Hare and J. Odam, having een submitted to me, I have found the composition of matter on which they are founded to be highly nitrogematter on which they are founded to be highly nitrogenous and fermentable compound, containing the essentials of a fertilizer of the highest character, and also the food for sustaining crops to the time of their maturing.—
I regard this enterprise of manufacturing a guano instead of importing it, a practical and important undertaking, favorably affecting the interests of our common country.

Respectfully,

Assayer to State of Massachusetts.

Upon examining the composition of the best Pernyian

Upon examining the composition of the best Peruvian Guanos, I can perceive no ground for assuming it to be the best that can be made. On the contrary, there is always present more or less of superfluous matter, son or uses of supermous matter, some-times in large quantity. The composition proposed by Odam & Hare's Patent, is, in my estimation, superior to that of the best Guanes, or to any other artificial manure of which I have heard, and I think myself the more en-titled to give this positive opinion, from the unlooked for results of the action of sulphuric acid on asimal matter, which I obtained in experiment, but which were artis-

which I obtained in experiment, but which were antici-

pated by the Patent in question. Respectfully Yours,
JAMES & BOOTH. Certificate of Profe sor Frazer. At the request of parties interested, I have no hesitation firstating my opinion, that the mode of preparing an artificial manure, by acting upon animal matters by sulphuric acid, as detailed in Dr. Hare's Patent, and mixing the resulting substance with animal, charcoal and phosphate of Line, is correct in theory, and although I have had no opportunity of testing the manure thus formed practically, I have no doubt that a manure formed by the nixture of these ingredients in proper propertions, would be found at least to equal in its effects the best Guar. Altoona, Logan House, Hollidaysburg, Exchange Hotel, Johnstown, Cambria House, Pittsburgh, St. Charles Hotel, Dr. HARDMAN treats Consumption, Bronchitis, Larying tis, Asthma, and all diseases of the Throat by MEDICA-TED INHALATION. The pread point in the treatment of all human maladies is to get at the disease in a direct manner. All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which Inhalation is based. If the stomach is diseased, we take medicine directly into the stomach. If the lungs are diseased, hereather or inhale medicated vapors directly into the The reason why Consumption and diseases of the Lungs have heretofore resisted all treatment, has been because they were not approached in a direct manner by medicine. They were intended to be local, and yet they were so administered that they could only act constitutionally, expending their immediate action upon the stomach, whist pending their immediate action upon the stomach, whilst the foul ulcers within the Lungs were unmolested. In-

balation brings the medicine into direct contact with the disease, without the disadvantage of any violent action. Its application is so simple that it may be employed by the youngest infant or feeblest invaiid. It does not derange the stomach, or interfere in the least with the strength, comfort or business of the patient.
