SWOOPE AND THE PRESS.

H. Bucher Swoope, in a speech recently these salutary restraints upon the Legisladelivered at Philadelphia, in trying to ture the future will be safe from the danshield himself and company from the charge of having been bought up, said : present. "While speaking of this charge of corruption, I wish to relate a circumstance that has a bearing on the case. While in the city of New York, not long since, on business, I fell in with a correspondent of the New York Herald-the man who wrote a series of letters from the State of Pennsylvania last fall. He became very confidential, and, among other things, he informed me that be had in his possession a list of certain expenditures, which was drawn up in the handwriting of Ex-Governor Ford of Ohio. Mr. Bennet, of the Herald, you may recollect, charged Gov. Ford with having misappropriated the funds furnished to subsidize the press of Pennsylvania, and this list of expenditures was prepared by Mr. Ford, and given to the gentleman in whose possession I found it, for the purpose of satisfying Mr. Bennet that the money had been properly expended. That list, showing the papers that were bought, and the amounts that were paid them. I shall have the pleasure of laying before the people of the State with the proofs of its genuine-ness. You will remember that last fall certain papers in Berks, Lebanon, Lehigh, Dauphin, Mifflin, and other counties suddenly changed from the support of Fillmore to Fremont or Fusion.' The Gazette, as its files will show, put up the Republican ticket immediately under the Fillmore in June, one week after Col. Fremont was nominated, and then and subsequently to the day of election, continued to advocate a Union State and Electoral Ticket, consequently we made no "sudden change," but still if Gov. Ford of the next Legislature, in case the amendleft any money here for us, we hope Swoope will let us know in whose hands it was placed. There were two papers here then, the Gazette and the Aurora. Our course was as stated above, as any one can satisfy ining the file. There could therefore have the House and the old county thirteen .been no reason for buying the Gazette either to Fremont or Fusion, for it was both from the start; but as there is said to be one person here who ascribes Swoope's statement to apply to us, we hold him, other valuable consideration for advocating districts. either Fillmore, Fremont or Fusion, to be both LIAR and SCOUNDREL. Let the list be published, and the parties made known, so that justice may be done to all; and we pledge ourselves, so far as the Gazette is concerned, if it will appear that Gov. Ford has set us down among the number, we will spend something

LOCAL AFFAIRS."

THE COMING WINTER .- So far as this section is concerned, the prospects for a hard winter to mechanics and laboring men are extremely strong. Some seventy-five hands have been thrown out of employment by the stoppage of the furnace-the mills are not likely to drive a heavy business on account of the inferior quality of the grain-and in other matters but little is going on calculated to afford employment. Those therefore who still have a chance for saving something from their hard earnings, will act wisely and well by doing so, for the fact stands undisputed that, unless some providential or unforeseen circumstance will create a demand for labor, many who are in a measure dependent upon it, will find much difficulty in making both ends meet between this and the ensuing spring. We are no croaker, but such are the appearances to us, and if correct, let all profit by them. There is many a half dime, dime, quarter, &c. that now daily or

weekly goes for trifles, which can be readily saved; there is many a half and dollar now devoted to extraneous or superfluous matters that can be readily dispensed with; and those who will take an economic fit will in a short time be surprised to see how these trifles run up into considerable sums, and how easily they can accommodate themselves to circumstances in the way of dress, &c. when there is the will to do it.

Sad Accident .- A boy named Montgomery Threlked, a son of J. The second amendment is a new article relating to new counties. It prohibits the cutting off of more than one tenth of the population of any county in the formation of a new county, without the express consent of the people, and also provides that the counties hereafter to be erected shall contain at least four thousand square miles. We regard this as a very valuable addition to the Constitution. The conditions it presents will prevent the division of old and the formation of new counties except in such cases as will command the general approval of the people interested.

The third amendment relates more par ticular to Philadelphia, but contains a general provision regulating the method of future apportionment of representatives in the Legislature. Under the operation of this provision, the city of Pittsburgh, (and probably the city of Allegheny,) will, after the year 1864, be erected into separate representative districts, and will elect repre sentatives distinct from the county. The

city of Philadelphia will also be divided into single senatorial and representative districts, but this division will take place there immediately, it being made the duty ment is adopted, to divide the city into such general will no longer be tolerated; and districts, the division thus made to stand that sobriety and faithfulness are better until the appointment of 1864. When divided into single districts there will be less danger than there is now of one party getting the entire delegation. The only objection we have to this amendment is that it does not extend to the whole Swoope, or any other one who asserts that State. New Rail .- During a recent visit we noticed that the second track of the Pennsylvania Railroad eastward from Millerstown has been laid with a new rail, now nearly ready for use. The rail is composed of two pieces firmly riveted together, forming a T rail similar to the one in general use, but from the manner in which they are put together-the joints of one half meeting in the centre of the other half-presenting an uninterrupted surface of iron. Should this experiment (for such we presume it is) prove successful, jarring arising from the joining of rails will be obviated, and the cars pass over the track as smoothly as on an iron floor.

All obstructions and inflammation in the passages connected with the kidneys and bladder, may be removed by lubricating the parts affected.
