Beaver Dam Sabbath School.

The following address was read before the Beaver Dam Sabbath School, by the Secretary, at a celebration held on the 29th of August :

ADDRESS.

LADIES AND GENTLEMEN :-- I am not often reluctant in the performance of any duty enjoined upon me by my friends that I feel competent to perform, and in this instance I could have wished the task had been assigned by you to an older head and an abler pen; but as I have been selected to make the report, I have done the best I could in the short space of time allowed me, and I shall proceed without further apology.

Our school was organized for the present summer session, on Sunday, the 12th day of April, being some three or four weeks later than in some former years, on account of the long continued cold weather in the spring. The officers chosen to serve during the year, were Mr. Elias Penepacker and Maj. Wm. Wilson for Superintendents ; Mr. Leonard Melcher and Samuel Stine, esq , assistant Superintendents; Mrs. Henderson and Mrs. Hinds chosen Female Superintendents ; David Witherow,

Librarian ; and A. J. North, Secretary .-The school on commencement-day (as is usually the case) was comparatively small. numbering but 28 male and 30 female scholars, with quite a deficient supply of teachers. An increased interest, however, soon manifested itself in the rapid addition made to the school from Sabbath to Sabbath, until now we number 51 male and 74 female scholars with 11 male and 14 female teachers, and including officers and all in connection as actually belonging to the school, there are 156 in number .--We are gratified in having the services of so many young ladies and gentlemen in aid of the enterprise.

Our library in the spring was somewhat reduced in numbers, and having been handled and used all the preceding summer was very much worn and defaced, and as the school increased in numbers the supply of testaments and hymn books for the use of classes fell short. It was deemed advisable to add to our stock of books, and replenish the library with such kinds as the pressing wants of the school seemed to require. Our wants were made known to the parents and people through the the medium of subscription papers, and the manner in which such generous responses to the call were given, is worthy of note here, and we take occasion to express to them our sincere thanks. An addition was then secured of 100 vols. to the library and a fall supply of testaments, hymn books, spellers and primmers. It has been gratifying at all times to observe a prompt and regular attendance, notwithstanding the weather of the season

has been so variable and wet. Good order and a seeming interest in study on the part of the school was quite manifest .---Our school is based upon the principle of

be inheriters of a boon so unspeakably valuable. The cost of it is simply nothing and the value of it is beyond calculation in its results.

Finally, my friends, we believe these aunual celebrations are of much profit to us. They seem as resting places in the great journey of Life, where we can stop to review the ground over which we travelled, and take 'a moment's reflection before we make another leap into the uncertain future. Here friend meets friend with smiles of approbation, thereby strengthening the bonds of brotherhood, and elevating our race still higher in the scale of our being. Since our happy meeting last year, Death has taken from our ranks a shepardess of the flock, and we mourn the loss of an able advocate and zealous friend, who for six years labored arduously in the work, in the high position of Female Superintendent. In her the Sabbath School has lost an earnest advocate and friend, the community a useful member and the Family a kind and affectionate mother.

POISONING CASE IN ALABAMA. The Montgomery (Ala.) Mail of the 17th, gives the subjoined account of the poisoning case in Pike county, in that State, referred to briefly by telegraph :

A German or Hungarian, whose name our informant has forgotten, was on intimate terms with a negro woman, the property of old Mr. Thomas Frazell, one of the earliest settlers of Pike. This man had once been in the employ of Mr. F., and was familiar with his premises. Some time since he had been detected in gambling with Mr. F's negroes, and Mr. F. had instituted a prosecution against him. On Saturday evening, the 12th instant, he was seen in conversation with the negro woman above alluded to at the well, although he had received orders from Mr. Frazell never to come about his premises. On Sunday there were some thirty-seven persons dining at Mr. Frazell's house, of whom about thirty were visitors from the neighborhood .----All these became sick soon after eating, vomiting violently; and the cook being arrested immediately, on a suspicion of poisoning, at once proceeded to state as fol-lows: She said that the white man above referred to, while at the well, had given her a vial containing arsenic, which he instructed her to mingle with "the meal, the milk, the butter and the coffee." He was particularly desirous that it should go into every article of food, for old Mr. Frazell was in delicate health and generally ate very sparingly. The negro woman said she followed the directions of her lover to the letter-who, by the way, added to his instructions the remark, that "after the old man had taken that, he would not prose-

cute him in that case." The poison was administered, as we have seen, but too successfully. The whole assemblage of persons were put under its influence; and, at the last accounts, six had died from its effects. Old Mr. Frazell died about sunset on Sunday, the day of the poisoning. His overseer's wife and two children, Mrs. Cloud, a widowed daughter of Mr. F., and his grand-daughter, died Union. We meet upon common ground, the next day. Several others were lying and for one common object. Our supplies in a critical condition, and doubtless there are from the American S. S. Union, but the Bible alone is our text book. We ish crime. In order to give some idea of the sudden rise and great popularity of the discovery, i will state that in April, 1853, I peddled it and sold about six bottles per day-in 1853, 1 peddled it and sold about six bottles per day—in April, 1854, 1 sold over one thousand bottles per day of it. glory. committing verses of scripture has not been as general among the children as could have been desired. This may be owing partly perhaps to the carelessness of the scholar, and it may slightly be owing to the want of attention from the parents at home.

Although as I have said the practice of task learning has not been as general among the scholars as desired, yet many have done their duty in that respect nobly, and stand to-day honored by the approbation of this respectable audience. Let others who heretofore remained indifferent learn a lesson to-day that will stimulate them to greater exertions in the future, that they may stand in the front ranks at the next celebration, if spared to attend another.

To you who are spectators we have a word of welcome, and exhortation. We are glad to see you here ; it gives us much encouragement ; we need your countenance and support; and although you do not meet with us, yet half the work rests upon you at home, in seeing your children studious and attentive to the lessons assigned them, and without your aid our exertions here will be almost in vain. Will you then continue to aid us-will you come up to the help of the Lord-Will you let such a cause languish, in view of the fact that soon those children will have to fill our places, and must meet these responsibilities for themselves, and if a right course is pursued what may they not ac-complish? Look at our nation now, 30 millions in number, in high condition of universal health, able to feed the world with bread, clothe them with cotton, and enrich them with gold ! A people sending forth Liberty and Religion all over the carth, and without an enemy to retard our progress; a people, conveying sparks of lightning unquenched through the depths of the ocean and causing them to flash in the same instant on either shore. A people, riding over their domain by steam, and with the speed of the winds. and communicating to every part of the circumference by electricity, always and forever learning something new. With such a state of things, shall the Sabbath School cause languish? Surely not. Let it prosper ; make it prosper ; cherish it as a great work, as an American, peculiar to the spirit of our institutions ; cherish it as beyond all dispute, a most gracious, and glorious work ; cherish it for our own advartage, but above all that posterity may
