One of the quickest proceedings in the administration of justice, has just taken place in Michigan. On Monday, October 13, William Crosier and William Cronnm, hands on board a wood boat belonging to Chicago, called the Charles Sumner, were sent on shore at Muskegong for milk .---While there they heard of a dance to come off at night, and after dark they took a row boat and went ashore again. They attended the dance, and Crosier accidentally broke a window-glass. William Young and John Powers procured guns, loaded them with buckshot, and swore they would shoot Crosier. He ran away and they pursued him, but, just as Crosier was getting

into the boat, Powers shot him ; he fell into the water, was picked up by his companion, but died almost immediately. Young and Powers were arrested that night; on Tuesday they were lodged in jail; on Thursday they were indicted; on Friday they were arraigned, tried, and convicted of murder; on Monday they were sentenced to solitary imprisonment for life, and on Tuesday night -exactly one week from the time of the murder-they were lodged in the Peniten-

Another link of submarine telegraphic 2000 communication has just been laid. France is now united to her colony of Algeria. Ilitherto a sea distance of one hundred and fortysix miles, between Cagliari, in Sardinia, and the Algerine coast, has remained to be com-pleted. Notwithstanding the shortness of the distance, the depth at one part is equal to the greatest depth of the Atlantic plateau. The cable, however, was paid out rapidly and without accident, and little doubt is enter-

tained of its permanent safety. Newal & Co., of Birkenhead, Liverpool, were the manufacof Birkennead, Liverpool, were the manufac-turers, and they had contracted to take all the risk of the operation. The length of line used was 172 miles, and its cost £50,000. Its construction was different in some important respects from that of the Atlantic cable, and Newal & Co.- consider that a considerable economy might have been effected in the lat ter.

Holloway's Pills .- General debility and a consumption or wasting of the flesh without any apparent cause, are manifestations of disease that puzzle the faculty. The tonics and the aperients of the established pharma-copreia do not reach them, and all mineral preparations hasten the progress of decay. In such cases the reproductive power of the blood is gone. The waste of nature goes on, and the sickly and diluted fluid which circulates through the venous system cannot re-pair the loss. In such a crisis, the invigorating, vitalizing properties of the Pills are stri-king!y exhibited. The blood is enriched and rendered nutritive by their effect upon its alements and upon the organs that eliminate them, and strength soon returns to the muscles, roundness to the frame, and bloom and

INHALATION

CONSUMPTION.

BRONCHITIS, Laryngi'is, and other diseases of the Chest and Throat successfully treat by the Inhalation of Medicated Vapors and Powders, by Absorption and Constitutional Treatment, as practiced at the Stuyvesant Med ical Institute, New York City, N. Y. The unprecedented success which has attend-ed this method of treating diseases of the lungs

and throat, has induced the physicians to depart from their usual course, and avail themselves of the columns of the press to make it known to such as may be laboring under, or predis-posed to such affections. The dawn of a brighter day has at length arrived for the consumptive; the doctrine of the incurability of consumption has now passed away. We have indubitable proofs in our possession, that con-sumption in all its stages can be cured; in the first place, by tubercular absorption; in the second, by the transformation of tubercule into chalky and calcareous concretions; in the third, by cicatrices or scars. Those wedded to the opinion of the past may assert that it is even now incurable; such are behind the age. To all this great truth must be apparent, viz: that medicines inhaled directly into the lungs, whether in the form of vapor or powder, must be more effectual than that taken into the stomach.

Lewistown, National Hotel, Monday, Nov. 14 Mifflin, Patterson House, "16 Huntingdon, Jackson's Hotel "13 Du Hardman treats Consumption, Bronchitis, Laryng-tia, Asthum, and all discases of the Throat by MEDICA-TED INHALATION. The great point is the freatment of all human maiadies is to get at the disease in a direct manner. All medicines are estimated by their action upon the organ requiring rollef. This is the important fact upon which linklation is based. If the stomach is diseased, we take medicine directly into the stomach. If the lungs are diseased, breathe or inhale medicated vapors directly into them.— The reason why Consumption and diseases of the Lungs have heretofore resisted all treatment, has been because they were not approached in a direct manner by medicine. have nerectore resisted all treatment, has been occase they were not approached in a direct manner by medicine. They were intended to be local, and yet they were so ad ministered that they could only act constitutionally, ex-pending their immediate action upon the stomach, whils the foul ulcers within the Langs were normolested. In-balation brings the medicine into direct contact with the disease, without the disadvantage of any violent action. It a andicine is a simule that is may be exclosed by Its application is so simple that it may be employed by the youngest infant or feeblest invalid. It does not de-range the stomach, or interfere in the least with the strength, comfort or business of the patient.

HOLLOWAY'S OINTMENT.

Circular to the Sick.

THE first hospital surgeons and medical publicists of Europe admit the unparalleled anti inflammatory and healing properties of this Ointment; governments sauc-tion its use in their naval and military services; and the masses in this country and throughout the world repose the utmost confidence in its curative properties. It pen-etrates the sources of inflammation and corruption which underlie the external evidences of disease, and neutral-ize the fiery elements which feed and exasperate the malady.

Rheumatism, Scrofula, Erysipelas.

These are among the most terrible and agonizing di-seases of the muscles, the fleshy fibre and the skin; yet in their worst forms, and when seemingly incurable, they invariably disappear under a persevering application of this soothing, healing antidote to pain and inflammation Salt Rheum, Fever Sores, Stiff Joints.

In cases of Salt Rheum, where medical waters, lotions and every recipe of the pharmancoma have proved use-less, the Ointment will accomplish a therough cure. Fe-ver Sores heal quickly under its influence, and its relaxing effect upon contracted sinews is truly wonderful.

Discharging Ulcers.

A most remarkable and happy change is produced in he appearance of malignant ulgers after a few applications of this Ointment. The surrounding redness van ishes, and granules of healthy firsh begin to take the place of the discharged matter. This process goes on more or less rapidly until the orifice is filled up with sound
