THE TERM OF PLANT-LIFE.

The term or period of plant life varies between wide extremes, from the ephemeral mushroom to the church yard Yew whose years are reckoned by thousands .-The term of life for each species is, of growth, yet is often modified by the climate and season. Thus the Castor Oil Bean (Ricinus Communis) is an annual herb in the Northern States, a perennial shrub in the Southern, and a tree some 40 feet high in its native India.

Flowering and fruit-bearing is an exhausting process. If it occurs early in the life of the plant, it generally proves the fatal event. In all other cases, it is either preceded or followed by a state of necessary repose. If flowering be prevented by nipping the buds, the tender annual may live and become perennial, as we see in the Florist's Tree-mignionette.

We distinguish plants as to their term of life, into the annual, the biennial and the perennial. An annual herb is a plant whose entire life is limited to a single season. It germinates from the seed in the Spring, attains its growth, blossoms, bears fruit and dies in Autumn, as the Flax, Tomato, Morning Glory. Such plants, unless they 'sow themselves,' would soon, if neglected, disappear forever from our fields and

A biennial herb is a plant which germinates and vegetates, bearing leaves only during the first season; blossoms, bears fruit, and perishes, during its second sea- will please call and settle their accounts. son; as the Beet and Radish do. Wheat, Rye, &c., are annual herbs, although when sown late in Autumn they have the habit of perennials, in consequence of the prevention of their flowering by the sudden

The Century Plant and the Taliput Palm are examples of herbs (hardly trees) which bearing leaves only, during many years, accumulating materials and strength for one mighty effort in fructification, which being accomplished they die. But although the vital principle is extinguished in the parent, it rests, multiplied a thousand fold in the seeds.

The longevity of trees is an interesting study. While some trees live only a few years, rapidly attaining their growth and rapidly decaying, like the peach tree; others, on the contrary, have a longevity exceeding the age of man, and some species outlive many generations. It is well known that the age of a tree is correctly indicated by the number of wood circles or rings found in the trunk-each ring being the growth of a single year. We here subjoin several remarkable examples, ascertained by the above rule, or by tradition and history, quoted from Le Candolle:

Portions of it have been carried away by floods, but enough remains to overshadow 7,000 men. Its principal trunk is more than 300 feet in girth, and its branches are supported by 350 other trunks, which equal that of our largest oaks, while the smaller are some 3,000

The White Pine (Pinus strobus) of the American forest, with a diameter of 6 or 7 feet attains the height of 180 to 200 feet. In the early settlement of Dartmouth College, a Pine stood upon the College plain which measured 310 feet in height. In the Ohio Valley, the Red Maple (Acer aubrun) and the Sycamore (Platanus occidentalis) attain to great dimensions. A specimen of the former in Indiana measured to make the mixture quite as thick as 16 feet in diameter, of the latter 23 feet.

But all things considered, the monarch of the world, is the Sequoia gigantea, called the California Pine, of Sacramento Valley and Mariposa. One which had fallen measured 31 feet in diameter and 363 feet in length. HIGHLY IMPORTANT TO FARMERS. M. M. FAXON'S

Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills.

The undersigned, having perfected an arrangement for the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the shortest notice, at his Foundry, in McVeytown, Pa. Speakers have notice, at his Foundry, in McVeytown, Pa. Seeders have become an almost indispensable article to the Farmer, and he will find that the attachment of the Gum Spring will enhance its value at least one-half. All the detention and trouble caused by the breaking of wooden pins is entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break, rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Drill is the sim-plest in construction, most economical in performance, and therefore the most durable ever offered to the agriand therefore the most advance ever othered to the agri-cultural public. The feed is so arranged that it will sow 1, 14, 14, 12, and 2 bushels per acre. Persons desiring one for the coming seeding are requested to send in their orders as early as possible. Direct to McVeytown, Mif-flin county, Pa., or F. G. FRANCISCUS, Lewistown; E. L. BULL'S SARSAPARILLA,

FULL QUART BOTTLES, And containing the strength of six times as much pure Honduras Sarsaparilla as any other similar preparation in America.

FEW bottles of this Sarsaparilla, put up A several years ago, rendering it the more valuable, (as all well-informed druggists know that age improves it,) have been deposited at the drug store of Charles Ritz, in Lewistown, where they are offered for sale at three-fourths the regular price, namely 75 cents per bottle.

It has been a well established fact for years past that Sarsaparilla, when pure and properly

prepared, was the only true panacea for all dieases originating from an impure state of the blood, the use of mercury, intoxicating drinks, evil habits in youth, barrenness, &c. We bold evil habits in youth, barrenness, &c. ty assert that JOHN BULL'S FLUID EX-TRACT OF SARSAPARILLA is the only preparation before the public that is prepared on strictly scientific principles and of uniform strength. The sarsaparilla is purchased without regard to price, and every pound, before being used, is subject to the strictest chemical tests, and its genuineness ascertained before being used. Bull's Sarsaparilla also contains the virtues of several other valuable medical roots, together forming the best compound, and producing the greatest curative agent in the known world! This medicine, when used ac cording to directions, has cured
