Johnston, England, and observing the nature of the dis-case in all its stages, during a solution in the southern and western portions of the United States, where it pre-vails to a greater extent than elsewhere, procured from South America certain roots and herbs from which he prepared an "Elizir," which, after eighteen years' use in private practice, has proved itself more efficatious in the cure of Dyspepty than any medicine that has ever been prepared in any age or clime for the same purpose. pared in any age or clime for the same purpose.

Having submitted it, with an explanation of its compo-nents, to a number of physicians of Philadelphia, among whom were the late Drs J seph Hartshorne and J. C. Morton, it has received their entire approval, and man of the medical faculty are now not only prescribing it for their patients but are using it themselves, personally and in their families. As a tonic it is unequalled, and its properties are of so invigorating a nature that it is given with perfect safety and success to the most tender infants. The great success met with in curing the most aggravited cases of Dyspepsy, accompanied sometimes with a high grade of hypochondriasis, has established the most un-bounded coefficience in the curative properties of this bounded confidence in the curative properties of this Elixir, in corroboration of which read the following testinonials:-

In order to give some idea of the sudden rise and great

popularity of the discovery, I will state that in April, 1853, I pedded it and sold about six bottles per day—in April, 1854, I sold over one thousand bottles per day of it.
