Two communications in type are unavoidably postponed until next week.

Upon the marriage of a Miss Wheat. of Virginia, an editor hoped that her path might be flowery, and that she might never be thrashed by her husband.

The Atlantic Telegraph.—On the 10th of June, the Atlantic Telegraph fleet sailed from Plymouth, England, and by the 20th it was supposed, the connection would be made in mid-ocean, and by the 30th the Niagara should have reached Trinity Bay Newfoundland. So long a time has elapsed since the 30th, without the Niagara being reported, that it is most probable that an accident has happened to the cable, and that the fleet has returned to England.

A Herd of Cows in the Air .- The recent whirlwind at, and in the vicinity of Colesville, Md., was the most singular phenomenon, according to the accounts, we have ever read of. The Rockville Journal says further about it, that there issued from it a black smoke which darkened the atmosphere. One gentlemen saw a herd of cows apparently up in the air, and there is every reason to believe that they were blown matter, that he has entirely succeeded. As quarter of a mile. It is said that the horizon was filled with fragments of clothes, shingles, limbs, &c. It rushed on at this rate till it reached the Patuxent river, and there got up, washed their faces, and there its course was suddenly arrested.— This is rather fishy.

SHOCKING FRATRICIDE—A Cain and Abel Scene.-A murder was committed near Norristown, Pa. on Saturday a week by Thomas Ferringer, who killed his brother William by beating him over the head with a club, as Cain did Abel. It appears that the deceased went out of his mother's house, with whom both brothers live, to meet the butcher wagon which runs by the louse and supplies the family with meat. He stood for some moments at the back of the wagon talking with the butcher, when the latter finally went into the house, meeting Thomas Ferringer with a club in his hand. No words passed between the parties that the butcher heard, but his attention was attracted by the sound of blows, and on going out of the house he found under" is often asked. Owing to the William prostrate and his brother beating him over the head with a club. - Deceased was carried into the house and never spoke afterwards. He died on Sunday.

> Washington, July 2 .- The Government has received a letter from Major Ben Mc Cullough, one of the Peace Commissioners, dated Camp Scott, in which he states his belief that one of the reasons why the Mormons deserted their habitations was, to guard their women from the apprehended excessive gal-lantry of our soldiers. Besides, the leaders resorted to this Exodus to keep the people ogether and prevent the dis iffected Saints from throwing themselves on the army for protection. The Mormons do not believe that the army has orders or authority to pursue them, and hence they congratulate them elves that they are out of harm's way from

Major McCullough says that a small force of Mormons are still in Salt Lake City, ready to fire it, perhaps, in the event of the ap proach of the army. He thinks that a great mistake was committed in permitting the Mormons to gather their crops, as this, while it strengthened them, diminished relatively the powers of the military forces. It is still reported that the Mormons are going to Son ora, but upon this full reliance cannot be

Col. McCullough and the other Peace Commissioner, Gov. Powell, were going at once to Salt Lake City, but not with the army. will deign to make this explanation | Their powers are Superior to either those of Governor Cumbing or General Johnston.

A New Et Dorado.-The San Francisco thorn, Sr.

"0, grave, where is thy victory?

"0, the papers are largely occupied with accounts from Washington territory, all concurring in statements that a prolific and apparently inexhaustible auriferous region has been discovered on Frazer and Thompson rivers, in the British Possessions, and in Washington territory. Throughout the entire length and breadth of California, the "Frazer river fever" seems to have seized hold of the pecple, and threatens to break up, or, at least, seriously disarrange for the time being the entire mining business of the State. Such is the condition of affairs at the present moment, and a few weeks more will either create a general stampede, or dampen the ardor and cool the fever heated minds of the thousands who are now struggling with this new gold

The Sacramento Union remarks that the most curious of all coincidences respecting this new land of gold, is, that it is the scene of Bacon's New Atlantis. And as if this were not enough to make it immortal in history, Swift also located here his Brobdignag, that is if Captain Gulliver is to be believed. According to his account, it must have been directly on the Straits of Fuca. And when we come to consider the proportions of some of the stories recently sent down from the Bellingham Bay adventurers, particularly the account of their chief article of food, clams, the size of a kitchen bellows, which being dried, are used by the Indians "for the double purpose of eating and fighting," we begin to think the miners have sure enough come upon the scene of Captain Samuel Gulliver's exploits. It is possible they may have only borrowed the bellows illustration to inflate their accounts, and as the Indians of which they write are said to be the Flatheads. they may have had in their minds a similar

WEST'S Patent Galvanic Cement

For Roofing. THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing wherever desired—the roof being sheeted by the owner. Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of Imperviousness to Water, Incom-bustibility, Durability and Cheapness. No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to

now applied, First-It is completely impervious to water. Water may continually stand upon the roof without affecting it in the least.

Second-It is fire-proof. It is so incombus-tible that it will afford ample and perfect protection against fire, sparks and burning shingles from another building immediately ad-

Third-It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse,

Fourth—It is cheap. Roofs will be put on for about half the cost of tin, and will last uch longer.
Fifth—Repairs are easily and cheaply made. Sixth -It is sufficiently elastic to entirely resist the expansion and contraction by heat

and cold, and will remain perfect and solid in the warmest and coldest weather. Seventh-It is adapted to all kinds of roofs,

either flat or steep.
Eighth—It is valuable for repairing old Old shingle roofs may be covered without removing the shingles. Old metalic oofs can be made perfectly tight and secure. Ninth-It is especially adapted to all kinds seaming around battlements, sky-lights and chimneys, and for the lining of cave troughs and gutters. Roofs which have given trouble for years, and which have continued

to leak in spite of all efforts, can be made perfectly secure by this cement. Tenth-It has been proved to be the best article ever used for covering car tops and steamboat decks.

Eleventh-This cement applied to new tin ofs preserves them from rusting, by furnishing a coat which is at once impervious to water and an almost perfect non-conductor of

Twelfth-It is the only roofing material patented which contains India rubber and gutta percha.

For particulars of this cement, owners of

property will please address E. LOCKE, Locke's Mills, Mifflin co., Pa.

HOLLOWAY'S OINTMENT.

Circular to the Sick.

THE first hospital surgeons and medical publicists of Europe admit the unparalleled anti inflammatory and healing properties of this Ointment; governments sanc-tion its use in their nava! and military services; and the masses in this country and throughout the world repose the utmost confidence in its curative properties. It penetrates the sources of inflammation and corruption which underlie the external evidences of disease, and neutralize the fiery elements which feen and exasperate the

Rheumatism, Scrofula, Erysipelas,

These are among the most terrible and agonizing di-seases of the muscles, the fleshy fibre and the skin; yet in their worst forms, and when seemingly incurable, they invariably disappear under a persevering application of this soothing, healing antidote to pain and inflammation Salt Rheum, Fever Sores, Stiff Joints.

In cases of Salt Rheum, where medical waters, lotions and every recipe of the pharmacopæa have proved use-less, the Ointment will accomplish a thorough cure. Fe-ver Sores heal quickly under its influence, and its relax-ing effect upon contracted sinews is truly wonderful.

Discharging Ulcers. A most remarkable and happy change is produced he appearance of malignant ulcers after a few applica tions of this Ointment. The surrounding redness van ishes, and granules of healthy flesh begin to take the place of the discharged matter. This process goes on more or less rapidly until the orifice is filled up with sound material, and the ulcer radically cured.

A Word to Mothers.

The young are most frequent sufferers from external injuries, and therefore every mother should have this nealing preparation constantly at hand. It is an absolute specific for sore breasts, and quickly removes the encrus-ted sores which sometimes disfigure the heads and faces

Significant Facts. This Ointment is universally used on board the Atlan ic and Pacific whaling fleet as a cure for scorbutic affec-tions, and as the best possible remedy for wounds and bruises. Large supplies of it have recently been ordered by the Sultan of Turkey for hospital purposes.

Both the Ointment and Pills should be used in the following Cases: the Jollowing Cases:

Lumbago Sore Legs Scalds

Burions Mercurial Er-Sore Breasts Swel'd Glands

Chapp'd hands uptions Sore Heads Stiff Joints

Chilbiains Piles Sore Throats Ulcers

Fistulas Rheumatism Sores of all Venerealsores

HIGHLY IMPORTANT TO FARMERS. M. M. FAXON'S

Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills. THE undersigned, having perfected an arrangement for The attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the shortest notice, at his Foundry, in McVeytown, Pa. Seeders have become an almost indispensable article to the Farmer, and he will find that the attachment of the Gnm Spring will enhance its value at least one-half. All the deten tion and trouble caused by the breaking of wooden pine is entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Drill is the sim plest in construction, most economical in performance; and therefore the most dorable ever offered to the agricultural public. The feed is so arranged that it will so 1, 12, 14, 14, and 2 bushels per acre. Persons desiring one for the coming seeding are requested to send in their orders as early as possible. Direct to McVeytown, Mifdin county. Pa., or F G. FRANCISCUS, Lewistown. E. L. FAXON, Hollidaysburg, Blair co., Pa; BOYER BRO., Harrisburg, Pa., who are authorized to ac agents, and from whom any further information may be

PRICE OF DRILLS, with the attachment, \$75. F ners who already have drills, can have themaltered, a the India Rubber Spring attached, for from \$10 to \$15 All branches of the FOUNDRY BUSINES- t carried on, for which orders are respectfully so.

M. M. Y.
