WEST'S Patent Galvanic Cement

THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing wherever desired-the roof being sheeted by the owner. Scientific men under the direction of government, and ar-chitects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of Imperviousness to Water, Incom-bustibility, Durability and Cheapness. No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and com-positions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded. As now applied.

First-It is completely impervious to water. Water may continually stand upon the roof without affecting it in the least.

Second-It is fire-proof. It is so incombus-tible that it will afford ample and perfect proection against fire, sparks and burning shingles from another building immediately ad-

Third-It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse,

New York. Fourth—It is cheap. Roofs will be put on or about half the cost of tin, and will last nuch longer. Fifth- Repairs are easily and cheaply made.

Sixth -It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather.

Seventh-It is adapted to all kinds of roofs. either flat or steep. Eighth-It is valuable for repairing old

roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure.

Ninth-It is especially adapted to all kinds of seaming around battlements, sky-lights and chimneys, and for the lining of eave troughs and gutters. Roofs which have given trouble for years, and which have continued to leak in spite of all efforts, can be made perfectly secure by this cement. Tenth—It has been proved to be the best this mild but thorougn ane the best remedy known in the world for the following Diseases:

article ever used for covering car tops and teamboat decks.

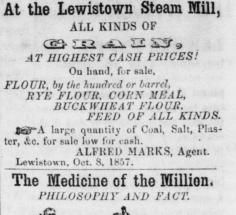

Eleventh .-- This cement applied to new tin roofs preserves them from rusting, by furnishing a coat which is at once impervious to water and an almost perfect non-conductor of

Twelfth-It is the only roofing material patented which contains India rubber and gutta percha.

THE NATIONAL COMPLAINT.

Dyspepsia is the most common discuse among all clas-ses in this country. It assumes a thousand shaper, and is the primary source of innumerable dangerous malad es; but whatever its type or symptoms, however obstinate its resistance to ordinary preparations, it yields readily and rapidly to this searching and unerring remedy.

BILIOUS AFFECTIONS.

The quantity and quality of the bile are of most vital importance to health. Upon the liver, the gland which secretes this fluid, these Pills operate specifically, infail-bly rectifying its irregularities and effectually curing Jaundice, Bilious Remittants, and all the varieties of dis-ease generated by an unnatural condition of the organ. BOWEL COMPLAINTS.

Unless the bowels perform their functions properly, the whole body suffers. Tens of thousands die annually of Dysentery, Diarrhea, Chronic Constipation, and other diseases of these waste pipes of the system. The effect of the Pills upon all intestinal disorders, whether casual or epidemic, is a phenomenon in medicine. By following the printed directions, the most alarming cases of bowel mplaint are pr
