### THE ·Dodoeneesed.

#### GENERAL DIRECTIONS FOR PRE SERVING.

Perhaps at the present season a few generl hints on preserving for the use of a young house wife may be acceptable. Several of the directions may appear needless; but there may be some inexperienced persons to whom they may be beneficial. 1. Let everything used for the purpose

be clean and dry; especially bottles. 2. Never place a preserving pan flat on

the fire, as this will render the preserve liable to burn as it is called; that is to say, to adhere closely to the metal, and then to burn; it should always rest on a trevet or on the lower bar of the kitchen range.

3. After the sugar is added to them, stir the preserves gently at first, and move quickly towards the end, without quitting them until they are done; which precaution will prevent their being spoiled.

4. All preserves should be perfectly cleared from the scum as it rises.

5. Fruit which is to be preserved in syrup must first be blanched or boiled gently, nutil it is sufficiently softened to absorb the sugar, and a thin syrup be poured over it at first, or it will shrivel instead of remaining plump and becoming clear. Thus, if its weight of sugar is allowed and boiled to a syrup with a pint of water to the pound, only half the weight must be taken at first, and this must not be boiled with the water more than fifteen or twenty minutes at the commencement of the process. A part of the remaining sugar must be added every time the syrup is reboiled unless it should be otherwise directed in the receipt.

6. To preserve both the true flavor and the color of the fruit in jams and jellies, boil them rapidly until they are well reduced before the sugar is added, and quickly afterwards, but do not allow them to become so much thickened that the sugar will not dissolve in them easily, and throw up its scum. In some seasons the juice is so much richer than in others that this effect takes place almost before one is aware of it; but the drop which adheres to the skimmer when it is held up, will show the state it has reached.

7. Never use tin, iron or pewter spoons or skimmers, as they will convert the color of red fruit into a dingy purple and impart besides a very unpleasant flavor.

8. When cheap jams or jellies are required make them at once with sugar, but use that which is well refined always for preserving in general. It is a false economy to purchase an inferior kind, as there is a great waste from it in the quantity of scum which it throws up.

9. Pans of copper or bell metal are the proper utensils for preserving fruit. When used they must be scoured bright with

#### FREEDURG ACADEMY AND

Snyder County Normal School, FREEBURG, PA.

THE next session of this Institution commences on the 27th of JULY, and continues 22 weeks. Encouraged by past success, increased efforts will be made to enable students to acquire sound mental, moral and physical education. The Academic Department embraces all the branches constituting a thorough English, Clas-sical, Mathematical and Scientific Education, together with Music, Drawing, Painting and French.

#### A NORMAL DEPARTMENT

has been established and heretofore well attended, in which Teachers, and those wishing to become such, can prepare themselves for the profession.

Terms-Half in Advance.

For Board, Tuition, Room, &c., per session of 22 weeks, \$52 to \$60 Tuition alone, per quarter of 11 wks. \$4 to \$6 Music, Drawing, Painting and French at

### WEST'S Patent Galvanic Cement

For Roofing.

THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing wherever desired-the roof being sheeted by the owner. Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of Imperviousness to Water, Incombustibility, Durability and Cheapness. No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and com-positions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded. As now applied,

First-It is completely impervious to water. Water may continually stand upon the roof without affecting it in the least.

Second-It is fire-proof. It is so incombustible that it will afford ample and perfect protection against fire, sparks and burning shingles from another building immediately adoining.

Third-It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse New York.

Fourth-It is cheap. Roofs will be put on for about half the cost of tin, and will last much longer.

Fifth-Repairs are easily and cheaply made. Sixth -- It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather.

Seventh-It is adapted to all kinds of roofs, either flat or steep. Eighth-It is valuable for repairing old

roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure Ninth-It is especially adapted to all kinds of seaming around battlements, sky-lights and chimneys, and for the lining of eave troughs and gutters. Roofs which have given trouble for years, and which have continued to leak in spite of all efforts, can be made perfectly secure by this cement.

Tenth-It has been proved to be the best article ever used for covering car tops and steamboat decks.

roofs preserves them from rusting, by fur-nishing a coat which is at once impervious to

ap15

A New York, caused the death of 76 persons out of deaths in one week, and 131 deaths by consumption in duced by dyspepsia. As it is a well attested fact that dyspepsia is the origin of the sufferings of a large portion of those who die of consumption, it becomes the duty of every one to use such precautions against and remedies for dyspepsia as science and experience have placed be-fore them, and which have proved to be efficacious. Of this character is DR. WILLIAMS' ANTI-DYSPEPTIC ELIXIR, in corroboration of which read the foliowin testimonials. From Mr. R. D'Arni, New York, Dear Sir-My wife had been suffering with Dyspep very severely for a long time, and has been attended two physicians for about six weeks, from which attend ance she received no relief. I recently procured you Elixir for her, and after taking one bottle she is complet ly cured. I can safely say I never knew of a medicing having so quick effect in so short a time. Very respectfully yours, RUDOLPH D'ARNI, Teacher of Drawing and Music, 267 Broadway, N. Y. Extract of a letter from Mr. H. N. Winans, New York, to his friend in Philadelphia. Do you recollect that bottle of Williams' Elixir that was leaking in your trunk, and you gave to me to get rid of ? Well, for curiosity, I thought I would try if it would relieve me of the Dyspepsia, which I have had for some ime, and for which it is recommended, and I am happy to say it has quite cured me, and would recommend it to any one similarly affected Signed, H. N. WINANS, 91 Water st., N. Y.

#### ----

Sauce for Baked Puddinys .- A very cheap sauce can be made by simply sweetening a bowl of rich cream, and spicing it with nutmeg, cinnamon or vanilla. A still richer sauce is made by mixing two parts sugar with one of butter, whip them to a froth, spice as above, and add a little wine or brandy if liked, but a spoonful of it at sharp vinegar will do as well. Another kind is made by thoroughly mixing a little flour with the butter and sugar, and then pouring on boiling water till it is of the consistency of thin cream, adding the wine or vinegar, and spicing to taste.

### HIGHLY IMPORTANT TO FARMERS. M. M. FAXON'S

Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills. THE undersigned, having perfected an arrangement for the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the shortest notice, at his Foundry, in McVeytown, Pa. Seeders have become an almost indispensable article to the Farmer, and he will find that the attachment of the Gum Spring will enhance its value at least one-half. All the deten tion and trouble caused by the breaking of wooden pins is entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break. breaking, for if there is an article that will neither break, rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Drill is the simplest in construction, most economical in performance, and therefore the most durable ever offered to the agricultural public. The feed is so arranged that it will so cultural public. The feed is so arranged that it will sow 1,  $1\frac{1}{4}$ ,  $1\frac{1}{5}$ ,  $1\frac{3}{4}$ , and 2 bushels per acre. Persons desiring one for the coming seeding are requested to send in their orders as early as possible. Direct to McVeytown, Mif-flin county, Pa., or F. G. Dr. J. Williams-After suffering from Dyspepsia for a considerable time and failing to obtain any permanent relief, I was induced to try your Elixir. I must confess I had not much confidence at first, but in about two weeks was most agreeably surprised to find I was rapidly im-proving in health; I am now much fatter than ever before and I am in as good if not better health than I ever was

in my life. Very truly yours, &c., WILLIAM VARD, 6 City Row.

An Invaluable Remedy for Dyspepsia. Read the testimony of the wife of Mr. John Stiles, on the Frankford Road, near the first toll gate. FRANKFORD ROAD, Oct. 25, 1849. Dr. James Williams—Having recently understood that

it is your intention to resume the preparing of your Anti-Dyspeptic Elixir, and being anxious that others may be benefitted by its use as I have been, I herewith send you for publication, if you think proper, a statement of the effectual cure produced on me by it. For a number of years I have been suffering to such an extent that I became so much deblitated, and the digestive powers so uch destroyed, that it was with difficulty I could take and retain sufficient nourishment to support life. Neith-er myself nor my friends were aware that my suffering er myseit nor my frends were wate that my sine my proceeded from indigestion; in the year 1839 my attention was directed by my husband to your advertisement, at that time published in some of the city papers, explaining the causes and symptoms of dyspepsia, and co offering a remedy. I immediately procured and used some of your medicine with the most signal suc-cess; from a state of debility, languor, and nervousness, and complete loss of the power of digestion, so great that I could take at first only five drops of the Elixir at a dose, I was in a few days much relieved, and by continuing it a short time I have been restored to health, strength, and vigor, which I still retain. Itake great pleasure, sir, in making known the efficacy of your Anti Dyspeptic Efixir, and sincerely hope it may be the means of induc-
