

LOCAL AFFAIRS.

RAILROAD ACCIDENTS.—Two railroad accidents were briefly noted in part of our edition last week. The first occurred about two miles this side of Huntingdon by a freight train running into a wagon containing David Myerly of Traugh creek and two of his daughters. The Journal describes the scene as follows:

They had been at this place on business, and when returning home in their two horse wagon, encountered the emigrant train of cars at the crossing about two miles below this place. The crossing is so situated that neither party could see any distance, the wagon was just clearing the track when the train came in sight, and the horses becoming very much frightened, pranced and backed the wagon on the track just as the train came up; the engine struck the wagon with such force as to throw Mr. Myerly and eldest daughter on the ground and the younger daughter was thrown upon the cow catcher; the force of the train by some means disengaged the horses, and the wagon was precipitated into the canal. Mr. Myerly lingered about twenty-eight or thirty hours, and died. He was about 62 years of age. The elder daughter is a widow and although severely injured, will probably recover. The younger daughter is able to be about.

The other accident occurred in the deep cut above Newton Hamilton by the engine of the express train west running off a switch which it is said a conductor of a freight train had neglected to replace. The watchman was at his post holding a white flag, and of course there was no cessation in the speed of the locomotive, which ran with great force against the rocky side, breaking the engine into pieces. The express messenger, Jeremiah Kane, was so severely injured as to cause his death a short time afterwards, and the fireman, Solomon Hoffmaster, of Harrisburg, was badly scalded but is now recovering. The engineer escaped with a few burns by jumping off. None of the passengers were injured beyond a few scratches, though many were sadly frightened. A special locomotive was immediately despatched from Altoona, and the train arrived at Pittsburg five hours after its regular time.

CLOSE OF THE NORMAL CLASS.—The Mifflin County Normal Class, under the direction of A. D. Hawn, County Supt., closed its late session Sept. 15th. This session has been eminently successful, and has exceeded all former ones in respect to numbers and improvement. Forty-six teachers have been in attendance during the session.

At a meeting of the Class, held Sept. 15th, the following resolutions were read and adopted:

Resolved, That the thanks of the members of the Normal Class are hereby tendered to County Supt. A. D. Hawn and his worthy assistant, S. Z. Sharp, for the efficient and energetic manner in which they have discharged their duties as instructors.

Resolved, That we are more than ever convinced of the importance of Normal Schools, and would earnestly commend them to all who may be desirous of improvement in the science and art of teaching.

Resolved, That we recognize District Associations as among the most efficient means of improving the teacher in his profession, and would recommend their establishment wherever practicable.

Resolved, That we return our thanks to the Board of School Directors of Lewistown for the use of the school building and apparatus.

Resolved, That these resolutions be published in the papers of this county.

MARKETS.—The butchers of this borough have determined, in pursuance of a late borough ordinance, to hold market three times a week, and with that view commenced on Tuesday morning last. The holding of markets regularly is an accommodation the want of which would only be felt should they once be discontinued. We have lived in places where meat could only be obtained when somebody saw proper to butcher, and therefor can speak from experience. Col. Butler, J. Thomas, Major & Shinn, and B. J. Sills & Co. were in attendance on Tuesday last, and had a variety from which a selection could not fail to be made. By the by, Col. Butler favored us with a string of sausage and pudding which were pronounced excellent.

There is a great deal of 'good advice' tendered just now in the newspapers from the Flea Bite up, to the Chief Burgess and Town Council on matters most of which are as much the business of every good citizen as of those authorities. Some want the Burgess to play Constable, hog and dog catcher, and do the business of the Governor, courts, and all the rest of the officers, together with a sprinkling of their own.

The slaughter house of B. J. Sills was entered on Monday night by some persons unknown who stole therefrom a quantity of sausage, pudding, &c. An example or two is wanting again.

After a dry spell of considerable duration, it commenced raining yesterday with some appearances of continuing. Our farmers are busily engaged in topping corn, but will hardly object to a wet spell, if not too long.

The Democrat has half a notion to come under our platform, but would like a little of Buchanan federalism mixed with it. Oxygenated Bitters.—This remedy for dyspepsia, which astonishes all who have used it, by its instantaneous and almost miraculous effect, has obtained a distinction and popularity beyond any medicine we have ever known. Sold by Charles Ritz, Lewistown.

Wm. F. Wagoner of Snyder and Col. John J. Patterson of Juniata, have been nominated as candidates for the Legislature in the Union district. This action of the conferees leaves Union county without a candidate for either branch of the legislature—a wrong step, we fear.

Meeting of the Congressional Conferees. Pursuant to agreement the Congressional Conferees of the American Republican party assembled at Williamsport on Tuesday, the 7th instant, at 2 o'clock p. m. The following Conferees presented themselves and answered to their names:

Centre—W. W. Brown, Daniel Rhodes, John Hassan. Sullivan—H. Metcalf, Wm. Moyerly, A. C. Wilber. Potter—J. B. Overton, A. C. Taggart, Isaac Benson. Lycoming—E. D. Trump, G. A. Cramer, Robert Hawley. Clinton—George Hopson, Thomas Kitchen, John S. Furst. Mifflin—

The Conferees organized by electing John Hassan, of Centre county, President, and Robert Hawley, of Lycoming, Secretary. The Conferees of Mifflin county not being present, Conference adjourned to meet at 5 1/2 o'clock.

Evening Session. The Conference re-assembled at the office of G. W. Youngman, Esq., when the following Conferees from Mifflin county presented themselves:

E. E. Locke, G. W. Elder, Geo. Frysinger. On motion of Messrs. Brown and Benson, the Conference took a recess for half an hour. At the expiration of the recess the President called the Conference together, when, on motion of Mr. Frysinger, they proceeded to nominate candidates. Jas. T. Hale and B. Rush Petrigen were nominated. The Conference then proceeded to ballot with the following result:

For Jas. T. Hale—Messrs. Hassan, Brown, Rhodes, Overton, Moyerly, Wilber, Locke, Elder, Frysinger, Cramer, and Hawley—11. For B. R. Petrigen—Messrs. Hopson, Kitchen, Furst, Taggart, Benson, Metcalf, and Trump—7.

Mr. Hale having received a majority of the votes cast, was declared the nominee. On motion, the nomination of Mr. Hale was made unanimous.

On motion of Mr. Brown, a committee of three was appointed to wait upon Mr. Hale and invite him into the Conference. The President appointed Messrs. Benson, Brown and Furst, said committee. The committee retired, and in a short time returned, escorting Mr. Hale, who was informed by the President that he had received the unanimous nomination of the Conference for election to Congress, on the 2d Tuesday of October next. Mr. Hale expressed his thanks for the honor conferred, but declined making a speech. On motion, adjourned.

JOHN HASSAN, Pres. ROBERT HAWLEY, Sec'y.

The steamship Vanderbilt arrived at New York, brings advices from Europe to the 1st instant, four days later. The news is only of secondary interest. The most important intelligence is from China. A telegram published in the Paris Moniteur from Baron Gros, dated at Tien Sien, June 19, contains a full confirmation of the reports relative to the treaty of peace previously published. The whole empire is thrown open to Christianity, and nearly the whole of it to commerce; diplomatic agents will be allowed to reside temporarily at Peking; missionaries will be admitted everywhere, and Chinese envoys will be sent to other countries. The final meeting of the Court of Directors of the East India Company was held on the 1st inst. At the close of the meeting the existence of that ancient and hitherto powerful corporation terminated. The Queen returned from Prussia to England on the 31st ult. Twelve ships had been wrecked on the English coast within a week.

LEWISTOWN ACADEMY. A. J. Warner, Principal.

THE next session of this Institution will commence on MONDAY, August 30th, under the supervision of the former Principal. A new system of Classification will be adopted in the school, and a full and thorough course of study adapted to each department. It is designed to put the Academy, in every respect, on an equal ground with first-class institutions of its kind, and thereby offer favorable inducements to students generally. ROOMS AND BOARDING can hereafter be had in the Academy Building to accommodate students—ladies or gentlemen—from abroad, or they can be obtained elsewhere at moderate rates. Those desiring further information can obtain circulars by addressing the Principal. Lewistown, August 19, 1858.

TO TEACHERS. A TEACHERS' INSTITUTE will be held at McVeytown, to commence Monday, September 20th, at one o'clock, and continue one week. Prof. F. A. ALLEN has been engaged to conduct the exercises. THE LIVER INVIGORATOR PREPARED BY DR. SANFORD. Compounded entirely from GUMS.

Is one of the best Purgative and Liver Medicines now before the public, that acts as a Cathartic, easier, milder, and more effective than any other. It is not only a Cathartic, but a Liver remedy, acting first on the Liver to eject its morbid matter, then on the stomach and bowels to carry off that matter, thus accomplishing two purposes effectually, without any of the painful feelings experienced in the operations of most Cathartics. GREAT IMPROVEMENT IN COOKING STOVES! Consumption of Smoke & Gas & Saving of Fuel!

THE subscriber takes pleasure in offering to his customers a new Patented Gas-burning Cooking Stove, under the best stove made. It is well known that all inflammable matter requires a certain amount of air to support combustion, and if the supply is insufficient it is impossible to produce a flame. The heat of the fire, in ordinary cooking stoves, decomposes the fuel, and as all the fresh air is admitted under the grate, its oxygen is exhausted before it has passed through the fire chamber. The close flues at the top of the stove then act as an extinguisher, tending to put out the fire by assisting the combustion. A large portion of the fuel, therefore, passes off in the shape of smoke, clogging up the flues of the stove so as to impede the draft and interfere with the baking, or of invisible gas which combines with the lime and so destroys the mortar of the chimneys, loosening the bricks, and exposing the dwellings to the danger of fire.

The introduction of an additional supply of cold air would cool the gas below the igniting temperature, but by the proper application above the fire of air previously heated to a temperature of several hundred degrees (which is one of the prominent features of the patent) the gases are inflamed in numerous jets, and their combustion is sufficient to heat the oven, even if the draft through the fire chamber is entirely closed. In addition to the ordinary draft under the grate and through the fire chamber, the gas-burner has an additional draft through the top plates, which is of itself sufficient to maintain combustion. The upper draft not only consumes the gases, but it helps to strengthen and preserve the centre pieces which are most exposed to the direct action of the fire, and which are made double instead of the usual single plates. By this draft, alone, all the operations of cooking can be performed on when the fuel is but partially ignited, and the fuel consequently burns more slowly and more economically. A sufficient evidence of the effect of the gases in heating the oven is found in the fact that the oven will be ready for baking even before the fire is thoroughly kindled, and much sooner than in any other.

There is scarcely a household in the foregoing long list of names where the new Gas-burning Cooking Stoves will not be used all over. The operation is so perfect and its consumption of fuel so small in comparison with other cooking stoves, and its heat so easily regulated, (burning more or less as desired,) that every one who uses one of these stoves will have nothing else.
