From the True Democrat, August 11, 1856. For Director of the Poor, John Peachey, of Menno township, one of the staunch and reliable farmers of Kishacoquillas valley was nominated, as a man EMINENTLY QUALI-FIED TO PROTECT THE PUBLIC INTER-ESTS. An effort was last year made, and will probably be again, to sell the old Poor House farm, with a view of purchasing one more eligible and suitable, and therefore it is important that A PRUDENT, SAFE, AND DISCRIMINATING MAN be elected as Director of the Poor, for should the project be carried out, a reckless disregard of the public interests, such as was manifested in making jail contracts, might plunge the county into an inextricable debt. ALL WHO KNOW MR. PEACHEY GUARANTEE HIS ABIL-ITY AND INTEGRITY FULLY EQUAL THE DISCHARGE OF THE IMPOR-TANT TRUST the Democracy desire to commit to his keeping.

Dr. Bower before the Election Last Year.

"We have FULL AUTHORITY for saying that Dr. Bower will not vote for any appropriation to the Sunbury and Eric Railroad Company. No such project is or has been contemplated, and no such appropriation asked for by that Company. This the Gazette knows as well as we do-and yet it has the unfairness to allege that Dr. Bower is committed to such action. But further, our candidate, Dr. Bower, is opposed in toto to GRANT-ING THE CREDIT OF THE STATE as a loan OR IN ANY OTHER SHAPE, either to the Sunbury and Eric Railroad Company, or to any other corporation for any amount whatever. Will the Gazette do the Democratic party and its candidates the common justice to say so, now that it has repeatedly alleged and insinuated the contrary?"

Part of another article in the same pa "There is not a district in the State in which the Sunbury and Erie bill is now made the issue, and not a single newspaper, of any polities, (as far as we can find,) advocates the passage of any bill for the relief of, or to aid the construction of that road. A Democratic legislature last winter voted down the Sunbury and Erie bill, by a very emphatic majority and should the next legislature be Democratic, (of which there is no reasonable doubt,) we are satisfied no attempt to pass such a bill will be made, not only because it is well known it could not pass, but because the contingency which induced the friends of that road to so licit a pledge of State bonds to aid the Company in obtaining loans, (an appropriation of money was never asked,) will no longer exist. The Gazette's incessant harping upon the 'appropriation of \$3,000,000 to the Sunbury and Erie Railroad,' &c., is, consequently, all 'Buncombe'—merely to deceive the people, by making them believe a question is at issue which really is not. A man must be blind indeed who cannot see into that game -that 'great cry over little wool.'

Dr. Bower after the Election. On the final passage of the bill selling

(or giving away) the public works to the Sunbury and Erie Railroad Company, and lending the credit of the State by endorsing the bonds, the vote stood-

* AYE-DR. BOWER. What voter, what taxpayer, will place

any confidence in future promises made for or by him? Or what voter will hereafter believe anything the True Democrat may say respecting the course of its candidates?

DYSPEPSIA,

As shown by the statements of the Board of Health of New York, caused the death of 76 persons out of 611 deaths in one week, and 131 deaths by consumption in-duced by dyspepsia. As it is a well attested fact that dyspepsia is the origin of the sufferings of a large portion of those who die of consumption, it becomes the duty o every one to use such precautions against and remedie for dyspepsia as science and experience have placed be fore them, and which have proved to be efficacious. Of this character is DR. WILLIAMS' ANTI-DYSPEPTIC ELIXIR, in corroboration of which read the following

Dear Sir-My wife had been suffering with Dyspepsis very severely for a long time, and has been attended by two physicians for about six weeks, from which attendance she received no relief. I recently procured your Elixir for her, and after taking one bottle she is completely cured. I can safely say I never knew of a medicine having so quick effect in so short a time.

Very respectfully yours, RUDOLPH D'ARNI,

Teacher of Drawing and Music, 267 Broadway, N. Y. Extract of a letter from Mr. H. N. Winans, New York,

to his friend in Philadelphia.

Do you recollect that bottle of Williams' Elixir tha was leaking in your trunk, and you gave to me to get rid of? Well, for curiosity, I thought I would try if it would relieve me of the Dyspepsia, which I have had for some time, and for which it is recommended, and I am happy to say it has quite cured me, and would recommend it to any one similarly affected. Signed, II. N. WINANS, 91 Water st., N. Y.

Dr. J. Williams-After suffering from Dyspepsia for a considerable time and failing to obtain any permanent relief, I was induced to try your Elixir. I must confess I had not much confidence at first, but in about two weeks was most agreeably surprised to find I was rapidly improving in health; I am now much fatter than ever before and I am in as good if not better health than I ever was Very truly yours, &c., WILLIAM YARD, 6 City Row.

An Invaluable Remedy for Dyspepsia. Read the testimony of the wife of Mr. John Stiles, or he Frankford Road, near the first toll gate.

FRANKFORD ROAD, Oct. 25, 1819.
Dr. James Williams—Having recently understood that is your intention to resume the preparing of your Anti-Dyspeptic Elixir, and being anxious that others may you for publication, if you think proper, a statement of the effectual cure produced on me by it. For a number of years I have been suffering to such an extent that I became so much debitiated, and the digestive powers so much destroyed, that it was with difficulty I could take and retain sufficient nourishment to support life. Neither myself nor my friends were aware that my suffering proceeded from indigestion; in the year 1839 my attention was directed by my husband to your advertisement, at that time published in some of the city papers, explaining the causes and symptoms of dyspepsia, and confidently offering a remedy. I immediately procured and used some of your medicine with the most signal success; from a state of debility, languor, and nervousness and complete loss of the power of digestion, so great that I could take at first only five drops of the Elixir at a dose was in a few days much relieved, and by continuing i short time I have been restored to health, strengti ad vigor, which I still retain. I take great pleasure, si in making known the efficacy of your Anti Dyspeptic Elixir, and sincerely hope it may be the means of indu-

HANNAH STILES. Very respectfully, &c., The Elixir is sold in bottles at \$! each, or six bottles Proprietor, JAMES WILLIAMS, M. D.,

WEST'S

Patent Galvanic Cement

For Roofing. THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing wherever desired—the roof being sheeted by the owner. Scientific men | sant by mail (in a sealed letter envelope) Free of Cha under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of Imperviousness to Water, Incombustibility, Durability and Cheapness. No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than has been established and heretofore well at- a new roof. The various cements and comtended, in which Teachers, and those wishing | positions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded. As now applied.

First-It is completely impervious to water. Water may continually stand upon the roof without affecting it in the least.

Second-It is fire-proof. It is so incombustible that it will afford ample and perfect protection against fire, sparks and burning shingles from another building immediately ad-

Third-It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse,

Fourth—It is cheap. Roofs will be put on for about half the cost of tin, and will last much longer.

Fifth-Repairs are easily and cheaply made. Sixth -It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather.

Seventh-It is adapted to all kinds of roofs, either flat or steep.
Eighth-It is valuable for repairing old

roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure. Ninth-It is especially adapted to all kinds seaming around battlements, sky-lights and chimneys, and for the lining of eave troughs and gutters. Roofs which have given trouble for years, and which have continued

to leak in spite of all efforts, can be made perfectly secure by this cement.

Tenth—It has been proved to be the best article ever used for covering car tops and steamboat decks.

Eleventh-This cement applied to new tin roofs preserves them from rusting, by furnishing a coat which is at once impervious to water and an almost perfect non-conductor of

Twelfth-It is the only roofing material patented which contains India rubber and gutta percha. For particulars of this cement, owners of

property will please address E. LOCKE, Locke's Mills, Mifflin co., Pa.

HOWARD ASSOCIATION.

PHILADELPHIA.

A Benevolent Institution, established by special endowmen for the relief of the sick and distressed. afflicted with Virulent and Epidemic Diseases.

TO all persons afflicted with sexual diseases, such as Spermatorrhoza, Seminal Weakness, Impotence, Gon-orrhoza, Gleet, Syphilis, the vice of Onanism or Self Abuse, &c. &c.

The Howard Association, in view of the awful destruction of human life caused by sexual diseases, and the deceptions practised upon the unfortunate victims of such diseases by Quacks, several years ago directed their Consulting Surgeon, as a Charitable Act worthy of their name, to open a Dispensary for the treatment of the name, to open a Dispensary for the treatment of this class of diseases, in all their forms, and to give Medical Advice GRATIS, to all who apply by letter, with a description of their condition, (age, occupation, habits of life, &c.) and in cases of extreme poverty to furnish Medicines Free of Charge. It is needless to add that the Association commands the highest medical skill of the age, and will furnish the most approved modern treatment. The Directors, on a review of the past, feel as sured that their labors in this sphere of benevolent effort have been of great benefit to the afflicted, especially to the young, and they have resolved to devote themselves with renewed zeal to this very important but much de

spised cause.

Just published by the Association, a Report on Spert, Dr. GEORGE R. CALHOUN, Consult ing Surgeon Howard Association, No. 2 South Ninth Street, Philadelphia, Pa. By order of the Directors. EZRA D. HEARTWELL, President.

WM. BUTLER. Lewistown, April 29, 1858.

Agricultural, &c.

How to Make Tomato Figs. -Pour boil. ing water over the tomatoes in order to remove the skins; then weigh them and place them in a stone jar, with as much sugar as you have tomatoes, and let them stand two days, then pour off the syrup and boil and skim it until no seum rises. Then pour it over the tomatoes, and let them stand two days, as before, then boil and skim as before. After the third time, they are fit to dry, if good weather; if not let them stand in the syrup until drying weather. Then place on large earthen plates or dishes and put them in the sun to dry, which will take about a week, after which pack them down in small wooden boxes, with fine white sugar between every layer. Tomatoes prepared in this manner will keep for years.

Hiving Bees .- We have lately read a very sensible plan for hiving a swarm of bees. Watching them as they came from the hive, and seeing where they were gath. ering to settle on a tree, the owner put a large woollen-yarn stocking on a pole, and diately the bees began to alight upon it and were soon all clustered, when he gently lowered the pole to a table which the good wife had prepared while he held the swarm and then placing the hive over the bees, the pole was withdrawn from the stocking and in five minutes they went to work cleaning out their new house.

The next day, the "woman folks" hived a swarm in the same way without any man

Transplanting Corn .- We believe there is not sufficient knowledge among the farmers or the value of transplanting com, and of the fact that it can be done with as much ease as cabbage can be transplanted. It would be valuable for every one who wished to raise early roasting ears for his own eating or for sale, because the corn could be started in frames so as to give it two or three weeks the start of corn planted the usual way. It would be valuable also in the field where hills are missing, as surplus stalks could be drawn from growing hills to supply missing ones. The safest way is to make up a mixture of cow-dung, loam and water, of the consistence of thick porridge, and dip the roots in it as they are taken from the ground with a transplanting trowel, and carried in this to their place, where, being carefully set and shaded if it is sunny with a bush or some artificial stuck in the ground, they will be almost certain to live and grow. Like all transplanting, it is best done when the soil

Longevity of Mules .- We have numerous House.

Longevity of Mutes.—We have numerous reports of mules attaining the age of forty, fifty or sixty years, and Col. Middleton South Carolina stated some years ago that he had one at work on his plantation eighty years old; and we have seen an account of a mule in Ireland, certified to have been at work since 1707, making him over one course, a very uncommon age, but we are satisfied that, with proper usage, nules would commonly attain to about forty years, being serviceable to the last, and this should be counted as one of their elements

Fruit and Tomato Jars! HAVE now on hand a fine assortment of JARS for putting up Fruit, Tomatoes, &c. which every family may do well to get a sup-

ply of, viz: Glass-pint, quart, and half-gallon. Stone Ware—pint, quart, and half-gallon. Yellow Ware—Self-sealing quart. Prices low. jly8 F. J. HOFFMAN.

HIGHLY IMPORTANT TO FARMERS.

M. M. FAXON'S

Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills. THE undersigned, having perfected an arrangement for the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN DRILLS, with the above article attached, at the shortest notice, at his Foundry, in McVeytown, Pa. Seedershave become an almost indispensable article to the Farmer, and he will find that the attachment of the Gum Spring will enhance its value at least one-half. All the defen-tion and trouble caused by the breaking of wooden pins is entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break, rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Brill is the simplest in construction. plest in construction, most economical in performance, and therefore the most durable ever offered to the agriand therefore the most durable ever offered to the agricultural public. The feed is so arranged that it will sow I, 1½, 1½, 13, and ½ bushels per acre. Persons desiring one for the coming seeding are requested to send in their orders as early as possible. Direct to McVeytown, Mifflin county, Pa., ar F. G. FRANCISCUS, Lewistows; E. L. FAKON, Hollidaysburg, Blair co., Pa.; BOYER & BRO., Harrisburg, Pa., who are authorized to act as agents, and from whom any further information may be busined.

PRICE OF DRILLS, with the attachment, \$75. Far-PRICE OF DRILLS, with the attachment,
mers who already have drills, can have them altered, and
the India Rubber Spring attached, for from \$10 to \$15.

All branches of the FOUNDRY BUSINESS situation, for which orders are respectfully solicited.
