LARGE CHOLERA PRIZE.

The Paris Academy of Sciences has again advertised its prize, amounting to about twenty thousand dollars, for the discovery of the cause and effectual cure of cholera. This prize, remarks the Scientific American, is a bequest left some years since by M. BRIANT, and a competition has already taken place for it without success. No less than one hundred and fifty-three essays were presented on the subject, but only two of them came within the scope of the conditions.

"One was by the chief physician of Smolensko, Rússia; the other by Dr. Ayre of London. The first maintained the identity of the virus of cholera with that of small-pox and typhus, and he proposed the inoculation of persons with the small-pox virus while the cholera was raging. It was asserted that by doing so six out of every seven cholera patients would be cured. The London physician maintained that eight out of ten persons could be cured by administering doses of calomel, at the rate of one grain for adults, every five minutes for the space of an hour. Neither of these proposed systems for curing cholera were accepted by the Academy of Sciences. The ground was taken by its members that a person, to be entitled to the prize, must discover a specific as sure and certain for and insinuated the contrary?" the cure of cholera as quinine is for intermittent fever; also, that the remedy should be as efficient for causing the disappearance of this disease as vaccination has been for

CRIMSON CLOVER .- At a meeting of the Committee of the Berks County Agricultural Society, a few weeks ago, Mr. Thomas Penrose, of maiden creek township, exhibited several specimens of new species of clover, raised from seeds distributed from the United States Patent Office. It is called "Crimson Clover," and stated that it is one of the natural agricultural products of Russia. The seeds were planted on the 17th of April last, and the clover ripened by the 20th of July. The heads are of a conical form, averaging an inch in length, and bear a beautiful crimson flower. Mr. Penrose, who is an experienced farmer has a high opinion of the quality of this clover, for hay and pastu- Sunbury and Erie Railroad Company, and rage, and expects to raise a good crop next | lending the credit of the State by endorsing season from the seeds obtained from his ex- the bonds, the vote stoodperiment of this year.

Scarcity of Labor.

The Cleveland Plaindealer of the 13th ult. gives a pitiable picture of large numbers of laboring men and their families in that city. It says, "the monster, Destitution, is crouching around their cheerless hearth stones, and the still more terrible monster, Starvation, is knocking at their doors. These men are not beggars, nor loafers, nor sots. Hundreds are seeking work, but cannot find

But notwithstanding all this, says the party do not propose to establish a protective Tariff and inaugurate a policy that French. would give employment and good wages to American laborers. No, no; that would not be "Democratic." The Cincinnati Platform is against it, and therefore it can't be done. It is "Democratic" however to send to Scotland for iron pipes for a Government contract, whilst American laborers are in stern conflict with the terrible monsters, Destitution and Starvation-for the Government gets a few paltry dollars duty on them and that can be done. It is "Democratic," too, to take care of the Government, but to disregard the interest of the People-and this can be done. But thank Heaven! the People have yet the Right of Suffrage, and can rise in their might and discard this bastard "Democracy" and its adherents, and introduce a new order of things. This, too, can be done. But will the People-the oppressed and burdened People-do it? The second Tuesday of October will tell.

OFFICE on North Main street, second door below the town Hall, and nearly opposite the Gazette office. je 21, 1855-tf. Trusses,

The Democrat's Opinion of Mr. Peachey.

From the True Democrat, August 11, 1856 For Director of the Poor, John Peacher of Menno township, one of the staunch and reliable farmers of Kishacoquillas valley was ominated, as a man EMINENTLY QUALI-FIED TO PROTECT THE PUBLIC INTER-ESTS. An effort was last year made, and will probably be again, to sell the old Poor House farm, with a view of purchasing one more eligible and suitable, and therefore it is important that A PRUDENT, SAFE, AND DISCRIMINATING MAN be elected as Director of the Poor, for should the project be carried out, a reckless disregard of the public interests, such as was manifested in making jail contracts, might plunge the county into an inextricable debt. ALL WHO KNOW MR. PEACHEY GUARANTEE HIS ABIL-ITY AND INTEGRITY FULLY EQUAL TO THE DISCHARGE OF THE IMPOR-TANT TRUST the Democracy desire to commit to his keeping.

Dr. Bower before the Election Last Year.

"We have FULL AUTHORITY for saying that Dr. Bower will not vote for any appro priation to the Sunbury and Eric Railroad Company. No such project is or has been contemplated, and no such appropriation asked for by that Company. This the Gazette knows as well as we do-and yet it has the unfairness to allege that Dr. Bower is commit ted to such action. But further, our candidate, Dr. Bower, is opposed in toto to GRANT-ING THE CREDIT OF THE STATE as a loan OR IN ANY OTHER SHAPE, either to the Sunbury and Eric Railroad Company or to any other corporation for any amount whatever. Will the Gazette do the Democratic party and its candidates the common justice to say so, now that it has repeatedly alleged [Part of another article in the sa

"There is not a district in the State in which the Sunbury and Erie bill is now made the issue, and not a single newspaper, of any politics, (as far as we can find,) advocates the passage of any bill for the relief of, or to aid the construction of that road. A Democratic legislature last winter roted down the Sunbury and Erie bill, by a very emphatic majority and should the next legislature be Democratic (of which there is no reasonable doubt,) we are satisfied no attempt to pass such a bil will be made, not only because it is well known it could not pass, but because the contingency which induced the friends of that road to so licit a pledge of State bonds to aid the Company in obtaining loans, (an appropriation of money was never asked,) will no longer exist. The Gazette's incessant harping upon the 'appropriation of \$3,000,000 to the Sunbury and Eric Railroad,' &c., is, consequently, all 'Buncombe'-merely to deceive the people, by making them believe a question is at issue which really is not. A man must be blind indeed who cannot see into that game -that 'great cry over little wool.'

Dr. Bower after the Election.

On the final passage of the bill selling (or giving away) the public works to the

HIGHLY IMPORTANT TO FARMERS. M. M. FAXON'S

Attachment of Vulcanized India Rubber Spring to the Tubes of Grain Drills. THE undersigned, having perfected an arrangement for I the attachment of a Gum Spring to the Tubes and Drag Bars of Grain Drills, is happy to inform Farmers and all others interested in the growing of Wheat and other grains, that he is prepared to furnish GRAIN other grains, that he is prepared to furnish GRAIN
DRILLS, with the above article attached, at the shortest
notice, athis Foundry, in McVeytown, Pa. Seeders have
become an almost indispensable article to the Farmer,
and he will find that the attachment of the Gwm Spring will enhance its value at least one-half. All the deten-tion and trouble caused by the breaking of wooden pins is entirely done away with by this arrangement, and a man, or boy, can perform nearly double the labor that he could under the old plan, with much greater ease, both to himself and horses. There need be no fear of the Spring breaking, for if there is an article that will neither break rot, or wear out, the Gum Spring is that article, and I hazard nothing in saying that my Grain Drill is the simplest in construction, most economical in performance and therefore the most durable ever offered to the agricultural public. The feed is so arranged that it will sow 1, 1\frac{1}{4}, 1\frac{1}{4}, 1\frac{1}{4}, 2\frac{1}{4}, and 2 bushels per acre. Persons desiring one for the coming seeding are requested to send in their orders as early as possible. Direct to McVeytown, Miffiin county, Pa., or F. G. FRANCISCUS, Lewistown; E. L. FAXON, Hollidaysburg, Blair co., Pa; BOYER & BRO., Harrisburg, Pa., who are authorized to act as agents, and from whom any further information may be obtained.

PRICE OF DRILLS, with the attachment, \$75. Farmers who already have drills, can have them altered, and the India Rubber Spring attached, for from \$10 to \$15. \$5 All branches of the FOUNDRY BUSINESS stil carried on, for which orders are respectfully solicited.

M. M. FAXON

McVeytown. June 19, 1856.

Telegraph Fodder Cutter.

THIS is considered one of the most valuable I improvements of the age for farmers. It is simple, compact, strong, and easily kept in order, and can be worked by hand or horse power. It is an article no farmer should be without. It will give entire satisfaction. Price low. For sale by

WEST'S Patent Galvanic Cement

For Roofing.

THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing wherever desired-the roof being sheeted by the owner. Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of Imperviousness to Water, Incombustibility, Durability and Cheapness. No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than new roof. The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are so affected by the action of the weather that they will melt and run in summer and erack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded. As now applied, First-It is completely impervious to water.

Water may continually stand upon the roof without affecting it in the least.

Second-It is fire proof. It is so incombus tible that it will afford ample and perfect protection against fire, sparks and burning shin-gles from another building immediately ad-

Third-It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse,

Fourth—It is cheap. Roofs will be put on for about half the cost of tin, and will last

Fifth-Repairs are easily and cheaply made. Sixth -It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather.

Seventh-It is adapted to all kinds of roofs, either flat or steep.
Eighth—It is valuable for repairing old

roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure. Ninth-It is especially adapted to all kinds of seaming around battlements, sky-lights and chimneys, and for the lining of eave roughs and gutters. Roofs which have given rouble for years, and which have continued leak in spite of all efforts, can be made

erfectly secure by this cement. Tenth-It has been proved to be the best article ever used for covering car tops and

Eleventh-This cement applied to new tin roofs preserves them from rusting, by furnishing a coat which is at once impervious to water and an almost perfect non-conductor of

Twelfth-It is the only roofing material patented which contains India rubber and For particulars of this cement, owners of property will please address

E. LOCKE, Locke's Mills, Mifflin co., Pa.

DYSPEPSIA,

shown by the statements of the Board of Health o A New York, caused the death of 76 persons out of 611 deaths in one week, and 131 deaths by consumption induced by dyspepsia., As it is a well attested fact that dyspepsia is the origin of the sufferings of a large portion of those who die of consumption, it becomes the duty of every one to use such precautions against and remedies for dyspepsia as science and experience have placed be-fore them, and which have proved to be efficacious. Of this character is DR. WILLIAMS' ANTI-DYSPEPTIC

From Mr. R. D'Arni, New York. Dear Sir-My wife had been suffering with Dyspepsis very severely for a long time, and has been attended by two physicians for about six weeks, from which attend ance she received no relief. I recently procured you Elixir for her, and after taking one bottle she is complete ly cured. I can safely say I never knew of a medicit naving so quick effect in so short a time

Very respectfully yours, RUDOLPH D'ARNI, Teacher of Drawing and Music, 267 Broadway, N. Y Extract of a letter from Mr. H. N. Winans, New York, to his friend in Philadelphia.

Do you recollect that bottle of Williams' Elixir that was leaking in your trunk, and you gave to me to get rid of? Well, for curiosity, I thought I would try if it would relieve me of the Dyspepsia, which I have had for some time, and for which it is recommended, and I am happy to say it has quite cured me, and would recommend it to any one similarly affected. y affected. Signed, H. N. WINANS, 91 Water st., N. Y.

Dr. J. Williams-After suffering from Dyspepsia for a considerable time and failing to obtain any permane relief, I was induced to try your Elixir. I must confe I had not much confidence at first, but in about two weeks was most agreeably surprised to find I was rapidly in proving in health; I am now much fatter than ever before and I am in as good if not better health than I ever was

in my life. Very truly yours, &c.,
WILLIAM YARD, 6 City Row An Invaluable Remedy for Dyspepsia. Read the testimony of the wife of Mr. John Stiles, on the Frankford Road, near the first toll gate.

FRANKFORD ROAD, Oct. 25, 1849.
Dr. James Williams-Having recently understood that is your intention to resume the preparing of your Anti-Dyspeptic Elixir, and being anxious that others may be benefitted by its use as I have been, I herewith send you for publication, if you think proper, a statement of the effectual cure produced on me by it. For a number of years I have been suffering to such an extent that I became so much debilitated, and the digestive powers so much destroyed, that it was with difficulty I could take and retain sufficient nourishment to support life. Neither myself nor my friends were aware that my suffering proceeded from indigestion; in the year 1839 my attentio was directed by my husband to your advertisement, at that time published in some of the city papers, explaining the causes and symptoms of dyspepsia, and confidently offering a remedy. I immediately procured and used some of your medicine with the most signal suc-cess; from a state of debility, languor, and nervousness, and complete loss of the power of digestion, so great that I could take at first only five drops of the Elixir at a dos I was in a few days-much relieved, and by continuing it a short time I have been restored to health, strength, and vigor, which I still retain. I take great pleasure, sir, in making known the efficacy of your Anti Dyspeptic Elixir, and sincerely hope it may be the means of induc

ing others to go and be benefitted like myself.

Very respectfully, &c., HANNAH STILES. The Elixir is sold in bottles at \$1 each, or six bottles Proprietor, JAMES WILLIAMS, M. D.
