[From the Genessee Farmer.]

Election Cake.—Four pounds flour, two butter and sugar together thoroughly; then mix half of it with the flour, together with a tumblerful of homemade yeast, and one with both hands, until the ingredients are and should be grown in every garden. thoroughly mixed. Then let it stand in a butter and sugar, two pounds of raisins, much more so than the common, and of a small quantity of pulverized mace. better quality. This may stand over night, and put in pans for baking early in the morning. It should rise in the pans, and then bake an hour in a slow oven. This cake requires no eggs, a novelty. We have grown specimens 18

French Rolls .- Rub two ounces of butfast. Bake ten minutes.

Cookies .- Two eggs, one cup of sugar, one of butter, one half teaspoonful of saleratus, dissolved in a tablespoonful of milk. Beat the eggs and sugar very thoroughly before adding the butter, cold. Add flour sufficiently to roll.

pumpkin, one egg, enough milk for one to take them from the dish. As a pickle pie, cinnamon, a little salt, and two table- we prefer them to the cucumber. spoonsful of sugar.

Lucy's Delicate Cake. The whites of Egg Plant is very ornamental. four eggs, one cup of sugar, half cup of butter, two spoonsful of milk, half teaspoonful of cream tartar, one fourth of a tea-spoonful of soda. Fl.vor with lemon.

Jelly Cake.—Four cups of flour three of sugar, one of butter, one of sour cream, five eggs, one teaspoonful of saleratus.

—This produces a splendid fast-yellow color, for all kinds of silk, cotton, linen, mohair and woolen goods. The same yellow

gar, one and a half cups butter, one of sweet in bloom and beginning to turn a light milk, five of flour, two eggs, one small tea-spoonful saleratus, and a little fruit sprinkled over the top.

eggs, one cup white sugar, one of flour, one teaspoonful cream tartar, one of soda, one of essence of lemon, and a little salt.

A Very Nice Gingerbread .- Two cups molasses, one of sugar, one of sour milk, one of butter, five of flour, one teaspoonful saleratus, and one tablespoonful of ginger.

Lemon Cake .- One pound sugar, threequarters of a pound butter, seven eggs, one pound flour, the juice of one lemon and the rinds of two. Bake in a moderate ov-

Cynthia's Ginger Cookies.—One pint molasses, one cup sugar, one of butter, onehalf cup of water, one tablespoonful ginger, and one of saleratus.

Cream Cake.—One cup of butter, two and a half of sugar, four of flour, five eggs, one cup cream, and a little saleratus. Season with lemon or cinnamon.

Leather Gingerbread .- One cup molasses, seven tablespoonsful water, five of lard, one teaspoonful saleratus, a little salt, and cinnamon or ginger.

Mother's Cake .- Two cups sugar, one of seur cream, one-half cup butter, four eggs, two cups of raisins, saleratus and spice.

Maxim .- A good cook never sticks a fork into meat while cooking, as it leaves a place for the juices to escape through.

AGRICULTURAL,

New and Valuable Plants to Cultivate. The Tomato. - Dr. Bennett, a professor of some celebrity, considers the tomato an invaluable article of diet, and a most sovereign remedy for dyspepsia and indigestion; and that it should be constantly used for daily food either cooked, raw, or in the form of catsup. It is the most healthy article now in use. We opine the doctor is about right, and that the tomato should be grown in every garden. We find the Feegee, a variety recently introduced from one of the Feegee Islands, one of the best. It is early, fruit more solid, less seeds, smooth skin, pale red color, and largespecimens weighing from ten to twelve ounces; of extra flavor. Charlton's Improved is, in our opinion, the next best; color.

deep red; of good size and quality.

Of Sweet Corn, the Constantinople and Brigg's Excelsior are two of the best varieties we have grown. They are early, large, 10 and 12-rowed, well filled, sweet and de-

of Peas, we will mention two varieties, out of the many we cultivate, as the best.

The West India Sugar Pea (edible pods), and the Poor Man's Pea. We will tell why this is called the Poor Man's Pea. why this is called the Poor Man's Pea. It is this: they are so rich and nutritious that they require no butter or other ingredients to season them. In height, about two feet; pods hang in clusters, and can pick a mess. Of all kinds sold to retailers and parties, pods hang in clusters, and can pick a mess in a few minutes.

Lettuce.—The Grand Admiral; heads large, very tender.

California Curled Parsley .- A biennial of easy culture. Of our common parsley, from the long time the seed lies in the ground without germinating, it has been said that 'it goes nine times to the devil and back before it comes up.' These jourpounds butter and two of sugar. Stir the neys require ordinarily a month or more. We find no such delays of the germinating of the California Mammoth Curled Parsley. This is extra for garnishing; giving a dequart of warm milk. Beat it and pat it licious flavor to fresh meats, soups, etc.,

Mammoth Mustard .- This is truly a giwarm place until it is light, say five or six gantic plant. It has a large curled leaf; exhours. Then add the remainder of the tra for greens or salad; a profuse seeder-

and is used by economical housekeepers in inches in length. The Early Green Ruswinter, when eggs are dear. The loaves nicely frosted, will be preserved moist for a long time.

sian and the Early White Russian are two very early and desirable varieties. Brigg's Prolific Pickle is the smallest of all cucumbers, and good for pickling.

Fenyreck .- An annual medicinal plant, ter into one pound of flour. Mix in the the seed of which is valuable for the reswhites of three eggs beaten into a froth, and a spoonful of yeast. Milk to make a stiff dough, and salt. They can be made cold water and let it stand 40 hours; then over night, and divided into rolls for break- wash the head twice a week, and it gives the desired effect. It is also one of the best ingredients for a condition powder for horses and cattle. Fenyreck is a hardy plant, of easy culture, and should be grown more extensively. Plant in drills ten inches apart and eight inches asunder.

West India Ghirkin .- About the size of a butternut; stem five to six inches in length. Pick the fruit when young and Pumpkin Pie.—One cup of grated tender, and reserve the stem, as it is handy

Winter Squashes .- The Hubbard is one of our choicest and best varieties.

West Point Cake.—One pound of sugar, one pound flour, one half pound of butter, five eggs, one cup of cream and one teaspoonful of soda.

Long purple Egg Plant.—This variety is preferred for family use. When two or three inches in diameter, cut in thin slices and fried in latt. soups, they are quite a rarity. The white

Chufa (Earth Almond).—This produces tubers about the size of an ordinary bean, and resembling in taste a chestnut, but more delicious.

Weld, or Dyer's Weed (Reseda Inteola) Bake thin and spread a layer of jelly between. This is excellent.

Lighten's Lymbles Three copy of St. Jackson's Jumbles .- Three cups of su- and harvest in July the next year, when yellow color, by merely pulling up the whole plant, and put up in small shocks, so as to thoroughly dry. It can be kept a number of years without altering its color-Soda Sponge Cake.—The whites of six ing qualities.—Genesee Farmer.

CURE OF CONSUMPTION, BRONCHITIS,

(ASTHMA, COUCHS, COLDS,)

(CENERAL DEBILITY, &C.)) This remedy is offered as affording a means of speedy cure for the large number that die annually in our land of that fell scourge, Consumption, to which, unfortu-nately, so many predisposing causes exist. Youth and age are alike subject to its ravages.

can name one or more of his acquaintances who is subject to some form of lung or throat complaint, which, if not attended to in season, inevitably consigns the sufferer to a premature grave. To such, help is at hand if they will but avail themselves of it, and hope—the harbinger of brighter days,—may be awakened without fearof chilling disappointment. Dr. O. Phelds Brown's Accuan Baisan does just what is claimed for it, and may be relied upon by the sick as being the most successful in curing lung and throat disorders, of any remedy known at the present day. The many phases assumed by Consumption justifies the apprehension of those who have reason to fear its approach, either from constitutional or hereditary tendency.

While the discoverer of this remedy does not believe that people should be constantly dosing themselves with medicines

TO PREVENT SICKNESS,

there are many cases where disease is too long allowed to remain unchecked in the system; and a slight cough, regarded at first as simply an annoyance, ceases only with the life of the patient. An impure state of the bloed, through debilitation of the lungs, fills the system with morbid humors, and pulsation becomes feeble or accelerated to a feverish intensity—the heart, liver, and kidneys, separately performing functions of vital necessity to our well-being, are impeded in their regular action—the digestive organs falter in their task, and refuse to perform the process of separating the nutritions elements from food, and the whole mental being is well-nigh ready to sink under the burden of life. The patient so addicted, accounts his case a complication of disorders, and often refuses to resort to medication, from his thorough disbelief in any prospect of cure. To such

treasure.
