LOCAL AFFAIRS.

4TH OF JULY .- The anniversary of our independence was celebrated as has been usual now for several years. The Presbyterian Sabbath School visited Bank's Grove, the Methodist Granville on a flat. and the Lutheran Dixon's Grove on two canal boats.

So far as we can learn all enjoyed themselves in recreation and with the good things provided by teachers and members of the churches, and returned well pleased Some alarm was created when the children and others first got on the packet by its rolling, caused by all on board rushing to one side where a little girl's bonnet had fallen into the water, but it soon subsided by the scared ones getting on board a second boat. In the evening the boys and men fired off the usual number of pounds of bread and butter in the shape of fire-

The Logan Guards paraded in the morning and fired a national salute. The company made a good appearance.

A party of patriotic citizens visited made, resolutions of order adopted inflicting summary punishment for disobedience, in pursuance of which some were dipped in the waters of Jack's creek, and others made to walk a rope, &c.

Ladies and Gentlemen will please take notice that B. K. FIROVED, (at Butler's store.) in his usual way of doing business at this season of the year, has com-September, at Reduced prices for CASH. the following class of goods: A large assortment of fancy summer silks, bereges, lawns, challies, mantles of all styles, ribhons, bonnets, shawls &c. The goods above enumerated will be so reduced in price, that the Cash or good Country Produce only will buy them. His customers and the public generally are invited to give him a call before too late, as great bargains are offered.

ROBBERY .- The clothes line of Wm. land was robbed of a number of shirts. of the 2d instant, the thief being very particular even in selecting the best artiknows something about it, and ad-

ICE CREAM .- For the best dish of ice cream we have tasted this summer, we are indebted to Mrs. Lilley, who has opened an establishment in the old brewhouse across the stone bridge. Those who want an article worth tasting, will of course give her

A son of Sheriff Williams had his face and arm burnt on the 4th by some powder, which was ignited while he was stooping over it.

ODD FELLOWS' HALL COMPANY .- The following persons compose the Board of Managers of this company for the ensuing year. H. J. Walters, President, John Hamilton, Sec'y, G. W. Soult, Treasurer, David Bloom, John Evans, John M'Kee, Themas Lowmiller, Henry Zerbe, and Peter V. Weaver. By an advertisement in another column, it will be seen that this enterprising company has declared a semiwith judgement.

The Wheat Crop in Miffiin County & the Croakers.

at crop in Mifflin is now ripe, and the golden appearance in most of the fields is beautiful to look upon. The Mediterranceas, the red beardy, and the red smooth chaff promise an excellent crop; but the farmer apon being asked how his crop will yield, 3ys-" Oh, its bad enough-the midge is eatthe white blue stem - its too late ripen-This is, as must be naturally expected. Ask the farmer how long he has been sowis kind of wheat, and he will answer, in 15 to 20 years, in some instances 25 years. Every intelligent farmer must know that this wheat has worn out the soil on which it is sown from year to year; but why does be persist in sowing it? simply (I don't know of any other reason) because he gets in market from five to ten cents per bushel more than for the Mediterranean or other red

a change. Suppose he raise on ten acres age world, with a Pill and an Ointment, of land 100 bushels and on another ten acre which appear to accomplish all that the Facfield 200 bushels; he sells his white for \$120 and the red, at ten cents less per bushel, for effect. For diseases of the stomach, the liv-\$220. He is thus the gainer of \$100 of the red over the white on 20 acres. By the same rule, on putting 60 acres out, he will gain \$300. Every intelligent farmer should see the propriety of changing his seed, not only of wheat, but of all the staple articles raised on his farm. Some will say this is a great trouble and expense for them to go to a for-eign country for a change of seeds. This is not necessary. Go twenty, thirty or fifty miles into a neighboring county, and you get as good seeds as you would in going a thousand miles off. I know a small fertile valley in Blair county on which I have seen as fine wheat grow as ever man's eye beheld, and will produce from 25 to 30 bushels to the acre. Change your seed, farmers, and my word for it you will be amply repaid for your LOGAN.

FROM EUROPE.

By the arrival of the Fulton and Etna from Europe, we are enabled to present very full details of the foreign news. Among other things is a high tempered article from the London Times in regard to the vexatious San-Juan question. The Times takes the ground, after warmly eulogizing our military men, that General Harney is an exception to the general run of American officers. As, however, General Harney has been placed in command at Vancouver's Island, where he has undone, or at least has tried to undo, General Scott's Pacific arrangement, which placed everything upon an amicable footing, until the details could be properly shaped by diplomacy, and as General Harney's actions have not been disavowed by the Government at Washington, it is with him and his action that the Times deals, and is unwilling to submit any longer to what it calls insults to national honor. The article will create quite a sensati n, on account of its warlike tone .-The Sicilian revolution is still progressing. Garabaldi, strengthened by large reinforcements, is preparing to march on Messina, while at the same time we have confirmation of the statement that Francis II has offered a liberal Constitution to the Neapolitans, and Forsythe's woods, where speeches were is ready to form an "alliance" with Piedmont. There was a report in Paris, at last dates, that the Neapolitan Government had restored the captured American steamers, probably in consequence of the firm and decided stand taken by our minister there. If and over dos d world sadly require. the report be true, it is much to the credit of Mr. Chandier, backed as he was only by a single United States vessel of war, the Iroquois. Spain joins Russia in protesting against Sardinia permitting any more Garabaldian troops to depart from its ports; in menced and will sell until the first of fact, the Government of her Catholic Majesty threatens to withdraw its legation from Tu-

> EE Ellis B. Schnable, one of Buck's orators in this State in 1856, gave Geo. W. Bowman, publisher of Buchanan's organ at Washington, a rap over the pate on Saturday last, for publishing a low squib. A clerk also got into the fight, and democratic blood flowed all round. The harmonious are getting along finely.

Before the Supreme Court at Lancaster last week the Commissioners in the case of the Pittsburg Councils reported the answers of the thirteen Councilmen to the Court, and the Court adjudged them guilty dresses, skirts, stockings, &c. on the hight of contempt for refusing to levy a tax for the payment of the interest on the city's subscription to the Chartier's Valley Railroad. Each Councilman was held in the cles. No clue has as yet been obtained as sum of \$1,000, to answer at the Fall term to the perpetrator, but Mr. L. thinks that of the Court at Pittsburg. Attachments have been issued against twelve other memvises him to send or bring back the arti- bers of the Councils, and a writ will be issued to show cause why attachments should not issue against the entire body. This will bring the Councilmen before the Supreme Court next Fall.

PROGRESS IMPOSSIBLE

The Goal Reached at a Bound .- We call this the age of progress. It is so. But in some departments of science discoveries have been made, and practical systems introduced, which leave nothing to be desired in the way of improvement, and which, in fact, preclude progress by giving us perfection at the outset. For example, when Profe sor Hollo way, some twenty-five years ago, gave to the world his inestimable remedies, he seems to have left nothing even for himself to achieve, in the treatment of human maladies. The progress of the demand for his Pills and Oint ment has, indeed, been unparalleled in the history of medicine; but he has found no reason to alter a single ingredient or vary a proportion. We therefore class the sovereign antidotes for external and internal diseases with which that distinguished medical reformer blessed the world, among the inventions which are perfected at their birth.

Our method of arriving at a correct appre ciation of the respective merits of opposing systems, is by comparison. Now, we have seen a great deal of what is called regular practice, and do not hesitate to say that it fails more frequently than it succeeds. This is not the case with Holloway's Pills and annual dividend of four per cent, which affords strong evidence that it is managed which should be specified if space permitted which should be specified if space permitted. -we have seen these remedies effect complete and permanent cures, when eminent members of the faculty had exhausted their repertoires without finding anything that would even alleviate the agonies of their patients. Testimony confirmatory of our own observations on the subject is continually pouring in from all parts of the Union, and we cannot refuse credence alike to our own senses, the common sense of the public, and the almost universal opinion of our brethren

of the press. The case as between the Faculty and Professor Holloway seems to stand thus: The faculty have the prestige of antiquity, au-

thority and usage.

Holloway, on the other hand, is not a man of mouldy maxims. Small respect has he for Galen and gammon. He cites no authorities, save living witnesses and contemporary facts. A few pages suffice to develope his system and embrace his simple directions.— He denounces mercury and all corrosive poisons, and does not believe that life can be wheat! and will therefore put up with a half saved by draining its fountains. Above all, crop, and sometimes only a fourth, rather he furnishes the whole civilized, and no than go to the trouble to get a good seed for small portion of the semi-barbarian and sav-

ulty aim at, but in five cases out of six fail to er, the bowels and kidneys, as well as for ordinary pulmonary affections, the Pills are absolute specifics; and the sufferer from external disorders or injuries may recover under the operation of the Ointment, when nothing else will save him .- " Northern Express."

Inventions and Improvements are not Confined to Mechanics.

There are others not perhaps so outspoken and noisy, that occupy a deeper strata of so ciety, whose improvements are not less palpable, and whose silent influence upon the comfort and happiness of society not less striking. True, the advent of a sewing machine, a reaper, or a plowing machine, which at once does the labor of a score of hands, is an event so notable, an improvement so manifest, that all are impressed with its impor tance. In almost all such cases the result is gained not so much by the discovery of new powers as by the new application and com-bination of those long known and understood. What is yet more remarkable is, that the new application is so simple and efficient that we wonder it had not been thought of and ap-

Such were our reflections on seeing one of Prof. Humphrey's family cases of Specific Homeopathic Medicines. Comprised in a small case, which is a handsome ornament for a ladies table, you have twenty specific remedies, appropriate for almost every ailment or disease which may occur in a family, together with a concise little manual of directions for reference and use. The whole arrangement is simplicity itself, and the rem edies are so arranged and labelled that any intelligent person may apply them at once successfully, and thus, in the most important sense, become their own physician. No acinvestigation or study, no balancing of probabilities, is necessary. Here is the ailment—there the pleasant sugar-plum rem edy. All this simplicity and certainty is attained by the mere combination of the best Homeopathic Medicines according to Prof. Humphreys' theory and discovery. So simple and common sense, and yet so efficient, does the whole arrangement appear, and so obviously does it meet the wants of a family. that we wonder the profession had not long ago availed themselves of it, and that just so simple and pleasant remedies had not been given to the people long ago. If this new discovery and arrangement shall have the effeet, which it promises to do, of driving from use the destructive and deleterious drugs so long in vogue, and inducing a reliance on nature and such mild means, it must be considered one of the most important improvements of the age, and one which a suffering

Be of Good Cheer. Debility and Languer. Be of Good Cheer. Debility and Languor.
Out of many there is but one infallible remedy.
'Holloway's World renowned Pilks,' and only one, source of this disorder, the stomach. When we consider the sympathetic affinity existing between the condition of the stomach and the action of the brain we can easily understand the rotionale of Holloway's treatment. Through the stomach and the circulant his Pills act on the general system, and by purifying the blood, renovating the digestive organs, and stimulating the secretions of the liver, they give buoyancy to the animal spirits, clasticity to the body, and vigot to the whole constitution. Holloway's Ontiment is the only sure remedy for old sores, ulcerated legs, cuta neous cruptions, &c.

Dyspepsia! Dyspepsia! Dyspepsia! What is it? How Cured?

Dyspepsia is our National Disease-weak S epsia is our National Disease—weak Stomach digestion, distress after eating, costive habit condition. How many suffer with it and its at a symptoms of low spirits, bad taste, coated, obstuified head, and attacks of headache! Ye we know how to cure it! Generally, because the are constipated, resort is had to entharties of es. But such a condition was never cured by

FRIDLEY & CORNMAN'S Patent Self-testing, Self-sealing, Premium, Air-tight

FRUIT CANS &

Patented October 25, 1859.

The Exclusive Right of Making & Selling these Cans and Jars in Mifflin and Centre counties is held by the undersigned.

THESE Cans and Jars being perfectly sim ple in their arrangement, and requiring no cement or solder to make them air-tight, are the most reliable and convenient vessels that are in the market for preserving Fruits and Vegetables of all kinds.

They possess the following advantages over all other Cans and Jars that are in the mai-

FIRST-All that is required after the fruit has been put in hot, is simply to screw the cap down tightly.

Second-They can be opened by a single turn of the cover, and the contents taken out in one-fourth the time required by other ves

THIRD--Besides their simplicity and ease of adjustment and the impossibility of step-pers blowing out, they show at all times the exact condition of the fruit by simply looking at the top of the cover: if the gum gasket is concave, the fruit is good: if convex, the fruit is going to spoil, but will always show itself in time to be saved.

For sale by JOHN B. SELHEIMER, at his tin, stove, and sheet iron manufactory, East Market street, Lewistown, Pa., also by country stores generally.
