# AGRICULTURAL,

#### Stock Pays all the Time.

The heading of this article, says the Valley Farmer, was the remark of an old farmer the other day, while deploring the failure of his wheat crop. One year the wheat fails, another year the oats fail, another year the corn; but, said he, 'stock pays all the time.' He, moreover, remarked, that the farmers who early gave their attention to stock-raising, had gone right along without set-backs, and had outstripped the grain growers.

There is no doubt much truth in the old man's remarks. Stock is the surest and most remuncrative. But in thickly and most remunerative. But in thickly settled regions it is better and safer to di-vide the interest between the two. The farm. Waste straw, and offal of the grain farm. Waste straw, and offal of the grain tarm. Waste straw, and offal of the gran crop, will go far to feed the stock, while Cholic, Pleurisy, Palpitation of the Heart, Rush the waste and offal of the stock will go far in fertilizing the soil and improving its capacity for productiveness. The strength of the soil is a greater desideratum with the farmer. The soil is his mine of wealth -his treasury-his bank of deposit. He must keep it good, or his paper is protested; his reputation as a farmer is dishonor-

It is well to keep a variety of stock, as well as raise a variety of grain crops. The general profits of each year are thus kept nearly equal. Farming may be done closer, less wasted and more made.

Mr. John Johnson, of Western New York, (no better authority,) has for years been giving us 'line upon line, 'and teaching us, both by precept and example, how to grow wheat. And if he is not a competent teacher in this matter I do not know who is. Why last year, despite June frosts, Hessian fly, the orange colored midge and red rust, he harvested plump thirty-five bushels per acre,' on a field of twenty acres. His directions are, first, a well-drained and thoroughly manured and prepared soil-the manure to be applied upon the furrow, and worked in by the cultivator, harrow, or other suitable implement; clean seed, and early sowing.

Softening Hard Water .- Some twenty years ago, a well was dug twenty feet deep, on the Cottage Hill Farm, near Ravenna, Ohio. It contained eight feet of waterafter being stoned-the earth about which was blue clay, and the water was very hard. This serious defect was cured entirely and the water softened permanently by putting into the well about four feet of gravel of the size of beans and upwards.

The scales of iron that accumulate around the anvil in a blacksmith's shop are more valuable than manure for peach trees. A shovelful put around a healthy peach tree will be very likely to keep it in good condition; and it is said that trees already diseased have recovered by the application of these scales. Iron in any form will answer a good purpose.

.... Ham, Shoulder, Bacon, Dried Beef, Salt, Grafting .- The system of grafting which Flour, Soaps. is practiced in Tennessee, promises some Queensware, Stoneware, Glassware, Cedarfeatures not common elsewhere. It is thus ware, Hardware. described : 'A long smooth shoot or limb Boots and Shoes, Baskets, Carpet Chain. is selected, cut from the tree, and a sharp DRY GOODS. iron wedge driven through the limb, every Notions and Nick Nacks of all kinds. four or five inches.
