Very Fine Cocoannt Macaroons.-Rasp a fresh cocoanut, spread it on a dish, and let it dry gradually for a couple of days.

Add to it double its weight of fine sifted sugar, and the whites of eight eggs beaten to a solid froth. Roll the mixture into small balls; place them on a butter tin, and bake them in a very gentle oven about twenty minutes. Move them from the tin while they are warm, and store them in a very dry canister as soon as they are cold.

To Dress Rice. - A lady recommends the following: Soak the rice in cold salt and water for seven hours; have ready a stewpan with boiling water, throw in the rice, and let it boil briskly for ten minutes, drain it in a colander, cover it up hot by the fire for a few minutes, and then serve. The grains will be found double the usual size and quite distinct from each other.

Apple Jelly.—Take about a peck of wood or coal. For sale by onles; pare, quarter, and core them. Put sep 13 F. G. FRANCISCUS. apples; pare, quarter, and core them. Put them in a preserving pot, with as much water as will cover them. Boil rather fast till the fruit is all in a mash, then run it through a jelly bag, and to every pound of juice put half a pound of lump sugar, and boil gently at least two hours. Put into molds, and after it has been made a little time, it will turn out a beautiful transparent jelly. It makes a very pretty and nice supper dish; and if a custard or some Devonshire cream is poured into the dish, it is a very great improvement. The best apples for making this jelly are codlins, and coal Stoves at equally low rates, for sale by F. G. FRANCISCUS. early Anns, or golden rennets.

To Smoke Hams and Fish.—Take an old hogshead, stop up all the crevices, and fix a place to put a cross-stick near the bot tom, to hang the articles to be smoked on. Next cut a hole in the side near the top, to introduce an iron pan filled with sawdust and small pieces of green wood. Having turned the tub upside down, hang the artieles upon the cross stick, introduce the iron pan in the opening, and place a piece of red hot iron in the pan, cover it with sawdust, and all will be complete. Let a large ham remain forty hours, and keep up a good smoke.

Soda Biscuits. - One pound of flour, half a pound of sugar, quarter of a pound of of new milk or two eggs. Mix well; then roll out until it is about half an inch thick, roll out until it is about half an inch thick, and 4 lbs., of almost every hue and shade. butter, a little carbonate of soda, one gill

Egg Chessecake.—Six eggs, boiled hard, which rub through a sieve with a quarter of a pound of butter; add a quarter of a pound sugar, one lemon juice and rind (grated), nutmeg and brandy to taste. A few currants are an improvement.

AGRICULTURAL,

Veterinary Surgeons Wanted.

There is no greater want among stock raisers, than well educated, skillful and sensible veterinary surgeons. It astonishes me, says a correspondent, that there are not found among the multitude in the medical profession who starve for want of practice, young men with foresight and enter- 41 feet. prise enough to enter this great field and reap a harvest. Our veterinary works are most of them unreliable—at least impracticable in their teachings. When ever Agricultural schools are started in this State, the study of the systems and diseases of animals should be made a feature.

A New Race of Cattle.

The Nord publishes the following: "M. Dutrone, one of the most distinguished cattle breeders of France, has succeeded, after twenty years' trial, in producing a bovine race without horns, which carried the first prize at the great cattle show of Poissyn, 1854. A cow of this species, which had been raised on the farm of the King of Belgium, at Lacken, near Brussels, was killed lately in the latter town, in presence of the professors of the vetering. presence of the professors of the veterinary school and the surveyors of the public slaughter-house. The report of these gentlemen confirms the fact that the quantity both of suet and meat was much more considerable than that of the ordinary cattle. M. Dutrone ordered that one-half the cow be sent to Ghent; to be sold for the benefit of the much suffering poor of that town.

Watering Trees. More trees are destroyed, yearly, than saved by injudicious watering. Many persons pour pailful after pailful of cold water around the roots of newly planted trees, during the early part of the season; their object being to assist the tree by supplying the moisture, to force out its buds and leaves to vigorous growth. The result is more often to create disease and rapid decay in the root, to drown the young fibres, and by keeping the ground wet and cold, produce death. Better hoe around the tree every other night, just at sundown, and let the watering alone. The former practice will destroy the tree, the latter will save it.

FRESH GROCERIES, Sugars. Syrups, Coffees. Rice, Teas, Honey, Canned Peaches, Pickles, Quinces. Preserves, Jellies, &c.

Which we will offer at lowest cash price. COOKING STOVE. FOR COAL AND WOOD.

Of the numerous cooking stoves ever introduced, the "Governor Penn" is emphatically the most superior. It is of recent invention, being patented in the year 1858. This stove has already won for itself the enviable reputation of being a Complete success, and with the additional improvements consisting of the plates exposed to the fire being double, making it therefore more durable than any other stove in the market. This stove has been gotten up expressly for country trade, as it has been a general complaint and an undeniable fact that the cooking stoves manufactured heretofore have been entirely too light. The Governor Penn exceeds all others by 20 per cent. in weight, which gives it an advantage in throwing out and retain ing more heat. It has the largest oven and heaviest grate, the largest flue and strongest draught, and has proved itself the best ba king and cooking stove known either with

C.—For Catarth, of long standing or recent, either with obstruction or produse discharge.

W. C.—For Whooping Cough, abating its violence and shortening its course.

In all acute discusses, such as Fevers, Inflammations, Diarrhea, Dysendery, Croup, Rheumatism, and such cruptive discusses as Scarlet Fever, Measles, and Eryshotas, the advantage of giving the proper remeiles promptly is obvious, and in all such cases the specifics act like a charm. The entire discase is often arrested at once, and in all cases the violence of the attack is moderated, the discase shortened, and rendered less dangerous.

Coughs and Colds, which are of such frequent occurrence, and which so often lay the foundation of discased lungs, bronchitis and consumption, may all be at once cured by the Fever and Cough Pills.

In all chronic disease, such as Dyspensia, Weak Stomach, Constipation, Liver Complaints, Piles, Fennie Debility, and Irregularities, doll fleahaches, Sore or Weak Eyes, Catarrh, Salt Rheum, and other old cruptions, the case has specifics whose proper application will afford a cure in almost every instance. Often the cure of a single chronic difficulty, such as Dyspensia, Piles or Catarrh, Headache or Female Weakness, has more than paid for the case ten times over.
