NATURAL HISTORY.

The Wood Thrush.

This sweet and solitary songster inhabits the whole of North America, from Hud son's Bay to Florida. With the dawn of morning, mounting to the top of some tall tree that rises from a thick shaded part of the woods, he pipes his few, but clear and music. I notes in a kind of eestasy, the prelude to which strongly resembles the doubletonguing of a German flute, and sometimes the tinkling of a small bell; the whole song consists of five or six parts, the last note of which is in such a tone as to leave the conclusion evidently suspended; the finale is finely managed, and with such charming effect, as to soothe and tranquilize the mind, and to seem sweeter and mellower at each successive repetition. Those who visit our woods will be at no loss to recognize, from the above description, this pleasing musician. Even in dark, wet, and gloomy weather, when scarcely a chirp is heard from any other bird, the clear notes of the wood thrush thrill through the dropping woods, from morning till night; and it may truly be said, that, the sadder the day, the sweeter the song.

The favorite haunts of this bird are low, thick shaded hollows, through which a small brook or rill meanders, overhung with alder bushes that are mantled with wild vines. Near such a scene he generally builds his nest, in a laurel or alder bush, composed of dry leaves, grass, roots, and mud. Berries, beetles, and caterpillars are his principal continues to revolve round on her own axle food. The wood thrush measures eight inches in length. The whole upper parts are the Constitution of the United States. of a bright fulvous color, brightening into reddish on the head ; the throat and breast are white

AGRICULTURAL.

Good Seed-Early Wheat.

'What you sow, that also shall ye reap, is as true in Agriculture as in morals. was thought, and sustained by high authority that imperfectly ripened wheat if it would germinate, was as good as any for seed-and even recommended as better than good, plump kernels, as more seeds were contained in a bushel. Experience proves this notion fallacious. We may as well expect a good sized Morgan hors from a Spanish jackass, as a good crop o wheat from imperfect seed. To produc the best, we must propagate from the best

In England, the farmers take the sheave and whip them gently over a stone, whe the earliest ripened kernels fall out, which they take for seed. A better method is t go through the field and select the earlies ripened heads for seed, which will soon produce an earlier variety than the original stock. Such seed will produce a crop free from smut. Sowing poor, half-ripened, imperfect seed is sowing smut and disappointment. It might seem that it would be an endless task to gather early heads enough for seed, but it requires but two or three years to change the variety, and have seed and to spare.

A wheat known in Scotland as the Hopetown wheat, and deemed an excellent and prolific variety, owes its origin to an accidental circumstance. An observing farmer having marked a very superior ear, from which he picked out ninety-nine kernels, and from this product comes this celebrated variety.

To show the rapidity with which such seed may multiply, we give an instance.- A farmer in Cambridgeshire, England, in Scieved. of the best Red and Oak Scie

What's them for?' 'To snuff the candle.' 'To snuff the candle?'

'Yes.' The candle just at that moment needed attention, and Adam, with his thumb and forefinger, pinched off the snuff, and very carefully poked it into the snuffers, say.

Well, now, them is handy !'

How to Make a Zouové.-We get our informatin from one of the French drill sergeants himself, thus:

'Take a recruit-keep him forty eight hours-nothing to eat; den march him foreight hours-nothing to eat; and den ty let him fight like thunder forty eight hours -nothing to eat; den by gar he one Zouave.

Settled by Standing .- "Sir, your account has stood for two years, and I must have it settled immediately." To which the customer replied :

'Sir, things usually do settle by standing; I regret that my account is an exception. If it has been standing too long suppose you let it run awhile.'

Ma Artemus Ward says : 'The world tree, once in twenty-four hours, subjek to

.... During the war of 1812 a direct tax of \$6,000,000 was raised, and raised cheerfully, notwithstanding the population was only a little over seven millions, and the country was far from wealthy.

A Western editor, speaking of a large fat cotemporary, remarked that if all flesh was grass, he must be a load of hay. 'I suppose 1 am,' said the fat man, 'from the way the asses keep nibbling at me.'

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the con-stitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, " I

will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constituthe energies of life, so that scrofulous constitu-tions not only suffer from scrofulous com-plaints, but they have far less power to with-stand the attacks of other diseases; conse-quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which de-cimates the human family has its origin directly in this scrofulous contamination; and many in this scrofulous contamination ; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking in-fection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, OF ERVSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIA-TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of

are so composed that disease within the range of their action can rarely withstand or evade them Their penetrating properties search, and cleanse, and invigorate every portion of the human organ-ism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting. Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is portaining certificates of their cures and directions for their use in the following complaints: *Costice-ness, Hearthurn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appe-dite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.*

1840, gathered eighteen very fine ears, the Leather. I have also a good assortment of proceeds of which filled a common wineglass. These seeds he planted the follow-and produced seven bushels and one peck, and this produced one hundred and eight bushels and two peeks, which was planted ed in 1843, and produced one thousand eight hundred and sixty-eight bushels.-This was the increase of eighteen heads of wheat in four years.

Another farmer planted thirty kernels in 1839, which produced fourteen and three-fourths ounces; this was sown and produced one bushel and one peck ; this produced forty-five bushels; and this in 1841, produced five hundred and thirty-Feven bushels.

It will thus be seen that the task of gathering the earliest ripened heads, and thus producing an early variety, is not great; and farmers will be well paid for their trouble. They will get a variety that can be sowed late enough to escape the early rust. Try it and give us the result .- Ohio Farmer.
