

# THE HOUSEKEEPER.

**Farina Pudding.**—Take three table-spoonful of farina, two ounces of butter; melt the farina and butter together; boil one and a half pints of new milk, add to the farina; let boil ten minutes, until it thickens, then let it cook. Add five table-spoonful of loaf sugar, grated rind of a lemon, five eggs, beaten separately; add the whites last; butter the dish, then flour it, pour your pudding into it, place the dish in a pan of boiling water, and bake an hour.

**White Hall Sauce.**—One-fourth pound of butter, four table-spoonful of brown sugar, cream them together, add a little nutmeg, and a glass of wine; place the dish in a pan of boiling water, while it is melting add the yolks of two eggs, beaten lightly, stirring all the time, until it comes to a boil.

**Tea Cake.**—Three cups of sugar, four eggs, one cup of butter, a teaspoonful of saleratus, dissolved in a cup of sour cream, and flour enough to make not quite as stiff as pound cake.

**Cup Cake.**—One cup of sugar, three eggs, one cup of shortening, one teaspoonful of milk or sour cream, one teaspoonful of saleratus; flour enough to stiffen it.

**Molasses Cake.**—One pint molasses, three eggs, one cup of thick milk, one spoonful of shortening, and flour to make a stiff dough.

**Washing Composition.**—Take half a pound of soap, dissolve it in two quarts of boiling water. Half a pound of washing soda, also dissolved in two quarts of boiling water; slack one-fourth of a pound of lime with the soda water, let it settle, and pour the clear liquid into the dissolved soap, and stir it well; you can add another quart of water by putting it on the dregs of the lime and soda. Stir it, and let it settle; be careful to get only the clear liquid; by doing so you will have five quarts of good soap, for 6 cents. Soak your clothes the day before washing; next morning put as much water on the fire as you do to boil your clothes in; when heated, put in some of the soap, stir it well until dissolved, and boil your dirty white clothes 15 or 20 minutes, wash them out and rinse them well, and when dry they will be of a beautiful whiteness; wash your calicoes through the first rinse water.

## AGRICULTURAL.

### A Word for Trees.

'By felling the trees,' says Humboldt, as quoted by Balfour, 'that cover the tops and sides of the mountains, men of every climate prepare at once two calamities for future generations—the want of fuel and a scarcity of water. Trees, by the nature of their perspiration and the radiation from their leaves in a sky without clouds, surround themselves with an atmosphere constantly cold and misty. They affect the copiousness of springs, not as was long believed, by a peculiar attraction for vapors diffused through the air, but because, by sheltering the soil from the direct action of the sun, they diminish the evaporation of the water produced by rain. When forests are destroyed as they are everywhere in America, by European settlers with an imprudent precipitation, the springs are entirely dried up or become less abundant. The beds of the rivers, remaining dry during a part of the year, are converted into torrents whenever great rains fall on the heights. The sward and moss disappearing with the brushwood from the sides of the mountains, the waters falling in rain are no longer impeded in their course; and instead of slowly augmenting the level of the rivers by progressive filtration, they furrow during heavy showers the sides of the hills, bear down the loosened soil, and form those sudden inundations that devastate the country. Hence it results that the destruction of woodlands, the want of permanent springs, and the existence of torrents, (the flood in rivers) are three phenomena closely connected together. In Switzerland it has been clearly ascertained that rivulets formerly full have shrunk or dried up coincidentally with the clearing of the mountains, and that they have once more returned to their former size on the woods being restored. Trees shade the soil from the sun.—They give off vapor during the day, and so mitigate heat, while they obstruct the direct rays from above—they radiate out heat during the night, and occasion the precipitation of dew, many plants being endowed with this faculty to such an extent as to collect water in large quantities from the air.' I trust these remarks will induce many to plant and foster trees.

## AYER'S CATHARTIC PILLS.

Are you sick, feeble, and complaining? Are you out of humor, with your system deranged, and your feelings unaccountable? These symptoms are signs of the presence of some disease. Some 20 of sickness are creeping upon you, and should be arrested at once. Take Ayer's Pills, and you will be cured. They cleanse the blood, and let the fluids move on unobstructed in their natural course. They stimulate the functions of the bowels, and give the system a healthy and vigorous activity, and remove the cause of the disease. A cold, nervous, and irritable state of the system, if not relieved, will lead to the most dangerous diseases. While in this condition, the system is liable to be deranged, and the bowels become constipated. Take Ayer's Pills, and you will be cured.
