

RECIPES.

From Peterson's Magazine for February. Apples and Rice.—Peel a number of apples of a good sort, take out the cores, and let them simmer in a syrup of clarified sugar, with a little lemon-peel. Wash and pick some rice, and cook it in milk, moistening it therewith by little and little, so that the grains may remain whole. Sweeten it to taste, and add a little salt and a taste of lemon peel. Spread the rice upon a dish, mixing some apple preserve with it, and place the apples upon it, and fill up the vacancies between the apples with some rice. Place the dish in the oven until the surface gets brown, and garnish with spoonfuls of bright-colored preserve, or jelly.

Pumpkin Pudding.—One pound and a half of raisins, one pound and a half of currants, one pound and a half of beef suet, one pound of flour, half a pound of bread crumbs, four ounces of citron, four ounces of lemon, four ounces of orange-peel, four ounces of orange-peel, two rinds of lemon, grated, juice of one lemon, four ounces of castor sugar, ten eggs, one teaspoonful each of nutmeg, ginger and cinnamon, thirty-two bitter almonds, one pint of new milk, and a small particle of salt. Mix all together gradually over night, and add a little more milk in the morning, if required. Boil seven or eight hours.

Victoria Pudding.—Six ounces of fresh butter worked up to a cream, four ounces of loaf sugar mixed in with the butter, four yolks of eggs beaten, six ounces of bread crumbs, two rinds of lemon, grated. Line the dish with a light crust, and a layer of jam or marmalade; then pour in the mixture, and bake in a very slow oven for half an hour. Froth the whites of the eggs with a little loaf-sugar and place them over the pudding, and put in the oven just before serving.

Lemon Cake.—One pound of sugar, three-quarters of a pound of flour, the rind of two lemons, grated, thirty or forty almonds, fourteen eggs, (using only ten of the whites,) half a teaspoonful of rose-water and the same of Noy-an.

AGRICULTURAL.

The Largest Farm in the World M. L. Sullivan, Esq., of Champaign county, Illinois, owns seventy thousand acres of good land as is to be found on the face of the globe, twenty-three thousand acres of which is under fence and active cultivation, while the remainder is used for herding purposes. This is undoubtedly the most extensive farm in the world, and it is said to be conducted on the most approved plans. Nearly all the labor is performed by machinery, so that one man can perform, or rather superintend, the labor of five. He drives his posts by horse-power, cultivates his corn by machinery, ditches, sows and plants by machinery, so that all his laborers can ride and perform their duties. Mr. Sullivan gives employment to two hundred farm hands, two hundred horses, and a large number of oxen.

Culture of Oats. It is almost useless to sow oats in this country unless they are sown early—and the earlier the better. The best oats we ever saw were sown in February. Farmers should have their ground plowed and prepared for seeding oats the first good weather after the middle of February. They may not have time to plough the ground then, and also put in the seed—but might have time to sow the seed and harrow it in. If the ground is not yet plowed and the open weather continues, by all means keep the teams going, not only for oats, but for corn and all other crops. Fall and winter plowing are highly beneficial. Turning up fresh ground to the frost is almost equal to giving a coating of manure. The teams are now fresh and feeling well. Give them more work now and less in the Spring.—Every day improved now is one gained for Spring.—Rural World.
