The Janus Faced Party. There was a time when the word Democracy, applied to a party, meant something, and he who advocated its principles could not only tell what he was advocating, but his opponent also knew against what he was contending. Now however he is a wise man indeed who could tell a first principle on which that party even remotely approximates, for it is war and anti-war in the same breath-it favors soldiers who fought gallantly, and gives cowardly deserters and runaways from drafts equal credit-it condemns rebellion, and then justifies it-it lands some generals of the Union army, but finds its heroes among traitors -it is opposed to loyal negroes, yet advocates their representation by rebel whites-it talks about equality and human rights, and advocates castes of races and justifies slavery-with Jackson for President he could find power in the Constitution to put down re bellion, with Buchanan in the same office, he could find none. Such contrasts might be extended indefinitely, and plain as they must be to even ordinary minds, it is surprising so many well-meaning men will blindly follow leaders who have heretofore carried them to the verge of destruction. We do not mean to say that the republican party is all purity-far from it; it has its camp followers, its mountebanks, and its cheats and swindlers But we do say that in the great war recently terminated, and which involved the welfare of our country and the perpetuity of its institutions, that partv embraced the great mass of the people of this country who coincided with the Jacksonian doctrine that the Union must be preserved, and to do that acted under the maxim of "Our Country-right or wrong." To show

from the Clymer platform: "Besides, it was no disgrace to escape from a tyranny which forced a man from home and friends and devoted him body and soul, to the cause of nigger feeedom. It were rather a credit to him that he refused to join in the accursed crusade against the rights and liberties of our southern friends.—Watchman, March 2d.

We may also add that the Watchman does not stand alone in its sentiments. Similar doctrine is inculcated by the Harrisburg misnamed Patiot and Union and three-fourths of the self-styled Democratic press in this State as well as others.

A York county democratic sheet calls Gen. Grant a usurper and tyrant for suppressing rebel papers, and intimates that Johnson must put a stop to such proceedings.

A Cop's Record.

The old saying that a "renegade is worse than ten Turks," is again exemplified in the nomination of Hiester Clymer, a former whig who left that party for the sake of office, and became, as is frequently the case with those governed by such motives, worse than any ten original patent democrats Augustas E. Stephens. Republican, was last week to be found between Lake Erie and the Republican gain of 311 since last year. Delaware river. During the war he was of course a Prince among Cops, as the following, from a hundred proofs that might be adduced, will show.

The cops that wanted to fight under Johnson, are drawing in their horns since they have discovered that the President still continues to appoint Union men to office in preference to rebel sympathizers. The fact is, its the offices they are after, and to get them they would steal Union thunder and call it democratic.

Mr. Greely's excellent work.

Senate Chamber,

Messes. O. D. Case & Co.—Gentlemen:—I have read to first volume of Mr. Greely's "American Conflict," it deep interest, and consider it decidedly the best story of the Great Rebellion which has yet been ritten. Its statement of the causes of the war is included and liberal, its narration is admirable, and as a hole, it is a contribution to our national history of cart value. The freshness of its style—the graphic stimetness with which it depicts the events of the arr, and presents to the reader the characters of the tors on both sides, render it deeply interesting, hille its entire freedom from partizan bigotry, and the evident sincerity of the writer, inspires perfect infidence in its truth as a history. If the work shall completed as it has begun, it will be worthy of its biject, and a lasting monument to the eminent tains and undoubted patriousm of its anthor.

Yours very respectfully, James Dixon.

I certify that I was not present at the meeting of the directors of the Matawana Bridge Company when they signed the article declaring the different communications written by "Justice" to be a tissue of false-books. In a day or two after the meeting, Penrose Duil came to me with the paper above alluded to and asked me to sign it. I inquired of him what it was.—He said it was just a little bridge notice. I inquired what the notice was about. He said he did not know himself what it was. He told me the other directors had signed it. I had not my spectacles with me and not knowing the import of the paper, I signed it on the representation of Mr. Duil. If I had known what the contents of it were, I would not have signed it. Silver Mining Profitable.

Silver Mining Profitable.

That the business of Mining and reducing silver quartz is immensely profitable, is amply attested by the results which have accrued from the onnes of Mexico. Peru, Germany, and other silver-bearing countries, and that Silver lodes are remarkably rich, as well as numerous, in Nevads, we have the testimony of such eniment and disinterested men as Bishop Simpson. Prof. Silliman, Prof. James, Hon. Horace Greely, Speaker Colfax and Senator Nye, who personally visited and inspected the mines, besides hundreds of other individuals who are now engaged in the business of mining in that State. Prof. Silliman, whilst in Nevada, delivered a lecture in the city of Austin, during which he said: "We cannot count upon the time when mining will cease to be profitable in these hills!"

these hills!"

Bishop Simpson of the Methodist church, in a lecture delivered in the city of New York, after his return from Nevada, said: "Were the debt of our nation \$2,300,000,000, there is wealth enough there, when our debt is paid off, to give to every soldier who returns from our baitle-fields muskets of silver instead of iron. * * I do not now speak from idle speculation, but I seak of that weeling from otherwise. speculation, but I speak of that wealth from obse

What Dividends may be Expected.

As to the amount of dividends that may be reasonably expected from a Silver Mining Company, operaing in Nevada. It may be set down as ranging from 90 to 1000 per cent. per annum according to the process made in the mines, and the quantity of machinor to see in the mines, and the quantity of machinery at work.

Harpers' Monthly Magazine for August contained an article on "Nevada." which, with reference to the profits of silver mining, said: "If the sime be of even average value it can scarcely fail to return from ten to 20 per cent a month to the invester; and silver mines are unlike gold mines, in that they are incehausible, and may be worked for generations when once opened."

*A recent issue of the Philadelphia Evening Telegraph, speaking on this subject, says: "The mining statistics of Nevada show us that whenever worked with proper appliances, and under judicious management, these mines have paid from 300 to 800 per cent, per annum upon the capital invested."

What other Companies are Doing.

What other Companies are Doing.

There is not a single Company now in operation with their own machinery in Nevada, as far as we have learned, that is not a complete success. All are returning notsonly large, but coormous Dividends, and the prices of their share have correspondingly advanced. For instance, on March 2d, the stocks of the older Companies were quoted in the city papers as follows: "Gould & Curry, \$956; Savage, \$915; Chollar Potosi, \$395; Imperial, \$117; Crown Point, \$1,849, Alpha, \$250, Yellow Jacket, 430." The original price of these stocks was less than \$50-some of them only \$10. And the Companies more recently organized are not a whit less prosperous, but as far as progressed give every promise of an ultimate success exergreater than that achieved by the Gould & Curry. For example, the stock of the Hale & Norcross Company of Nevada, which a few months ago was worth only \$40, is now the stock of the flate & Norcross company of Acvaca, which a few months ago was worth only \$40, is now quoted at \$1,150. So, also, the Boston and Reese River Mining Company, which commenced work only last SEI OF BLACKSWITH TOULS.

It may therefore be safely asserted that no other nterprise, requiring the association of capital, offers o many inducements for investment, with so little

THE REVENUE EXTENSION SILVER MINING COMPANY

Are the owners of NINETEEN (19) valuable Ledges amounting to 41,000 linear feet (the chief of which is the Revenue Extension Lead, one of the richest ever discovered in that district) all of which are similarly discovered in that district) all of which are similarly as the Hopkins. Tunnel, which commences at the foot of Lander Hill, and will pierce the hill from side to side, running at right angles with the Silvar Veins, and will cut in its course upward of one hundred and fifty mines (this number being already located), is also the property of this Company. Work upon this also the property of this Company. fifty mines (this number being already located), is also the property of this Company. Work upon this tunnel is being pushed forward with energy, and has already reached upward of three hundred feet. The Superintendent telegraphs from Austin, Nevada, under date of February 22d, 1866, as follows:
"At work on Revenue Extension Mine; ore taken out to-day assays \$157.45 to the ton. Work on Hopkins' Tunnel advanced 70 feet since last dispatch (February 24)."

And again, under date of March 5th, as follows:
"Recepts in builton \$1.990. Tunnel advanced 109 feet. Revenue shaft 20 feet."

What Others Say About It.

What Others Say About It.

The Philadeiphia Commercial List of March 3d, contains a letter from one of its correspondents, dated Austin, Nevada February 5, 1866, which says:

"At the lower extremity of the city of Austin—quondam Clifton—where Pony Canon debouches into Reese River Valley, a project has been commenced, which, if carried out in accordance with the plan of those who conceived the scheme, will prove one of the most magnificent works of the day, and which cannot fail to handsomely reward those who push it to completion. I allude to the Hopkins' Tunnel. The Revenue Extension Mining Company, owning this tunnel have a series of ledges lying parallel with each other, located upon the hill, at the foot of which this work commences, and will cut at nearly a right angle each lode with which it comes in contract throughout its entire length, and they can be numbered by the score—the hill being literally scanned with them. * A sthis great work progresses, vein after vein of the rock bearing the precious metal will be crossed, at a depth sufficient to render their working profitable, each in succession being cut at a greater depth from the surface than the preceding one, owing to the rising of the hill in which they are located. Upon these veins, after they are crossed, workmen can be engaged in extracting the ores upon either side of the tunnel, without in any manner hindering its progress."

The Success of the Company Certain.

It is thus apparent that the Revenue Extension Silver Mining Company have progressed so far in their operations that success is not only certain, but ACTUALLY AT THE DOOR. Before the close of the company unique-merhaps by the widdle, if will be carried. ACTUALLY AT THE DOOR. Before the close of the coming summer—perhaps by the middle—it will be ranked amongst the DIVIDEND-PAYING companies, and its stock will, in all probability, advance to \$25, \$50, or perhaps even \$100 per share. Therefore, noe is the time to invest. Only a small portion of the working capital yet remains unsold, and the Directors are anxious that it should be disposed of immediately, in order that there may be no delay in the prosecution of the work in hand.
