JAS. M. LASHELL, Agent for Mifflin County.

School House destroyed by Fire.-We learn from a correspondent that about 4 o'clock on the morning of the 15th March, School House No. 1, better known as S. Yoder's, situate in the east end of Bratton township, was discovered to be on fire. and before any of the neighbors reached the spot, the building and all its contents were a sheet of flame. The house was a frame, and consequently burnt with great rapidity. All the books of 70 or 80 scholars were destroyed. The school was in charge of Isaac Winter, who only lacked four days of finishing his winter term. The fire is believed to have been the work of an incendiary, as there was a pile of stones built up at one of the windows, as though it had been done to elevate the person in breaking open the window shutters; there was also some broken glass discovered scattered around, which evidenty had not been in the fire. This was one of the best school buildings in the county, erected at a cost of \$800 in 1856, and is the second school house burned down on that foundation within eleven years, both believed to be the work of incendiaries.

Destruction of Fish.-Trout, it is well known, are a poor fish until they begin to fatten from flies and other animal food furnished in the spring months, in fact not as good eating as the ordinary chub which can be caught by hundreds in the Kishacoquillas between its mouth and the Lewistown Mill; yet, either from a efiance of law, or to have it to boast that trout had been caught, numbers will persist in eatthing this fish out of season.-It is against the law to fish for trout in my stream at this time, and it is also against the law to fish in the tributaries of the Juniata at any time, with nets of any kind. Could people either be reasoned or driven into the observance of these laws, a few years would do much towards restocking our streams; but as reason seems to have little effect, why not reason seems to have little effect, why not form a county association for the protec- Kearns. ion of both game and fish? A small Township Clerk-S. L. Brower. contribution from each member annually would procure the services of an attorney to prosecute all cases which might arise and once under way, it would soon check if not stop altogether the wanton destruction now waged against both fish, game, and even useful birds. Think of it, reader, and at April term let the thing be talked over and acted upon. A few men in each township could set this ball in effectual motion.

Mifflin and Centre County Railroad. An idea has obtained credit that the Pennsylvania Railroad Company had determined to finish this road to Milroy the comng season, but we learn that the managers have come to no conclusion on the ubject further than that if the people of the valley beyond Reedsville will contribute a portion towards finishing the road, it will be made. Our opinion, as heretofore expressed, is that the completion of this road to Bellefonte would secure a vast amount of travel and trade from that region, being we believe the nearest and most direct route to Philadelphia that could be constructed, and at the same time would do much towards allaying the spirit of hostility manifested beyond the Seven Mountains by the defeat of the project for constructing another great through line; but from the conclusion arrived at, it is evident that if the people of Milroy and neighborhood desire railroad facilities, they will have to go to work in an energetic manner, and see what can be done.

The Water Company has been Stuckey. thrown into some commotion by the reported passage of a bill in the House compelling the managers, under pain of forfeiture of charter, to enlarge the street pipes, furnish an aditional supply of water, &c. So far as an enlargement of the removed to the old corner, a few doors street pipes is concerned, we do not think above its late location. knowledge it has never been shown that street, one door west of Rudisill's hat and the pipes laid down are insufficient to cap store. supply all the water needed when it was Cogley's telegraph, newspaper and magsubject of complaint, and on this there Market street, in the office formerly occucan be no two opinions, namely, that the pied by C. Hoover, Esq., deceased. company has not constantly furnished. D. Grove's establishment of groceries, We have often urged that it would be doors east of Blymyer's store. sound policy on the part of the stockhold- Flittings just now are fashionable.

ers to issue additional stock sufficient to realize from two to five thousand dollars, first to construct an additional reservoir, and secondly to bore for water in the hollow from whence the present supply is obtained (where, there is every geologieal probability that an abundant and constant flowing supply can be had at a depth of from 50 to 200 feet,) or to procure water from the Kishacoquillas either by self-acting machinery or other power. We believe further that even if \$10,000 additional stock had to be issued to furnish water and make the connection at Third street, the additional charges which could are to Harrisburg \$210; to Philadelphia 585; to bona 250; to Pittsburgh 660; to Baltimore 520; to be made for its more general use would realize as fair dividends as are now de-

REVENUE EXTENSION SILVER MINING COMP'S

OF NEVADA.

Capital Stock,

\$500,000,

Divided into 50 000 Shares, at \$10 each.

OFFICERS:

PRESIDENT, Hox. GEORGE P. FISHER, Judge of the Supreme Court, Washington, D. C.

VICE PRESIDENT. T. S. EMERY. Philadelphia.

TREASURER. E. B. HARPER,

Of Harper, Durney & Co., Bankers, Philadelphia.

LOUIS R. McDONOUGH, Philadelphia.

SUPERINTENDENT AT THE MINES. D. S. CHILDS. Mining Engineer, Austin, Nevada

OFFICE. No. 55, South Third St., Philadelphia

Silver Mining Profitable.

That the business of Mining and reducing silver quartz is immensely profitable, is amply attested by the results which have accrued from the mines of Mexico, Peru, Germany, and other silver-bearing countries, and that Silver lodes are remarkably rich, as well as numerous, in Nevada, we have the testimony of such eniment and disinterested men as Bishop Simpson. Prof. Sillman, Prof. James, Hon. Horace Greely, Speaker Colfax and Senator Nye, who personally visited and inspected the mines, besides hundreds of other individuals who are now engaged in the business of mining in that State. Prof. Sillman, whilst in Nevada, delivered a lecture in the city of Austin, during which he said: "We cannot count upon the time when mining will cease to be profitable in these hills!"

ese hills!"

Bishop Simpson of the Methodist church, in a lecre delivered in the city of New York, after his rern from Nevada, said: "Were the debt of our nans \$20,000,000,000, there is wealth enough there, when
ir debt is paid off, to give to every soldier who rerns from our battle-fields muskets of silver instead
iron. * * * I do not now speak from idle
ceulation, but I speak of that wealth from observamand actual calculation.

What Dividends may be Expected,

As to the amount of dividends that may be reason-bly expected from a Silver Mining Company, opera-ing in Nevada, it may be set down as ranging from 90 to 1000 per cent. per annum, according to the pro-ress made in the mines, and the quantity of machiny at work. Harpers' Monthly Magazine for August contained

Harpers' Monthly Magazine for Angust contained in article on "Nevada." which, with reference to the rofits of silver mining, said: "If the mine be of even verage vame it can scarcely fail to return from ten 29 per cent a month to the invester; and silver nines are unlike gold mines, in that they are inexaustible, and may be worked for generations when nee opened."

A recent issue of the Philadelphia Evening Teleraph, speaking on this subject, says: "The mining taitsties of Nevada show us that whenever worked ith proper appliances, and under judicious management, these mines have paid from 300 to 800 per cent.

What other Companies are Doing.

There is not a single Company now in operation with their own machinery in Nevada, as far as we are learned, that is not a complete success. All are cturning not only large, but commons Dividends, and the prices of their share have correspondingly adanced. For instance, on March 2d, the stocks of he older Companies were quoted in the city papers of follows: "Gould & Curry, \$950; Savage, \$915; Cholar Potosi, \$305; Imperial, \$117; Crown Point, \$1,497; Alcha, \$250, Yellow Jacket, 430," The original price of these stocks was less than \$50—some of them only \$10, and the Companies more recently organized are not every promise of an ultimate success over greater than that achieved by the Gould & Curry. For example, the stock of the Hale & Noreross Gompany of Nevada, which a few months ago was worth only \$10, is now quoted at \$1.150. So, also, the Boston and Reese River Huning Company, which commenced work only last fall; its shares, though originally sold at \$10, soon went up to \$100, and on the 1st of March had advanced to \$200.

The Natural Conclusion.

It may therefore be safely asserted that no other enterprise, requiring the association of capital, offers so many inducements for investment, with so little risk, as Silver Mining. Berg Company that wans a nine, and will honestly go to work, MUST BE A SUCCESS! It cannot possibly fad. The only difference between companies at work will be in the amounts of their dividends.

THE REVENUE EXTENSION SILVER MINING COMPANY

Are the owners of NINETEEN (19) valuable Ledges amounting to 41,090 linear feet (the chief of which is the Revenue Extension Lead, one of the richest ever discovered in that district.) all of which are situated upon the celebrated Lander Hill, near Austin, Nevada. The Hopkins' Tunnel, which commences at the foot of Lander Hill, and will perce the hill from side to side, running at right angles with the Silver Veins, and will cut in its course upward of one hundred and fifty mines (this number being already located), is also the property of this Company. Work upon this unnel is being puished forward with energy, and has already reached upward of three hundred feet.

The Superintendent telegraphs from Austin, Nevada, under date of February 22d, 1866, as follows:

"At work on Revenue Extension Mine; ore taken out to-day assays \$457.45 to the ton. Work on Hopkins' Tunnel advanced 70 feet since last dispatch (February 22d); and was a feet of the since last dispatch of the since last

February 2d)."
And again, under date of March 5th, as follows "Receipts in bullion \$1.900. Tunnel advanced 109 feet. Revenue shaft 20 feet."

What Others Say About It.

The Philadelphia Commercial List of March 3d, The Philadelphia Commercial List of March 3d. contains a letter from one of its correspondents, dated Austin. Nevada, February 5, 1886, which says:
"At the lower extremity of the city of Austin—quondam Clitton—where Pony Canon debouches into Reese River Valley, a project has been commenced, which, if carried out in accordance with the plan of those who conceived the scheme, will prove one of the most magnificent works of the day, and which cannot fail to handsomely reward those who push it to completion. I allude to the Hopkins' Tunnel. The Revenue Extension Mining Company, owning this tunnel have a series of ledges lying parallel with each other, located upon the hill, at the foot of which this work commences, and will cut at nearly a right angle each lode with which it comes in contract throughout its entire length, and they can be numbered by the score—the hill being literally seamed with them. * As this great work progresses, vein after vein of the rock bearing the precious metal will be crossed, at a depth sufficient to render their working profitable, each in succession being cut at a greater depth from the surface than the preceding one, owing to the rising of the hill in which they are located. Upon these veins, after they are crossed, workmen can be engaged in extracting the precious metal-work men can be engaged in extracting the ores upon either side of the tunnel, without in any manner hindering its progress."

The Success of the Company Certain.

It is thus apparent that the Revenue Extension Silver Mining Company have progressed so far in their operations that success is not buly certain, but actually at the Door. Before the close of the coming summer—perhaps by the middle—it will be ranked amongst the DIVIDEND-PAYING companies, and its stock with, in all probability, advance to \$25, \$50, or perhaps even \$100 per share. Therefore, now is the time to invest. Only a small portion of the working capital yet remains unsold, and the Directors are anxious that it should be disposed of immediately, in orcapital yet remains unsold, and the Directors are anxcapital yet remains unsold, and the Directors are anxcapital yet remains unsold, and the Directors are anxcount that it should be disposed of immediately, in order that there may be no delay in the prosecution of
the work in hand. Hence this advertisement.

Price of shares \$10, free of assessment.
Certificates issued as soon as funds are received.
Persons wishing to invest, whether in large or small
amounts, may remit to or address
