To show this, let us look at the present condition of the company. The amount of stock issued is we believe \$15,600; on plus accumulated, say \$600 or \$700. Suppose the company should add \$5000 additional stock, or borrow that amount, it would require only \$400 additional income to pay 8 per cent. on the \$20,600. With an abundance of water, there would be no difficulty in realizing double that sum.-Manufacturing establishments, which have been cut off for want of water, or in 🚊 such case would take it, would add from one to two hundred dollars alone; hardly a taverh or business house pays its share in proportion to most private families; of the larger consumers the same thing may be said; \$8 rates could be increased to \$10; \$6 to \$7.00 or \$7.50; \$5 to \$6.00, &c., and if furnished with water in abundance all the year, there would be less complaint with these increased rates than there has been.

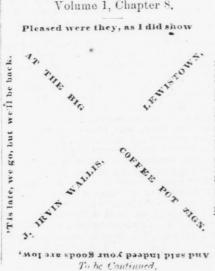

The only difficulty to be encountered would be in case steam machinery should be required; but we believe this can be readily avoided, either by boring (an experiment which would not cost a great deal and ought to be made,) or by conduct-

The American Wine Plant.

THE undersigned having been extensively a engaged in growing Plants and manu-facturing Wine for the last four years, are prepared to furnish Plants the coming Spring at the following rates: \$15 per hundred, or \$12.50 per hundred when a thousand or more are ordered, Each plant will make from one to two gallons of wine the first season, equal to the best Sherry Wines of Europe. Sample wine forwarded by express at the whole-sale price, \$3 per gallon. Letters of inquiry, orders for wine and plants promptly attended

to by addressing, KELLY & KLECKNER,

The tural Conclusion.

It may therefore safely asserted that no other enterprise, requiling association of capital, offers so many inducents for investment, with so little risk, as Silver Mi, *Every Company that owns of* mine, and will hole go to work, MUST BE A SUCESS It cannot possible 1. The only difference between companies at work) be in the amounts of their dw idends.

THE REVENUE TENSION SILVER MINING OMPANY

OMPANY Are the owners of NETEEN (19) valuable Ledges anothing to fLobeer feet (the cheef of which is the Revenue Extern Lead, one of the richest ever discovered in that criet.) all of which are situated upon the celebrate-gander Hill, near Austin, Nera-da. The Hopkins' hnel, which commences at the to side, running at rigangles with the Silver Yems, and will ent in its core upward of one hundred and fifty mines (this nurer being already located), is also the property of the Company. Work upon this already reached upwalof three hundred feet. The Superintendent legraphs from Austin, Nera-da, under date of Febrary 221, 1850, as follows: "At work on Revent Extension Mine; ore taken out to-day assays \$55.5 to the ton. Work on Hop-kins' Tunnel advance(20 feet since last dispatch (Febrary 2d)." And again, under date (March 5th, as follows: "Receipts in tuilion 3000, Tunnel advanced 100 feet. Revenue shatt 20 fe."

What OthersSay About It.

What OthersSay About 11. The Philadelphia Comparcial List of March 3d, contains a letter from one it is correspondents, dated Austin, Nevida, Feldruny & 1866, which says: "At the lower extremit of the city of Austin-groundam Chiflon-where Pury Canon debouches into Reese River Valley, a project has been commenced, which, if carried out in according the plan of those who concerted the schere with the plan of the most pagnificent works of the day, and while to completion. I allude to the Hopkins' Tunnel. The Revenue Extension Minity Company, owning this tunnel have a series of leages lying parallel which this work commences, and will cut at nearly a right angle each lode with which it comes in con-tract throughout its entire length, and they can be numbered by the score-the hill being literally sem-cid with them. * As this great work progresses, ven after vein of the rock bearing the precious metal will be crossed, at a depth sufficient to render their work-ing profitable, each in succession being cut at agreat-er depth from the surface than the preceding one-owing to the rising of the hill in which they arelocat-ed. Upon these veins, after they are crossed, work-men can be engaged in extracting the ores upon either sing is progress."

ng its progress.

The Success of the Company Certain.

It is thus apparent that the Revenue Extensi-ilver Mining Company have progressed so far beir operations that success is not only certain, h Silver Mining Company have progressed so have their operations that success is not only certain, but their operations that success is not only certain, but and the probability of the companies, and its stock wil, in all probability, advance to \$25, \$50, or perhaps even \$100 per share. Therefore, now is the time to invest. Multiply a small portion of the working capital yet remains unsold, and the Directors are anxious that it should be disposed of immediately, in order that there may be no delay in the prosecution of the work in hand. Hence this advertisement. Price of shares \$10, free of assessment. Certificate issued as some as funds are received. Persons wishing to invest, whether in large or small amounts, may remit to or advicess E. B. HARPER, Treasurer, No. 55 Sorth Timps P. Phila.
