whom is at present at least a mystery, as the safe stood in a very exposed situation in his office, and he was in the habit of four months in a year. But with any one was also well known that he frequently kept money and other valuables in it, and the wonder is that some burglar had not spotted it long ago. People cannot be too careful nowadays, as there are a great material specific to these machines a woman can sew at least eight times as fast as by hand; but, allowing for all the basting, etc., call it only four times as fast. Then with a sewing-machine three out of four months' sewing can be easily saved! Can any one have an advantage of the same for \$20.00 to ny who care but little how they acquire means to live and sport upon.

We hear of a large number of Philadelphians, Baltimoreans, &c. engaging summer quarters at Lewistown, Milroy, and other places. Milroy has magnificent scenery in its neighborhood, and with the railroad unished to that place and a summer resort built near Beaty's Knob or some other romantic spot, would soon vie with Bedford, Cresson, or any other point. The plateau between the river and Granville run would also afford a splendid sight for a summer resort, with shady drives and scenery that need but to be seen to be appreciated.

The cramped chests, the rounded shoulder, the deformed spines, the injured eyesight, all so common among those who sew much with the needle, are avoided by those who use a machine. The benefit in this respect by far outweighs the cost of the ma-
