A Year of the Cattle Plague in England-Official Statement.

The following official statement has been made by the British Privy Coun-

PRIVY COUNCIL OFFICE, June 22 .-The cattle plague has now completed the fifty-second week of its prevalence, and during the year nearly a quarter of a million (248,965) of attacks have been officially reported; 80,597 cattle are stated to have been killed, 124,187 to have died, 32,989 to have recovered, and in 11,192 cases the results have not been specified. In addition to the foregoing, 51,343 cattle exposed to risk have been slaughtered while free from disease.

In the aggregate, more than 50 (50.5) in every 1000 of the ordinary stock of cattle in Great Britain havebeen attacked, and to every 1000 attacks, whose results have been reported, nearly 900 (861.3) animals perished

The epidemic has also extended to a considerable number of sheep, and since the commencement, 4466 are officially reported to have been attacked; of these 4002 died or were killed, and 461 recovered or were unaccounted

During the week ending the 16th of June, 533 attacks were reported to have occurred in Great Britain-namely, 488 in England, 26 in Wales, and 18 in Scotland. The number of attacks—namely, 533—shows a decrease of 454 on the previous return. Correcting the total, by adding an average of attacks commencing during the week, but which may be subsequently reported, the number for the past week will be 666.

Caution to Merchants & Tinners.

Caution to Merchants & Tinners. Since the great success of my cemented paper rings for closing Fruit Cans, some have thought of the fit into the same current of stocess by infringing upon my patent. Some cans longer patented than mine, on which gum had been used under their patent arrangement, are now making their appearance with cemented paper rings, instead of the gum formerly used.

with cemented paper rings, instead of the guin formerly used.

In most cases such infringements take place thre' persons not responsible, who take orders in country stores, while the manufacturers in the cities have for the most part concealed their work. This is to notify the public that the use of cemented paper, presed upon the top of a fruit can, during the heated state of the fruit, so that when cold it is perfectly scaled, is an infringement upon my rights, unless used upon a can having a cap with my name stamped upon it. Any kind of cement upon this paper, undergoing a process of pressure during the cooling of the fruit comes in contact with my patents, dated Nov. 12, 1861, Aug. 19, 1862, March 22, 1864. All who manufacture, sell, or use cans with cemented paper, which have not my use cans with comented paper, which have not my name upon the caps, are liable for infringement. Manufactured by J.
