From Godey's Lady's Book for November. A Luncheon Cake. - One pound flour, four ounces of butter, six ounces of moist sugar, quarter of a pound of currants, quarter of a pound of stoned raisings, spices and candied peel to the taste; a teaspoonful of carbonate of soda mixed in half a pint of cold milk; all to be mixed together and beaten into a paste, then put into the oven without being set to rise; it will take

an hour and a half to bake.

Seed Cake .- Beat one pound of fresh butter to cream, add one pound of loaf sugar, and beat both together until they become white, then add two eggs, beat for some time, add two more, and so on until you have added twelve .-Have one and three quarters of a pound of flour sifted, mix among it half a pound of orange-peel and one pound of citron-peel cut small, half a pound of sweet almonds, blanched and cut small, then mix all together, but stir as little as possible. Have a mould prepared, put the cake in, smooth with a knife and scatter a few caraways at the top. Bake two hours and a half in a moderate oven.

Lemon Rice .- Wash some rice thoroughly in cold water, boil it in as much milk as it will absorb, sweeten to taste, and put in into a mould. Peel a lemon, cut the peel into shreds three-quarters of an inch in length, put them into a little water. Boil it up, and throw the water away; after which put a teacup of fresh water upon them. Squeeze and strain the juice of a lemon, and put it, with some white sugar, upon the shreds, and let it stew gently for two hours. When cold it must be a thick syrup. Turn out the rice in a dish, and pour the syrup over it, taking care that the shreds are spread equally over the rice. The rice will be much firmer if cooked over night.

Buth Buns .- Take one pound and a half of fine flour, three quarters of a pound of powdered and sifted loaf sugar, one pound of butter, three yelks and two whites of fresh eggs; grate the rind of a lemon; add the juice, and mix all the ingredients well together, and make them into small round cakes; put a few well washed currants into the middle of each bun, and wash them over with egg, loaf sugar, and some comfits. Bake them in a moderate oven.

Biscuits .- Put half a pound of butter into a basin and turn it about well with a spoon. Whisk six eggs well, add half a pound of powdered sugar, whisk another ten minutes, and then mix with the butter, after which stir in six ounces of currants, and an equal quantity of dried flour. After mixing these all well together, drop the mixture on paper, each about the size of a shilling and bake in a quick oven, taking the biscuits off the paper while hot.

P. S. Many of the above mentioned goods are direct from the factory, and will be sold low for cash.

I will wholesale Glass Jars at the same figures they do in Phila, and Tin Cans lower than the city price.

For spouting and job work we intend to let no one outdo us in price. We use the best material, and profess to understand our ousness,

I append the following card from H. S. Fisher, Patentee of my celebrated Spring Top Can:

Caution to Merchants & Tinners. Since the great success of my cemented paper rings for closing Fruit Cans, some have thought to drift into the same current of success by infringing upon my patent. Some cans longer patented than mine, on which gum had been used under their pat-

ent arrangement, are now making their appeara ented paper rings, instead of the gum form-

with cemented paper rings, instead of the gum formerly used.

In most cases such infringements take place thropersons not responsible, who take orders in country stores, while the manufacturers in the cities have for the most part concealed their work. This is to notify the public that the use of cemented paper, pressed upon the top of a fruit can, during the heated state of the fruit, so that when cold it is perfectly scaled, is an infringement upon my rights, unless used upon a can having a cap with my name stamped upon it. Any kind of cement upon this paper, undergoing a process of pressure during the cooling of the fruit, comes in contact with my patents, dated Nov. 12, 1861, Aug. 19, 1862, March 22, 1864. All who manufacture, sell, or use cans with cemented paper, which have not my name upon the caps, are liable for infringement.

Telegraphing.

The arrangements for Telegraphing are far in advance of anything of the kind ever offered to the public. A regular Telegraph Line is connected with the Institution with twenty branch offices in various parts of the city, where public business is transacted, and in which the students of this Institution are permitted to practice. No regular office practice can be had in any other school of instruction in the country, without which no one can obtain a position as a practical operator. Young men are cautioned against the deceptive representations of those who, without any such facilities, pretend to teach Telegraphing.

Patronage. Patronage.

This Institution is now enjoying the largest patronage ever bestowed upon any commercial school in the State. Over five hundred students were in attendance the first year, and over seven hundred during the past year. The best class of students may invariably be found here, and all its associations are first-class.

Location and Accommodations. The Institution is located in the most central par f the city, and its accommodations, for extent, ele BUSINESS OFFICES OR COUNTING HOUSES, TELEGRAPH OFFICES, STATIONERY STORE
