Cement for Jars and Bottles .- According to the quantity of cement required, take one third beeswax and two-thirds rosin. Pound the rosin to a fine powder, and then put it, with the beeswax, into any sauce pan or skillet suited to the purpose, and set it over the fire to melt. When it becomes thoroughly liquid, take it off the fire, and stir in some finely-powdered brickdust, till the mixture becomes as thick as melted seafing-wax. Then plaster it, warm, found the covers of your preserve or pickle jars. If you use it for bottles, first cork them tightly, and then dip their tops into the cement. It will dry in a few minures. This cement is very strong and very cheap, and especially useful for articles that are to be car

Blue Wash for Walls .- Get a pound of blue vitriol from a drug or paint store, and have it powdered very firely in a mortar Provide also two quarts of lime. Take six cents' worth of glue, and boil it in a quart of soft water till thoroughly dissolved. Put the powdered vitriol into a wooden backet, and when the glue-water is cold, pour it on the vitriol, and mix and stir it well. When the vitriol is dissolved in the glue water, stir in by degrees the two quarts of lime. Then try the tint of the mixture by dipping a piece of white paper into it; and when it dries, you can judge if it is the color you want. It should be a clear light beautiful blue. If you think it too dark, add some more lime. If too pale, stir in a little more of the powdered vitriol. It is well to provide an extra quantity of each of the articles, in case a little more of one or the other should be required on trial of the color.

To Keep Silver Always Bright .- Silver, in constant use, should be washed every day in a pan of suds made of good white soap and warm water; drying it with old soft linen cloths. Twice a week, (after this washing,) give it a thorough brightening with finely powdered whiting, mixed to a thin paste with alcohol; rubbing longer and harder where there are stains. Then wipe this off, and polish with clean soft old linen. Silver is cleaned in this manner at the best hotels.

AGRICULTURAL. Report of the Commissioner of Agriculture.

The monthly report of Isaac Newton. Commissioner of Agriculture, says the returns of local correspondents up to the first of October verify, in all essential particulars, the statements respecting the crops contained in previous monthly exhibits. The condition of corn has suffered some deterioration from early trosts and excessive rains, but the quantity of the crop is larger than the largest ever previously chronicled in the country. In the production of wheat, next to corn our most important cereal, our agriculture has been unfortunate for the past three The estimate for the present year,

now nearly complete, will not vary much from 143,000,000 bushels, showing a small percentage of decrease. which is fully compensated by the comparatively superior quality of the grain, as was predicted in a preceding number. This is 10,000,000 of bushels more than the crop of 1859, and is within 5,000,000 of a product in proportion to the increased population -The diminution in the South is more apparent The estimates point to less than 17,000,000 bushel in the eleven States hitherto unreported, a fraction less than five tenths of the crop in 1859. It is worthy of remark in connection with the diminution of the three past seasons, that the wheat crop of England has been likewise deficient since

The California wheat harvest, of which little mention has been publicly made in connection with the present crop is excessive. In 1860 the product of the young State was nearly 6,000,-000 bushess; now it is seriously claimed by leading California agriculturists that the surplus for export will be nearly double that quantity. It is evident that the entire wheat crop will exceed, by several millions, that of 1859, when the yield was reported at 173,104,924 bushels. Then there were five and a half bushels to each individual.

In 1866 the estimates point to five bushels to each inhabitant. There is then no ground for apprehension of scarcity, and little excuse in the amount of the crop for starvation prices. The yield of oats is extraordinary, and the quality excellent. The indications point to an increase from 171,497,072 bushels in 1859 to 271,912,625 in 1866. It is the only crop in the South that maintained an equality with its last census report.

Hay is less in quantity than in the previous year by from one to twotenths, but is a great deal better in

An analysis of the Southern returns up to October 1st, do not warrant a reduction of the former cotton estimate much below one and threetourths millions of bales, though it is too early for final estimates. Increasing severity of damage from insects is reported.

I will wholesale Glass Jars at the same figures they
do in Phina, and Tin Claus lower than the city price.
For spouting and job work we intend to let no one
outdo us in price. We use the best material, and profess to understand our business.

Caution to Merchants & Tinners.

Since the great success of my cemented paper rings for closing Fruit Cans, some have thought to drift into the same current of success by infringing upon my patent. Some cans longer patented than mine, on which gum had been used under their patent arrangement, are now making their appearance with cemented paper rings, instead of the gum formerly used.

In most cases such infringements take place through the proposition of responsible, who take orders in canada.

In most cases shen infringements take place thropersons not responsible, who take orders in country stores, while the manufacturers in the cities have for the most part concealed their work. This is to notify the public that the use of cemented paper, pressed upon the top of a frint can, during the heated state of the fruit, so that when cold it is perfectly scaled, is an infringement upon my rights, unless used upon a can having a cap with my name stamped uponit. Any kind of cement upon this paper, undergoing a process of pressure during the cooling of the fruit, comes in contact with my patents, dated Nov. 12, 1861, Aug. 19, 1862. March 22, 1864. All who manufacture, sell, or use cans with cemented paper, which have not my name upon the caps, are hable for infringement.
