June 3d, 1867. MESSRS. EDITORS: -It affords me much pleasure to say to you in relation to your inquiry in regard to the success of our experiment in making coke metal at this place, that it has been a perfect success as far as demonstrating beyond the shadow of a doubt, that we have all the requisite material here for the successful manufacturing of pig metal with coke. The only difficulty we encountered was the want of sufficient blast—as is takes a much stronger blast to smelt iron with coke than charcoal. It appears to have been a mooted question up to this time as to whether the coal in the Broad Top region whether the coal in the Broad Top region whether the coal in the Broad Top region by Mould make a coke suitable for the man
