#### MONDAY EVENING, JUNE 7, 1880. New York Tobacco Market.

Seed Leaf and Havana Leaf Last Week. U. S. Tobacco Journal. At last some real, genuine transactions in '79 Pennsylvania have been made in our market. The sales of this stock for the week foot up 1,300 cases. To this there is to be added a sale of 700 cases by a Lancaster packing firm to a Water street leaf house. This makes the week's total sales 2,000 cases, which made the packers feel, socially speaking, salubrious; commer-

cially speaking, stiff. In this market, among the packers of '79 Pennsylvania there exists the opinionand it is being freely expressed-that the U. S. Tobacco Journal is "bearing," in order to sustain its early predictions regarding the investments in the crop. This is wrong. Every one must admit that there is an abundance of tobacco in the country and that the indications for a brisk export business are exceedingly slim. Why then should we recommend to our readers the buying of '79 tobacco in its state of fermentation when no one is able to tell how it will cure? Holders of '79 Pennsylvania argue that of the fine grades there is but a small quantity, and that those who hold aloof now will have to buy inferior grades in the future. We have yet to find the holderand in this city there are almost forty-five holders-who will say that he has not as fine a packing as was put up. The real to the fact that he successfully treats judge of how much good there is and how much of bad tobacco, is the buyer. He can't tell even now if he examines the samples of all the packers in the market. Later in the season the prospecting buyer can tell exactly how much fine tobacco

There are always people who believe themselves able to tell what tobacco will be before it is cured, and generally these people find themselves losers if they buy upon the strength of such judgment. Some of the oldest manufacturers bought '78 Pennsylvania when it was still in the sweat, but positively refused to accept it later on. In the meantime the tobacco had taken on a different appearance. Who knows that the '79 Pennsylvania already bought by packers' samplers will not be rejected in a few months? It is bad The Best Purgative and Blood Purifier. policy even for a packer to offer his new tobacco for sale subject to inspection samples in the fall, unless he knows that his tobacco is poor. If the tobacco turns out well, the party that bought it will not give more than he agreed to give for it; if it turns out worse than the packers' samples, he will want a reduction or reject it altogether. Therefore, the few transactions in '79 Pennsylvania which have taken place are no criterion of the advisability or inadvisability of the investments at the high figures they were generally made at. They also do not establish in the least its market value, especially as the figures in those few transactions have been kept a profound secret. The buyers claim to have paid big figures. Has anybody a right to expect them to tell the real figures. A paper like the U. S. Tobacco Journal

offers its opinion, unbiased and unprejudiced. Most all of those interested in the movements in the market read its reports and its opinions only for the purpose of comparing them with their own. Manufacturers and merchants who read their ERS paper, do not read it to learn their busi-They read it to gather more information; they like to see decided opinions expressed, but act accordingly to the peculiar circumstances affecting their busi-

From the Hub. There is perhaps no tonic offered to the people that possesses as much real intrinsic value as the Hop Bitters. Just at this season of the year, when the stomach needs an appetizer, or the blood needs purifying, the cheapest and best remedy is Hop Bitters. An ounce of prevention is worth a pound of cure, don't wait until you are prostrated by a diseases that may take months for you to recover in.—Boston Globe.
